Don't waste much more time on preparing for a test. Hurry to purchase Dumpcollection Oracle 1z0-1118-23 certification training dumps. With the exam dumps, you will know how to effectively prepare for your exam. This is precious tool that can let you sail through 1z0-1118-23 test with no mistakes. Missing the chance, I am sure you must regret it. Thus, don't hesitate and act quickly.

Oracle 1z0-1118-23 Exam Syllabus Topics:

Topic	Details
Topic 1	• Describe Oracle Fusion Analytic Cloud Solutions • Oracle Fusion Analytics Warehouse
Topic 2	• FAW - Administrations and Maintenance • Bulk uploads and tools for rapid deployment

Topic 3	• User Experience Customization • Upgrade and Release Management (Beta) • Semantic Model Customization
Topic 4	• Fusion Application prerequisites • FAW - Pre-requisites before Provisioning instance
Topic 5	• Migrate model from test to production • Manage incremental uploads from Fusion Application

Hot Examcollection 1z0-1118-23 Dumps Torrent & 100% Pass-Rate Flexible 1z0-1118-23 Testing Engine & Useful Study 1z0-1118-23 Test

Dumpcollection is a website to achieve dreams of many IT people. Dumpcollection provide candidates participating in the IT certification exams the information they want to help them pass the exam. Do you still worry about passing Oracle certification 1z0-1118-23 exam? Have you thought about purchasing an Oracle certification 1z0-1118-23 exam counseling sessions to assist you? Dumpcollection can provide you with this convenience. Dumpcollection's training materials can help you pass the certification exam. Dumpcollection's exercises are almost similar to real exams. With Dumpcollection's accurate Oracle Certification 1z0-1118-23 Exam practice questions and answers, you can pass Oracle certification 1z0-1118-23 exam with a high score.

Oracle Cloud Fusion Analytics Warehouse 2023 Implementation Professional Sample Questions (Q31-Q36):

NEW QUESTION # 31
Which data sources are available for Data Augmentation?

- A. The Oracle Fusion Application transactional database
- B. The same data sources as OAC connectors
- C. Fusion Applications and additional data connections available in FAW

Answer: C

Explanation:
Explanation
The data sources that are available for Data Augmentation are Fusion Applications and additional data connections that are available in FAW. You can use Manage Connections to create connections to various data sources, such as Oracle Database, Oracle Autonomous Database, Oracle Object Storage, Oracle Applications Cloud, and others4. You can then use Data Augmentation to select the columns from these data sources and create datasets for analysis

NEW QUESTION # 32
You have reviewed out-of-the-box data security through the configuration of context assignment.You need to create custom data security to meet your data security requirements.
Which FAW settings provide this functionality?

- A. You need to modify the Data Security Assignment file with the values you want for the users.
- B. A combination of steps in Security Console and the Security Configurations in the Semantic Model Extensions available at the FAW Console provides this functionality.
- C. The Security Configurations available in the Semantic Model Extensions through the FAW Console provide this functionality

Answer: B

Explanation:
Explanation

To create custom data security to meet your data security requirements, you need a combination of steps in Security Console and the Security Configurations in the Semantic Model Extensions available at the FAW Console. The Security Console allows you to create custom data roles and assign them to users or groups5. The Security Configurations allow you to define custom security filters and apply them to dimensions, facts, or subject areas6. You do not need to use only the Security Configurations or modify the Data Security Assignment file for this purpose.

NEW QUESTION # 33

You are unable to locate some data elements in your FAW instance subject areas that exist in OTBI.
Which feature in FAW supports both data movement and semantic model extensibility to provide the missing data elements?

- A. Data Augmentation
- B. Bundles
- C. OAC Data Flow

Answer: A

Explanation:
Explanation
Data Augmentation is a feature in FAW that supports both data movement and semantic model extensibility to provide missing data elements. Data Augmentation allows you to extract data from additional data sources that are not part of the FAW data pipeline and load them into ADW. You can then use the data to customize the semantic model and create new dimensions, facts, and subject areas2

NEW QUESTION # 34

In the FAW Security framework, which mapping paradigm best describes the mapping ofSecurity Content to Data Roles?

- A. Security Context to Data Role is many-to-many
- B. Security Context to Data Role is one-to-many
- C. Security Context to Data Role is one-to-one

Answer: A

Explanation:
Explanation
The FAW Security framework allows a flexible and extensible mapping of Security Content to Data Roles. A Security Content is a predefined attribute that defines the boundaries of data access for a given subject area, such as Business Unit, Country, Department, Job Family, Legal Entity, and Worker Type. A Data Role is a custom role that grants access to specific subsets of data in the data warehouse based on the Security Content.
A Security Content can be mapped to multiple Data Roles, and a Data Role can have multiple Security Content associated with it. For example, a Security Content of Country = US can be mapped to a Data Role of US HR Manager, and a Data Role of US HR Manager can have multiple Security Content such as Country = US, Business Unit = Sales, and Department = Marketing.
Verified References: Reference for Fusion HCM Analytics, page 9-10.

NEW QUESTION # 35

You have created a fact, a dimension, and a new subject area using Data Augmentation.
You want to extend the dimension m your newly created subject area by adding new attribute data source.
What steps are required to achieve this?

- A. The only available option is to modify your ADW custom schema and your Data Augmentation.
- B. The dimensions created in Data Augmentation are not available in Semantic Model Extensions.
- C. Create a branch and add "Extend a Dimension".

Answer: C

Explanation:
Explanation
You can extend the dimension that you created using Data Augmentation by using Semantic Model Extensions. You need to create a branch and add a step of "Extend a Dimension". Youcan then select the dimension that you want to extend and add a new attribute

data source from another table or view

NEW QUESTION # 36
