

100% Pass Quiz Marvelous Oracle 1Z0-1195-25 - Oracle Data Platform 2025 Foundations Associate Reliable Test Practice

P.S. Free & New 1Z0-1195-25 dumps are available on Google Drive shared by Fast2test: <https://drive.google.com/open?id=1q3zRWSnkegFnoZch6OiJ5fETwobluJPI>

Having a good command of professional knowledge for customers related to this 1Z0-1195-25 exam is of superior condition. However, that is not certain and sure enough to successfully pass this exam. You need efficiency and exam skills as well. Actually, a great majority of exam candidates feel abstracted at this point, wondering which one is the perfect practice material they are looking for. To make things clear, we will instruct you on the traits of our 1Z0-1195-25 real materials one by one. Here we recommend our 1Z0-1195-25 guide question for your reference.

Oracle 1Z0-1195-25 Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none">Data Management Introduction: This section of the exam measures the skills of Data Architects and Cloud Database Specialists in understanding Oracle's data management strategy. It covers Oracle's database offerings, deployment options, and multi-cloud and hybrid cloud solutions for managing data using Oracle Cloud Infrastructure. |
| Topic 2 | <ul style="list-style-type: none">Converged Database: This section evaluates the expertise of Multi-Model Database Specialists and Application Developers in using Oracle's converged database for multi-model use cases. It covers JSON, graph, and spatial data capabilities within the Oracle Database. |
| Topic 3 | <ul style="list-style-type: none">Autonomous Database and Tools: This section evaluates the expertise of Database Administrators and Cloud Engineers in working with Oracle Autonomous Database (ADB). It includes provisioning ADB instances, scaling CPU and storage, starting and stopping databases, and using tools to load data into ADB effectively. |
| Topic 4 | <ul style="list-style-type: none">Exadata and DBCS: This section tests the knowledge of Exadata Specialists and Database Administrators in understanding Exadata deployment options, lifecycle management tasks such as patching and backup, and the features of Oracle Base Database Service (DOracle NoSQL Database ServiceBCS). |
| Topic 5 | <ul style="list-style-type: none">Upgrades and Migrations: This section tests the knowledge of Migration Specialists and Cloud Architects in planning cloud migrations. It includes various migration strategies to OCI, as well as upgrade options for transitioning existing databases to newer versions or cloud environments. |
| Topic 6 | <ul style="list-style-type: none">Resiliency: This section tests the knowledge of Database Security Engineers and Disaster Recovery Specialists in implementing Oracle's Maximum Security Architecture and Maximum Availability Architecture to ensure database resiliency and high availability. |

| | |
|---------|--|
| Topic 7 | <ul style="list-style-type: none"> • Data Lake, Data Warehouse, and Machine Learning: This section evaluates the expertise of Data Scientists and Big Data Engineers in understanding UCI's Data Lakehouse architecture, Oracle Machine Learning capabilities, and Data Mesh architecture for managing distributed data environments. |
| Topic 8 | <ul style="list-style-type: none"> • Developing on Oracle Database: This section measures the skills of Application Developers and DevOps Engineers in managing Autonomous Databases using REST APIs, Oracle's data toolset, low-code development with APEX, and CI • CD processes for database tools and APEX applications. |

1Z0-1195-25 Download Demo | Answers 1Z0-1195-25 Real Questions

From the Fast2test platform, you will get the perfect match 1Z0-1195-25 actual test for study. 1Z0-1195-25 practice download pdf are researched and produced by Professional Certification Experts who are constantly using industry experience to produce precise, and logical Oracle training material. 1Z0-1195-25 Study Material is constantly beginning revised and updated for relevance and accuracy. You will pass your real test with our accurate 1Z0-1195-25 practice questions and answers.

Oracle Data Platform 2025 Foundations Associate Sample Questions (Q28-Q33):

NEW QUESTION # 28

The Oracle Cloud Infrastructure (OCI) Data Catalog is an integral part of the Lakehouse solution. What level of data detail does Data Catalog provide when integrated with Autonomous Databases and Object Storage?

