SAP Certified Associate - Database Administrator - SAP HANA Sample Questions (Q36-Q41):

NEW QUESTION # 36

In which situations can you resume the failed recovery of your productive SAP HANA tenant database? Note: There are 2 correct answers to this question.

- A. An aborted recovery of the catalog backup
- B. An aborted recovery of a complete data backup
- C. An aborted recovery of a delta data backup
- D. An aborted recovery of a log backup

Answer: C,D

Explanation:

You can resume the failed recovery of your productive SAP HANA tenant database in the following situations:

* An aborted recovery of a delta data backup: Resuming from a delta backup is possible because these backups capture changes since the last full or another delta backup, allowing the recovery process to continue from the last successful point.

* An aborted recovery of a log backup: Log backups contain all the transactions since the last log or data backup. If the recovery from these backups is interrupted, it can be resumed because the log contains all necessary information to bring the database to a consistent state up to the point of failure.

References=SAP HANA backup and recovery documentation explains the mechanisms and capabilities of the database's recovery features, including scenarios where recovery processes can be resumed after interruption.

Backup and Recovery

NEW QUESTION # 37

Which privilege types are available in SAP HANA Cloud? Note: There are 3 correct answers to this question.

- A. System
- B. Package
- C. Application
- D. Object
- E. Analytic

Answer: A,D,E

NEW QUESTION # 38

What possibilities do you have when upgrading an SAP HANA Cloud, SAP HANA database instance? Note: There are 2 correct answers to this question.

- A. Select the version to
- B. Revert to a previous version
- C. install Upgrade without restart
- D. Upgrade the replica first

Answer: A,D

Explanation:

When upgrading an SAP HANA Cloud, SAP HANA database instance, the possibilities include: A. Upgrade the replica first, which involves applying the upgrade to a secondary replica or system to minimize downtime and risk to the primary system during the upgrade process. B. Select the version to install, providing flexibility in managing the upgrade path and aligning with specific business and system requirements for the version compatibility. Upgrading without restart and reverting to a previous version are not typically supported operations in SAP HANA Cloud, as these actions involve complexities that current technologies and strategies aim to manage differently. References= SAP HANA Cloud administration guide, detailing procedures and options for upgrading database instances within the cloud environment.

SAP HANA Architecture

NEW QUESTION # 39

How long are SAP HANA Cloud, SAP HANA database backups retained by default?

- A. 2 weeks

- B. 1 week
- C. 3 weeks
- D. 4 weeks

Answer: A

NEW QUESTION # 40

Which output channels can the SAP Alert Notification service for SAP BTP use for notification actions? Note:
There are 2 correct answers to this question.

- **A. Microsoft Teams**
- B. WhatsApp
- **C. Slack**
- D. Signal

Answer: A,C

Explanation:

The SAP Alert Notification service for SAP Business Technology Platform (BTP) can use various output channels for notification actions, including Slack and Microsoft Teams. These platforms are commonly used in enterprise environments for communication and collaboration, making them practical choices for receiving notifications about system alerts, thereby ensuring prompt attention to potential issues or operational updates. References= SAP BTP Alert Notification service documentation.
Monitoring and Troubleshooting

NEW QUESTION # 41

.....
