

100% Pass Quiz Professional Huawei - H19-301_V4.0 - Test HCSA-Presales-IP Network V4.0 Testking

What's more, part of that Actual4Labs H19-301_V4.0 dumps now are free: <https://drive.google.com/open?id=1pZDUYUu2JdX9d0iO2yfc3fhVB60NdXkF>

When you are studying for the H19-301_V4.0 exam, maybe you are busy to go to work, for your family and so on. How to cost the less time to reach the goal? It's a critical question for you. Time is precious for everyone to do the efficient job. If you want to get good H19-301_V4.0 prep guide, it must be spending less time to pass it. Exactly, our product is elaborately composed with major questions and answers. If your privacy let out from us, we believe you won't believe us at all. That's uneconomical for us. In the website security, we are doing well not only in the purchase environment but also the H19-301_V4.0 Exam Torrent customers' privacy protection. We are seeking the long development for H19-301_V4.0 prep guide.

We offer you H19-301_V4.0 questions and answers for you to practice, the H19-301_V4.0 exam dumps are of high quality. The soft test exam will offer you realest environment for you, so you can know the detailed information of the exam, it will help you have a deeper understanding of e exam. You confidence will also be set up through the practicing of H19-301_V4.0 Questions and answers, a good mental state will help you to exert the ability you should have.

Huawei H19-301_V4.0 Books PDF, H19-301_V4.0 Exam Pass4sure

We at Actual4Labs give you the techniques and resources to make sure you get the most out of your exam study. We provide preparation material for the HCSA-Presales-IP Network V4.0 exam that will guide you when you sit to study for it. H19-301_V4.0 updated questions give you enough confidence to sit for the Huawei exam. If you take enough practice tests on H19-301_V4.0 Practice Exam software by Actual4Labs, you'll be more comfortable when you walk in on Huawei exam day. So, go with H19-301_V4.0 exam questions that are prepared under the supervision of industry experts to expand your knowledge base and successfully pass the certification exam on the first attempt.

Huawei HCSA-Presales-IP Network V4.0 Sample Questions (Q97-Q102):

NEW QUESTION # 97

VXLAN uses MAC-in-UDP encapsulation to extend Layer 2 networks. It encapsulates Ethernet frames into IP packets for routing without considering the MAC addresses of VMs. In addition, routed networks are not limited by the network architecture and support large-scale scalability. VM migration through routed networks is also not limited by the network architecture.

- A. True
- B. False

Answer: A

Explanation:

VXLAN (Virtual Extensible LAN) technology uses MAC-in-UDP encapsulation to extend Layer 2 networks over Layer 3 networks.

It encapsulates the original Ethernet frame into a UDP packet, allowing it to traverse an IP network.

VXLAN decouples the logical network from the underlying physical network, meaning MAC addresses of VMs are encapsulated and do not affect the routing of packets across the IP underlay.

VXLAN supports large-scale network expansion with up to 16 million VXLAN segments (compared to 4096 VLANs).

Furthermore, because VXLAN uses a routed underlay network, VM migration is not restricted by Layer 2 boundaries.

NEW QUESTION # 98

Huawei implements "1-3-5" troubleshooting based on knowledge graphs, ensuring 24/7 online service, proactive O&M, and minute-level identification and locating of 90% faults.

- A. True
- B. False

Answer: A

Explanation:

Huawei's "1-3-5" troubleshooting model, powered by knowledge graphs and AI-driven analysis, enables:

1-minute fault detection

3-minute root cause analysis

5-minute fault resolution or demarcation

This mechanism is part of Huawei's iMaster NCE-based intelligent O&M system, ensuring 24/7 online service, proactive monitoring, and over 90% fault identification accuracy within minutes.

NEW QUESTION # 99

In the scenario where the controller and analyzer are deployed together, which of the following functions is not supported?

- A. MDC
- B. Multi-cloud simulation
- C. ERSPAN
- D. IFIT

Answer: B

Explanation:

When iMaster NCE (controller) and the analyzer are deployed on a single node (combined deployment), certain advanced functions are limited or unavailable due to resource constraints:

A: ERSPAN, C: MDC (Multi-Domain Control), and D: IFIT (In-situ Flow Information Telemetry) are still supported in basic or partial forms.

B: Multi-cloud simulation is a resource-intensive feature that requires independent, dedicated controller and simulation nodes for cloud interconnection emulation, and is not supported in combined deployments.

NEW QUESTION # 100

Which of the following is not a technical field of campus networks?

- A. SD-WAN
- B. Wired LAN (switching network)
- C. Wireless LAN (WLAN)

- **D. WAN**

Answer: D

Explanation:

Huawei defines the core technical fields of campus networks as:

WLAN (Wireless LAN)

Wired LAN (Switching Network)

SD-WAN, when used for branch interconnection within enterprise campuses

WAN, on the other hand, is a broader carrier-class infrastructure and not specifically categorized as a campus network technology. It refers to long-distance, backbone, or ISP-level connectivity beyond the scope of typical enterprise campus deployments.

NEW QUESTION # 101

Which of the following technologies can improve the reliability of firewalls?

- A. Security
- **B. NAT HRP**
- C. VLAN
- D. policies

Answer: B

Explanation:

NAT HRP (Hot Standby High Reliability Protocol) is used in Huawei firewalls to synchronize NAT sessions and state information between the active and standby firewalls. This enables seamless failover without session interruption, thereby improving the reliability of the firewall deployment.

A: VLAN is used for logical segmentation

B: Security is a broad concept, not a specific technology

C: Policies govern traffic handling but don't impact hardware reliability directly
