Pass Guaranteed 2025 Microsoft PL-600 High Hit-Rate New Test Answers

Dumpkiller's web-based Microsoft PL-600 practice test also contains mock exams just like the desktop practice exam software with some extra features. As this is a web-based software, this is accessible through any browser like Opera, Safari, Chrome, Firefox and MS Edge with a good internet connection. Microsoft Power Platform Solution Architect (PL-600) practice test is also customizable so that you can easily set the timings and change the number of questions according to your ease.

What is the exam cost of Microsoft PL-600 Exam Certification

The exam cost of Microsoft PL-600 Certification Exam is \$165.

Microsoft Power Platform Solution Architect Sample Questions (Q135-Q140):

NEW QUESTION # 135

You need to recommend methods for assigning security to each group of users.

What should you recommend? To answer, drag the appropriate methods to the correct groups of users. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Methods	Answer Area	Group of users	Method
Dataverse Application User			
Power Platform Local Business Owner Team		Full-time employees	Method
Azure Active Directory B2B Guest Access		Automation	Method
Azure Active Directory Security Group Team		Corporate governance auditing team	Method

Answer:

Explanation:

Methods	Answer Area	Method
Dataverse Application User		
Power Platform Local Business Owner Team		Power Platform Local Business Owner Team
Azure Active Directory B2B Guest Access		Azure Active Directory Security Group Team
Azure Active Directory Security Group Team		Azure Active Directory B2B Guest Access

NEW QUESTION # 136

Case Study 2 - Relecloud

Background

Relecloud provides regional air service in North America. The company uses a variety of systems, apps, and services to manage the business. You are hired to design a new solution to manage passenger information, reservations, and maintenance.

Current environment

The company uses Microsoft Office 365.

The company has a custom app for managing and tracking passenger luggage. The app uses Microsoft Dataverse.

For flights longer than four hours, passengers receive a meal. Customers can select a meal when they make a reservation and can save the meal choices as a customer preference.

The company offers two types of meals: standard and vegetarian. Meal types can be temporarily unavailable. The airline is considering offering other meal types, such as gluten-free and low- sodium options.

The company uses paper-based reservation checklists to help ensure that all the steps for a reservation are complete.

The company uses vendors to service aircraft.

Environment

Ensure that employees can sign in to all Microsoft apps by using one set of credentials per employee.

Minimize the use of third-party products and custom development.

Reduce customer support call volumes by having the system automatically resolve common issues.

The security rule for agents must contain the privileges in the default Customer Service Representative security role.

Log issues as cases. The case form must show variable sections based on the case type.

Include a custom entity named Seats and grant agents access to the entity.

Application use layout should be role specific.

Agents

You must standardize the format used by agents to enter customer phone numbers.

Agents need a solution to replace paper reservation checklists.

Agents need dashboards to show a current count of all reservations on the entity.

Agents need a way to track reservation issues.

Agents need a visual indicator in the interface to determine the reservation step to provide a seamless customer experience. Agents need different versions of cancellation policies to send customers. One version must be controllable within the system. Agents need to view which pieces of luggage match to each passenger, and then need to add the total on the passenger record.

IT

IT staff needs a mobile solution to see IT cases at the top of the menu since this is their primary focus.

IT staff needs a system that is easy to navigate to active cases.

IT specialists want to design Power BI reports. They need to understand the underlying table relationships of the system.

IT specialists need a solution that is visual rather than text-based so they can quickly complete their tasks.

Management

Management requires paginated reports for stakeholders.

Management wants to provide frequent flyers with better service when the flyers call.

Managers need to see all customer dashboards at the top of their menu on their mobile device.

Maintenance

Maintenance supervisors must not have access to Dynamics 365 Customer Service. The supervisors must be able to communicate with the contracts team about contracts.

Aircraft maintenance vendors must have only view and upload privileges to their invoices and receipts.

Contracts with maintenance companies must be stored in Dynamics 365 Customer Service.

You need to recommend a solution for agents when working with customers to make reservations.

What should you recommend?

- A. task flows
- B. workflows
- C. Power Automate
- D. **Business Process Flows**

Answer: D

Explanation:

Business process flows provide a guide for people to get work done. They provide a streamlined user experience that leads people through the processes their organization has defined for interactions that need to be advanced to a conclusion of some kind.

Use business process flows to define a set of steps for people to follow to take them to a desired outcome.

With business processes flows available as an entity, you can now use advanced finds, views, charts, and dashboards sourced from business process flow data for a given entity, such as a lead or opportunity.

Scenario:

Agents need a solution to replace paper reservation checklists.

Agents need dashboards to show a current count of all reservations on the entity.

Agents need a way to track reservation issues.

Agents need a visual indicator in the interface to determine the reservation step to provide a seamless customer experience.

NEW QUESTION # 137

A company plans to deploy multiple Microsoft Dataverse environments. You are supporting the go-live process.

The company reports the following access issues:

- * Users can access account records but cannot read a column in the table.
- * A licensed user receives an insufficient permission error when opening leads.
- * A licensed user does not appear in the list of users available for security assignment.

You need to resolve the issues.

What should you do? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Answer Area**Microsoft**

Issue

Users can access account records but cannot read a column in the table.