- A. View of data for discovery
- B. Source of managed services
- C. Analytic environments
- D. Data Warehouse

Answer: A

Explanation:

The "OCI Data Catalog" provides a "View of data for discovery" (D) when integrated with Autonomous Databases and OCI Object Storage in the Lakehouse solution. It serves as a metadata management service, offering a centralized view of data assets, their schemas, and relationships, enabling users to discover and understand data across the Lakehouse. "Analytic environments" (A) and "Data Warehouse" (B) refer to processing or storage constructs, not the role of Data Catalog. "Source of managed services" (C) is vague and not a documented function. Oracle's documentation highlights Data Catalog's role in data discovery and governance, not processing or storage.

NEW QUESTION # 29

Which feature allows you to logically group and isolate your Oracle Cloud Infrastructure resources?

- A. Availability Domain
- B. Tenancy
- C. Compartments
- D. Identity and Access Management Groups

Answer: C

Explanation:

"Compartments" (B) in Oracle Cloud Infrastructure (OCI) allow you to logically group and isolate resources for organization, access control, and billing. "Identity and Access Management Groups" (A) organize users, not resources. "Tenancy" (C) is the root container for all resources, not a grouping mechanism, and "Availability Domain" (D) is a physical data center division, not a logical grouping tool. Oracle's OCI documentation identifies Compartments as the primary feature for resource isolation and management.

NEW QUESTION # 30

Which two are true about the Data Catalog?

- A. Data Catalog does not integrate with Autonomous Database
- B. Harvest object storage to derive schemas
- C. Management is required
- D. Discover data using powerful search

Answer: B,D

Explanation:

The "OCI Data Catalog" has two true characteristics: "Harvest object storage to derive schemas" (B), as it scans OCI Object Storage to extract metadata and schemas, and "Discover data using powerful search" (C), offering robust search capabilities for data discovery. "Management is required" (A) is vague and not a defining trait, and "Data Catalog does not integrate with Autonomous Database" (D) is false, as it integrates seamlessly for metadata management. Oracle's documentation confirms these features.

NEW QUESTION # 31

How does the Converged Database help to access data using an API?

- A. Each database comes with a REST-enabled compute instance to provide access to data
- B. The database provides only one universal REST interface which makes integration of applications extremely agile
- C. Developers can point their application to the location of ADB Wallet which integrates all REST API calls
- D. A REST API is automatically generated on top of SQL or stored procedures

Answer: D

Explanation:

The "Converged Database" facilitates API access by "A REST API is automatically generated on top of SQL or stored procedures" (B), using Oracle REST Data Services (ORDS). This allows developers to expose database logic as RESTful endpoints without manual coding. Option A is incorrect, as no separate compute instance is provided. Option C oversimplifies, as multiple REST interfaces can be created, not just one. Option D misrepresents the ADB Wallet's role, which is for security, not API generation. Oracle's documentation highlights ORDS auto-generation as a converged feature.

NEW QUESTION # 32

What are two typical reasons why customers CANNOT move their database into the public cloud?

- A. Total Cost of Ownership in public cloud is higher than on-premises
- B. Putting data in the cloud would break data residency rules
- C. Regulations that prevent moving data into the public cloud
- D. Public cloud does not provide storage for more than 10TB

Answer: B,C

Explanation:

Customers may not move databases to the public cloud due to "Putting data in the cloud would break data residency rules" (A), where laws mandate data remain in specific regions, and "Regulations that prevent moving data into the public cloud" (B), such as industry-specific compliance requirements (e.g., GDPR, HIPAA). "Total Cost of Ownership in public cloud is higher" (C) is a consideration but not a universal barrier, and "Public cloud does not provide storage for more than 10TB" (D) is false, as OCI offers vast storage options. Oracle's cloud adoption guides cite residency and regulatory constraints as common blockers.

NEW QUESTION # 33

.....

The beauty of life may be that we don't know what will happen in the future, but even so, we are willing to pursue a bright future. Happiness for us may be the life we want to live, and our 1Z0-1195-25 Study Materials can provide a good foundation for you to achieve this goal. A good job requires good skills, and the most intuitive way to measure your ability is how many qualifications you

have passed and how many qualifications you have.
