

100% Pass Quiz Juniper - JN0-1103 Accurate Exam Learning

Juniper JN0-1103 Practice Questions

Design, Associate (JNCIA-Design)

Order our JN0-1103 Practice Questions Today and Get Ready to Pass with Flying Colors!

JN0-1103 Practice Exam Features | QuestionsTube

- Latest & Updated Exam Questions
- Subscribe to FREE Updates
- Both PDF & Exam Engine
- Download Directly Without Waiting

<https://www.questionstube.com/exam/jn0-1103/>

At QuestionsTube, you can read JN0-1103 free demo questions in pdf file, so you can check the questions and answers before deciding to download the Juniper JN0-1103 practice questions. These free demo questions are parts of the JN0-1103 exam questions. Download and read them carefully, you will find that the JN0-1103 test questions of QuestionsTube will be your great learning materials online. Share some JN0-1103 exam online questions below.

1. Which two statements are true regarding greenfield projects? (Choose two.)

P.S. Free 2025 Juniper JN0-1103 dumps are available on Google Drive shared by LatestCram: https://drive.google.com/open?id=198fuT3WYFe_PDxLosZYy5IAh_nyeBsUp

Our JN0-1103 exam cram is famous for instant access to download, and you can receive the downloading link and password within ten minutes, so that you can start your practice as early as possible. Furthermore, JN0-1103 exam dump are high-quality, since we have experienced professionals to edit and verify them. We offer you free demo for you to have a try before buying JN0-1103 Exam Braindumps, so that you can have a deeper understanding of what you are going to buy. You can enjoy free update for one year for JN0-1103 exam dumps, and the update version for JN0-1103 exam dumps will be sent to your email automatically.

Juniper JN0-1103 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Securing the Network: This section of the exam measures the skills of Security Architects and covers essential security design principles. It encompasses general security considerations, strategies for securing data centers and campus WANs, and the implementation of zero-trust security models. Additionally, it delves into Secure Access Service Edge (SASE) frameworks to enhance network security posture.

Topic 2	<ul style="list-style-type: none"> • Network Management or Reliability: This section of the exam measures skills of Network Operations Center (NOC) Engineers and covers design considerations for ensuring business continuity. Topics include high-resiliency design, implementing link and device-level redundancy, and utilizing technologies like Multihomed Ethernet Segment Identifier Link Aggregation Groups (ESI LAGs) and virtual chassis. The section also explores Juniper SRX firewall redundancy and best practices for campus network redundancy.
Topic 3	<ul style="list-style-type: none"> • Campus and Branch LAN Design: This section of the exam measures skills of LAN Infrastructure Specialists and covers considerations for designing wired campus or branch LANs. It addresses best practices in campus LAN design, modular design approaches, subnet and VLAN planning, and access control mechanisms. The section also introduces Ethernet VPN-Virtual Extensible LAN (EVPN-VXLAN) architectures and discusses campus oversubscription ratios and design architectures.
Topic 4	<ul style="list-style-type: none"> • Campus and Branch WAN Design: This section of the exam measures skills of WAN Solutions Architects and covers considerations for designing campus or branch WANs. It includes understanding WAN connectivity functions, best practices for WAN design, performance optimization, VPN design, and implementing high availability through active • active and active • passive configurations. The section also explores Software-Defined WAN (SD-WAN) design considerations, devices, assurance models, and intersite connectivity.
Topic 5	<ul style="list-style-type: none"> • Data Center Network Design: This section of the exam measures skills of Data Center Network Engineers and covers considerations for general data center network design. Topics include data center design best practices, understanding traffic patterns, virtual chassis implementation, and environmental considerations. The section also delves into data center fabric architectures, benefits of IP fabric over traditional architectures, spine-and-leaf device placement, underlay and overlay design, routing protocol selection, and best practices for IP fabric scaling.

Test JN0-1103 Questions - Valid JN0-1103 Exam Prep

Our third format is the desktop practice JN0-1103 exam software which can be used easily after installing it on your Windows laptop and computers. These formats are there so that applicants with different study styles can use them to attempt the Design - Associate (JNCIA-Design) (JN0-1103) PRACTICE QUESTIONS successfully. The practice material of LatestCram can be instantly accessed just after purchasing it.

Juniper Design - Associate (JNCIA-Design) Sample Questions (Q285-Q290):

NEW QUESTION # 285

You are consulting on the redesign for a large retail network. The customer has dozens of locations, all connected to a central data center.

Which two requirements would you expect from you customer? (Choose two.)

- A. distributed network management
- B. WAN aggregation using Internet-based VPN
- C. very high throughput at every location
- D. resiliency to ensure continuous operation

Answer: B,D

NEW QUESTION # 286

As part of your automation design, you need an off-box system that will be able to monitor telemetry information. You must then use that information to dynamically update devices as needed to ensure optimal network traffic flow.

Which automation solution would accomplish this goal?

- A. Chef
- B. SaltStack
- C. Ruby
- D. Puppet

Answer: D

NEW QUESTION # 287

What are three considerations for network capacity planning? (Choose three.)

- A. number of users
- B. application behavior
- C. network management platform
- D. user locations
- E. security regulations

Answer: A,B,D

NEW QUESTION # 288

What is the function of the aggregation tier in a traditional three tier Layer 2 network environment?

- A. The aggregation tier relays packets between the lower tier Layer 2 devices and functions as the gateway to the upper tier Layer 2 device.
- B. The aggregation tier interfaces with lower tier Layer devices and provides a high-speed interconnect with the north-bound WAN edge device.
- C. The aggregation tier connects to the Internet and with lower tier Layer 2 devices to provide Layer 3 gateway services for the network.
- D. The aggregation tier provides network connectivity to end-user devices and other hosts and enforces network access policy.

Answer: A

NEW QUESTION # 289

Which two features does Secure Web Gateway provide? (Choose two.)

- A. proxy services
- B. firewall services
- C. application queuing services
- D. name resolution services

Answer: A,B

Explanation:

A Secure Web Gateway (SWG) provides proxy services to inspect and filter web traffic and includes firewall capabilities to enforce security policies, block threats, and control access to internet resources.

NEW QUESTION # 290

.....

A few crops of practice materials are emerging in the market these days, with undecided quality to judge from customers' perspective. If you choose the wrong JN0-1103 practice material, it will be a grave mistake. Their behavior has not been strictly ethical and irresponsible to you, which we will never do. We know making progress and getting the certificate of JN0-1103 Training Materials will be a matter of course with the most professional experts in command of the newest and the most accurate knowledge in it. That's why our Design - Associate (JNCIA-Design) exam prep has taken up a large part of market.
