

100% Pass Quiz High-quality DA0-002 - CompTIA Data+ Exam (2025) Test Quiz

Our company can provide the anecdote for you--our DA0-002 study materials. Under the guidance of our DA0-002 exam practice, you can definitely pass the exam as well as getting the related certification with the minimum time and efforts. We would like to extend our sincere appreciation for you to browse our website, and we will never let you down. The advantages of our DA0-002 Guide materials are too many to count and you can free download the demos to have a check before purchase.

CompTIA Data+ Exam (2025) Practice exams of ActualTestsIT i.e. desktop software and web-based are customizable and you can attempt them for multiple times. These practice exam save progress report of each attempt so you can assess it to find and overcome mistakes. As mentioned earlier, these CompTIA Data+ Exam (2025) (DA0-002) practice exams can be customized according to your requirements. You can change their time and numbers of CompTIA Data+ Exam (2025) (DA0-002) dumps questions as you want.

Outstanding Characteristics of CompTIA DA0-002 Practice Material Formats

After your purchase of DA0-002 learning engine, our system will send a link to your email in 5 to 10 minutes. You can contact our staff anytime and anywhere during the learning process. The staff of DA0-002 study materials is online 24 hours a day, seven days a week. Our staff is really serious and responsible. We just want to provide you with the best service. I hope you enjoy using DA0-002 Exam Materials.

CompTIA Data+ Exam (2025) Sample Questions (Q67-Q72):

NEW QUESTION # 67

Software end users are happy with the quality of product support provided. However, they frequently raise concerns about the long wait time for resolutions. An IT manager wants to improve the current support process. Which of the following should the manager use for this review?

- A. KPI
- B. Infographic
- C. Survey
- D. UAT

Answer: C

Explanation:

This question falls under the Data Analysis domain, focusing on methods to gather data for process improvement. The IT manager needs to review user concerns about wait times, which requires collecting feedback.

* Infographic (Option A): An infographic visualizes data but isn't a method for gathering feedback.

- * KPI (Option B): KPIs (e.g., average resolution time) measure performance but don't directly gather user feedback.
- * Survey (Option C): A survey collects detailed feedback from users about their experiences, such as wait times, making it the best method for this review.
- * UAT (Option D): User Acceptance Testing validates software functionality, not support processes.

The DA0-002 Data Analysis domain includes "applying the appropriate descriptive statistical methods," and surveys are a standard method for collecting user feedback to analyze and improve processes.

NEW QUESTION # 68

A data breach occurs at a company. Which of the following actions should be taken?

- A. Inform the entire IT sector, but ask for discretion.
- B. Keep the incident a secret until the issue is resolved.
- C. Make an announcement on social media so customers are aware as soon as possible.
- **D. Tell the company management team and then tell regulatory agencies.**

Answer: D

Explanation:

This question falls under the Data Governance domain, focusing on data breach response protocols. A data breach requires a structured response to comply with legal and regulatory requirements.

- * Make an announcement on social media so customers are aware as soon as possible (Option A):

Public announcement without internal coordination or regulatory notification can lead to legal issues and loss of trust.

- * Tell the company management team and then tell regulatory agencies (Option B): This follows best practices: inform internal leadership to coordinate a response, then notify regulatory agencies as required by laws (e.g., GDPR mandates notification within 72 hours).

- * Keep the incident a secret until the issue is resolved (Option C): This violates regulations requiring timely breach notification.

- * Inform the entire IT sector, but ask for discretion (Option D): Sharing with the IT sector is vague and risks leaks; regulatory agencies should be prioritized.

The DA0-002 Data Governance domain includes "data privacy concepts," such as proper breach response procedures, emphasizing internal and regulatory notification.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 5.0 Data Governance.

NEW QUESTION # 69

A grocery store wants to view the revenue from the previous year, highlighting individual departments. Which of the following is the most appropriate chart to communicate this information?

- **A. Pie**
- B. Area
- C. Line
- D. Gantt

Answer: A

Explanation:

This question is part of the Visualization and Reporting domain, focusing on selecting the appropriate visualization for a given dataset. The grocery store wants to view revenue by department, which requires a chart that shows proportions or comparisons across categories.

- * Gantt (Option A): Gantt charts are used for project scheduling, not for comparing revenue across categories.