Action

Security role
Security group
Field security profile

A licensed user receives an insufficient permission error when opening leads.

Security role
Security group
Field security profile

A licensed user does not appear in the list of users available for security assignment.

Security role
Security group
Field security profile

Answer:**Explanation:****Answer Area****Issue**

Users can access account records but cannot read a column in the table.

Action

Security role
Security group
Field security profile

A licensed user receives an insufficient permission error when opening leads.

Security role
Security group
Field security profile

A licensed user does not appear in the list of users available for security assignment.

Security role
Security group
Field security profile

NEW QUESTION # 138

You are supporting a recent go-live for a model-driven app that includes mobile offline functionality.

Users report the following issues:

- * The process of downloading initial metadata for the app takes hours to complete.
- * Some account views are unavailable when the app is offline.
- * Changes to users' security privileges are not reflected in the mobile app.
- * Contact data is not available when the app is offline.

You need to resolve the mobile app performance issues.

What should you review? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Resolution
The process of downloading initial metadata for the app takes hours to complete.	Synchronize the mobile app. Remove organization data filters. Reduce records included in the profile filter.
Changes to users' security privileges are not reflected in the mobile app.	Synchronize the mobile app. Reduce records included in the profile filter. Remove reference to tables not included in mobile profile.
Some account views are unavailable when the app is offline.	Synchronize the mobile app. Reduce records included in the profile filter. Remove reference to tables not included in mobile profile.
Contact data is not available when the app is offline.	Reduce records included in the profile filter. Update mobile profile to include contact information. Remove reference to tables not included in mobile profile.

Answer:

Explanation:

Issue	Resolution
The process of downloading initial metadata for the app takes hours to complete.	Synchronize the mobile app. Remove organization data filters. Reduce records included in the profile filter.
Changes to users' security privileges are not reflected in the mobile app.	Synchronize the mobile app. Reduce records included in the profile filter. Remove reference to tables not included in mobile profile.
Some account views are unavailable when the app is offline.	Synchronize the mobile app. Reduce records included in the profile filter. Remove reference to tables not included in mobile profile.
Contact data is not available when the app is offline.	Reduce records included in the profile filter. Update mobile profile to include contact information. Remove reference to tables not included in mobile profile.

Explanation:

Issue	Microsoft	Resolution
The process of downloading initial metadata for the app takes hours to complete.		<ul style="list-style-type: none"> Synchronize the mobile app. Remove organization data filters. Reduce records included in the profile filter.
Changes to users' security privileges are not reflected in the mobile app.		<ul style="list-style-type: none"> Synchronize the mobile app. Reduce records included in the profile filter. Remove reference to tables not included in mobile profile.
Some account views are unavailable when the app is offline.		<ul style="list-style-type: none"> Synchronize the mobile app. Reduce records included in the profile filter. Remove reference to tables not included in mobile profile.
Contact data is not available when the app is offline.		<ul style="list-style-type: none"> Reduce records included in the profile filter. Update mobile profile to include contact information. Remove reference to tables not included in mobile profile.

NEW QUESTION # 139

You need to recommend methods to resolve the organization's issues.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Microsoft	Resolution method
Users cannot see Power BI reports.		<ul style="list-style-type: none"> Add users to Microsoft 365. Assign Power BI licenses to users. Configure an on-premises data gateway.
Historical data does not appear in reports.		<ul style="list-style-type: none"> Configure Azure Data Lake. Configure a custom connector. Configure an on-premises data gateway.

Answer:

Explanation:

Issue	Resolution method
Users cannot see Power BI reports.	 <div data-bbox="806 309 1409 444"> <ul style="list-style-type: none"> Add users to Microsoft 365. Assign Power BI licenses to users. Configure an on-premises data gateway. </div>
Historical data does not appear in reports.	<div data-bbox="806 512 1409 673"> <ul style="list-style-type: none"> Configure Azure Data Lake. Configure a custom connector. Configure an on-premises data gateway. </div>

Explanation:

Issue	Resolution method
Users cannot see Power BI reports.	<div data-bbox="806 911 1409 1046"> <ul style="list-style-type: none"> Add users to Microsoft 365. Assign Power BI licenses to users. Configure an on-premises data gateway. </div>
Historical data does not appear in reports.	<div data-bbox="806 1125 1409 1264"> <ul style="list-style-type: none"> Configure Azure Data Lake. Configure a custom connector. Configure an on-premises data gateway. </div>

Box 1: Add users to Microsoft 365.

Scenario: Users cannot view Power BI reports within the Power Platform apps.

Issue: The people you share with may see a locked tile in a dashboard, or a "Permission required" message when they try to view a report.

Solution: You need to grant them permission to the underlying dataset.

- * Go to the All or the Datasets + dataflows tab in your content list.
- * Select More options (...) next to a dataset, then select Manage permissions.
- * Select Add user.
- * Enter the full email addresses for individuals, distribution groups, or security groups.
- * Select Grant access.

Box 2: Configure an on-premises data gateway.

Scenario: The company plans to reference historical data in the [on-premises] existing system. The records held in these systems will not be migrated to the new solution except for medication information.

The on-premises data gateway acts as a bridge to provide quick and secure data transfer between on-premises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, PowerApps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services.
