Delays in supplier self-service registration can be frustrating. In your implementation, there are some regions where you want to

simplify supplier self-service registration and bypass mandatory supplier identifiers.
Which task should you use to set this up?

- A. Manage Supplier Profile Options
- B. Manage Self Service Procurement Profile Options
- C. Manage Internal Supplier Registration Approvals
- D. Manage Supplier Profile Change Request
- E. Configure Supplier Registration and Profile Change Request

Answer: E

Explanation:

To simplify supplier self-service registration and bypass mandatory supplier identifiers for some regions, you should use the Configure Supplier Registration and Profile Change Request task in the Setup and Maintenance work area. This task allows you to define the registration settings for prospective and spend authorized suppliers, such as the required attributes, the approval rules, and the site assignments. You can also specify the supplier identifiers that are mandatory or optional for each country or region. For example, you can make the tax registration number optional for suppliers in a region where it is not commonly used.