- * Pie (Option B): Pie charts are ideal for showing proportions or percentages of a whole, such as revenue distribution across departments, making this the best choice.

- * Area (Option C): Area charts are better for showing trends over time, not static categorical comparisons.

- * Line (Option D): Line charts are used for trends over time, not for comparing discrete categories like departments.

The DA0-002 Visualization and Reporting domain emphasizes "translating business requirements to form the appropriate visualization", and a pie chart is the most appropriate for showing departmental revenue proportions.

NEW QUESTION # 70

A data analyst receives a request for the current employee head count and runs the following SQL statement:

```
SELECT COUNT(EMPLOYEE_ID) FROM JOBS
```

The returned head count is higher than expected because employees can have multiple jobs. Which of the following should return an accurate employee head count?

- A. `SELECT JOB_TYPE, COUNT(DISTINCT EMPLOYEE_ID) FROM JOBS`
- B. `SELECT DISTINCT COUNT(EMPLOYEE_ID) FROM JOBS`
- C. `SELECT COUNT(DISTINCT EMPLOYEE_ID) FROM JOBS`
- D. `SELECT JOB_TYPE, COUNT DISTINCT(EMPLOYEE_ID) FROM JOBS`

Answer: C

Explanation:

This question falls under the Data Analysis domain of CompTIA Data+ DA0-002, which involves using SQL queries to analyze data and address issues like duplicates in datasets. The issue here is that the initial query counts all instances of EMPLOYEE_ID in the JOBS table, but employees can have multiple jobs, leading to an inflated head count. The goal is to count unique employees.

* `SELECT JOB_TYPE, COUNT DISTINCT(EMPLOYEE_ID) FROM JOBS` (Option A): This query is syntactically incorrect because `COUNT DISTINCT(EMPLOYEE_ID)` should use parentheses as `COUNT(DISTINCT EMPLOYEE_ID)`. It also groups by JOB_TYPE, which is unnecessary for a total head count.

* `SELECT DISTINCT COUNT(EMPLOYEE_ID) FROM JOBS` (Option B): This query is incorrect because DISTINCT applies to the rows returned, not the COUNT function directly. It doesn't address the duplicate EMPLOYEE_ID issue.

* `SELECT JOB_TYPE, COUNT(DISTINCT EMPLOYEE_ID) FROM JOBS` (Option C): While this query correctly uses `COUNT(DISTINCT EMPLOYEE_ID)` to count unique employees, grouping by JOB_TYPE breaks the count into separate groups, which isn't required for a total head count.

* `SELECT COUNT(DISTINCT EMPLOYEE_ID) FROM JOBS` (Option D): This query correctly counts only unique EMPLOYEE_IDs by using the DISTINCT keyword within the COUNT function, providing an accurate total head count without grouping.

The DA0-002 Data Analysis domain emphasizes "given a scenario, applying the appropriate descriptive statistical methods using SQL queries," which includes handling duplicates with functions like COUNT (DISTINCT). Option D is the most direct and accurate method for a total unique head count.

NEW QUESTION # 71

A data analyst needs to modify a dashboard that was created by another employee. Upon opening the dashboard, the analyst notices that the information is not loading properly. Which of the following should the analyst do to troubleshoot this error?

- A. Check that the program is updated to the latest version.
- B. Review the data layer and data source.
- C. Ensure the correct filters are displaying on the dashboard.
- D. Validate that the database is up-to-date.

Answer: B

Explanation:

This question falls under the Data Governance domain of CompTIA Data+ DA0-002, focusing on troubleshooting data quality issues in dashboards. The dashboard isn't loading properly, indicating a potential issue with the data connection or configuration.

* Review the data layer and data source (Option A): The data layer (e.g., queries, connections) and data source (e.g., database) are the foundation of a dashboard. If the information isn't loading, the issue likely lies in the data connection or query configuration, making this the first step.

* Validate that the database is up-to-date (Option B): While this might be a subsequent step, it assumes the connection is working, which should be confirmed first.

* Check that the program is updated to the latest version (Option C): Software updates might fix bugs, but this isn't the most immediate cause of data not loading.

* Ensure the correct filters are displaying on the dashboard (Option D): Filters affect data display, but if the data isn't loading at all, the issue is more fundamental.

The DA0-002 Data Governance domain includes "data quality control concepts," and reviewing the data layer and source is the primary step in troubleshooting dashboard loading issues.
