We offer you free update for 356 days for PRINCE2-Agile-Foundation training materials and the update version will be sent to your email automatically.

PRINCE2 Agile Foundation Sample Questions (Q68-Q73):

NEW QUESTION # 68

Which statement about the 'protect the level of quality' target is CORRECT?

- A. It avoids the use of extra people to improve progress during a timebox
- B. It allows change at the detailed level to be handled dynamically

- C. It is unlikely to be achieved if incomplete user documentation is provided
- D. It is achieved by ensuring that all features are delivered

Answer: D

NEW QUESTION # 69

Which artifact identifies risks associated with using an iterative project management approach?

- A. Risk management approach
- B. Agilometer
- C. Definition of Done
- D. Project backlog

Answer: B

Explanation:

The Agilometer is a diagnostic tool used within PRINCE2 Agile to assess the agility maturity and identify risks associated with adopting or operating in an iterative and agile environment. It helps teams and organizations evaluate their current agile capabilities, cultural readiness, and potential challenges that may impact project delivery.

The Agilometer highlights risk areas such as resistance to change, lack of agile skills, unclear roles, or insufficient governance adaptation. By providing a structured assessment, it enables proactive risk management and targeted improvements to reduce uncertainties inherent in iterative approaches.

Other artifacts like the project backlog (A) track requirements, the risk management approach (C) defines the method of managing risks but does not specifically identify iterative risks, and the Definition of Done (D) clarifies completion criteria rather than risks.

The Agilometer supports continuous improvement and risk mitigation aligned with PRINCE2's risk and quality practices, ensuring agile projects remain viable and controlled.

NEW QUESTION # 71

How should team working agreements be created?

- A. By the customer representative deciding what should be included
- B. By team members agreeing on what should be included
- C. By the project manager deciding what should be included
- D. By the supplier subject matter expert agreeing what should be included

Answer: B

NEW QUESTION # 72

Which is typically used in agile when estimating detailed requirements during sprint planning?

- A. Trading
- B. T-shirt sizing
- C. Visioning
- **D. Rationalism**

Answer: D
