

# 100% Pass Quiz LEED-Green-Associate - LEED Green Associate Exam Fantastic Latest Study Questions

## LEED Green Associate Practice Questions with Correct Answers 100% Pass

Right sizing is an important factor that will affect the energy demand of a project. The bigger the building, the higher the energy demand; therefore, projects should not be developed larger than their needs. In the LEED for Homes rating system, points are adjusted in all categories according to the square footage of the home; thus, homes that are bigger need to earn more points to achieve a LEED certification, while smaller sized homes can become LEED-certified by earning fewer points. Other LEED rating systems do have not size adjustments. This adjustment factor is called the: - ✓✓home size adjustment factor

Which level of LEED BD+C certification can a project receive by meeting all the Minimum Program Requirements (MPRs), meeting all the prerequisites except one, and additionally earning 75 points? - ✓✓cannot receive LEED certification

Which of the following strategies is not addressed by the Materials and Resources credit category? - ✓✓purchasing carbon offsets

\_\_\_\_\_ evaluates all the environmental effects of a product quantitatively for the whole lifetime of that material. - ✓✓life-cycle assessment (LCA)

## LEED-Green-Associate Torrent & Latest LEED-Green-Associate Test Dumps

It is very necessary for a lot of people to attach high importance to the LEED-Green-Associate exam. It is also known to us that passing the exam is not an easy thing for many people, so a good study method is very important for a lot of people, in addition, a suitable study tool is equally important, because the good and suitable LEED-Green-Associate reference guide can help people pass the exam in a relaxed state. We are glad to introduce the LEED-Green-Associate Certification Dumps from our company to you. We believe our study materials will be very useful and helpful for all people who are going to prepare for the LEED-Green-Associate exam. There are a lot of excellent experts and professors in our company. In the past years, these experts and professors have tried their best to design the LEED-Green-Associate exam questions for all customers.

## USGBC LEED Green Associate Exam Sample Questions (Q271-Q276):

### NEW QUESTION # 271

Open grid pavement tends to reduce

- A. parking space requirements
- B. rainwater infiltration
- C. native habitat
- D. heat island effects

**Answer: D**

### NEW QUESTION # 272

Strategically locating functional and decorative hardscape on a project site may reduce the amount of on-site

- A. waste area
- B. sensitive area
- C. impervious area
- D. pervious area

**Answer: C**

#### NEW QUESTION # 273

The Energy Policy Act of 1992 (EPAct of 1992), 2005 is a baseline standard for the credit category of

- A. Water Efficiency
- B. Indoor Environmental Quality
- **C. Energy and Atmosphere prerequisite**
- D. Sustainable Sites

**Answer: C**

Explanation:

Explanation

The Energy Policy Act of 1992 (EPAct of 1992) is a United States government act that set goals, created mandates, and amended utility laws to increase clean energy use and improve overall energy efficiency in the United States<sup>1</sup>. The EPAct of 1992 is a baseline standard for the Energy and Atmosphere prerequisite category in LEED v4, which aims to reduce the environmental and economic impacts of excessive energy use and promote the use of renewable and alternative energy sources<sup>2</sup>. The EPAct of 1992 establishes the minimum energy performance requirements for buildings, such as lighting power density, HVAC efficiency, and water heating efficiency<sup>3</sup>. The EPAct of 1992 also provides tax incentives and grants for energy conservation and renewable energy projects<sup>1</sup>. The EPAct of 1992 was amended by the Energy Policy Act of 2005, which updated some of the provisions and standards of the original act<sup>4</sup>.

#### NEW QUESTION # 274

The project area defined by the perimeter of a building plan is referred to as the building's

- A. envelope
- B. density
- C. shell
- **D. footprint**

**Answer: D**

Explanation:

Explanation

The footprint of a building is the area of ground that it covers, defined by its perimeter. It's essentially the shape that results when you trace around the outer walls of a building plan. This term is used in architecture and urban planning to describe the space that a building occupies on a site. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

#### NEW QUESTION # 275

Which of the following is a prerequisite in LEED v4 Water Efficiency category?

- A. Building-Level Energy Metering
- **B. Building-Level Water Metering**
- C. Rainwater Management
- D. Cooling Tower Water Use

**Answer: B**

Explanation:

Explanation

Building-Level Water Metering is a prerequisite in LEED v4 Water Efficiency category. Building-Level Water Metering means that the project must install permanent water meters that measure the total potable water use for the building and associated grounds. The project must also commit to sharing the water usage data with USGBC for at least five years after occupancy or certification. The LEED Green Associate Candidate Handbook states that this is one of the two prerequisites in the Water Efficiency category [1, p. 14]. References: [LEED Green Associate Candidate Handbook], [Building-Level Water Metering | U.S. Green Building Council]

#### NEW QUESTION # 276

Our products boost 3 versions and varied functions. The 3 versions include the PDF version, PC version, APP online version. You can use the version you like and which suits you most to learn our LEED Green Associate Exam test practice dump. The 3 versions support different equipment and using method and boost their own merits and functions. For example, the PC version supports the computers with Window system and can stimulate the real exam. Our products also boost multiple functions which including the self-learning, self-evaluation, statistics report, timing and stimulation functions. Each function provides their own benefits to help the clients learn the LEED-Green-Associate Exam Questions efficiently. For instance, the self-learning and self-evaluation functions can help the clients check their results of learning the LEED Green Associate Exam study question.
