- B. Push the Device Group first, then push Template to the newly managed firewall
- C. Ensure Force Template Values is checked when pushing configuration.
- D. Push the Template first, then push Device Group to the newly managed firewall.

Answer: A

Explanation:

Explanation

When importing a pre-configured firewall configuration to Panorama, you need to perform the following steps

12:

Add the serial number of the firewall under Panorama > Managed Devices

In Panorama, import the firewall's configuration bundle under Panorama > Setup > Operations > Import device configuration to Panorama Make changes to the imported firewall configuration within Panorama Commit the changes you made to Panorama Perform an Export or push Device Config Bundle operation under Panorama > Setup > Operations The Export or push Device Config Bundle operation allows you to push a complete configuration bundle from Panorama to a managed firewall without duplicating local configurations . This operation ensures that any local settings on the firewall are preserved and merged with the settings from Panorama.
