MuleSoft-Integration-Associate Actual Exam & MuleSoft-Integration-Associate Latest Braindumps Sheet

In the era of informational globalization, the world has witnessed climax of science and technology development, and has enjoyed the prosperity of various scientific blooms. In 21st century, every country had entered the period of talent competition, therefore, we must begin to extend our MuleSoft-Integration-Associate personal skills, only by this can we become the pioneer among our competitors. We here tell you that there is no need to worry about. Our MuleSoft-Integration-Associate Actual Questions are updated in a high speed. Since the date you pay successfully, you will enjoy the MuleSoft-Integration-Associate test guide freely for one year, which can save your time and money. We will send you the latest MuleSoft-Integration-Associate study dumps through your email, so please check your email then.

Salesforce Certified MuleSoft Integration Associate Exam Sample Questions (Q17-Q22):

NEW QUESTION # 17

What are two reasons why a typical MuleSoft customer favors a MuleSoft-hosted AnypointPlatform runtime plane over a customer-hosted runtime for its Mule application deployments? (Choose two.)

- A. Reduced IT operations effort
- B. increased application isolation
- C. Increased application throughput
- D. Reduced application latency
- E. Reduced time-to-market for the first application

Answer: A,E

Explanation:

Choosing a MuleSoft-hosted Anypoint Platform runtime plane offers several advantages, particularly in terms of deployment efficiency and operational management. Here's a detailed explanation of the selected reasons:

* Reduced Time-to-Market for the First Application:

* Pre-Configured Environment: MuleSoft-hosted Anypoint Platform provides a ready-to-use environment, which accelerates the deployment process.

* Ease of Use: Developers can quickly set up and deploy applications without the need for extensive infrastructure setup and configuration.

* Reduced IT Operations Effort:

* Managed Services: MuleSoft handles the infrastructure management, including updates, scaling, and maintenance, reducing the operational burden on the IT team.

* Focus on Development: IT teams can focus on developing and optimizing applications rather than managing runtime environments.

* Benefits of MuleSoft-Hosted Runtime: CloudHub Advantages

NEW QUESTION # 18

According to MuleSoft which principle is common to both Service Oriented Architecture (SOA) and API-led connectivity approaches*?

- A. Service reusability
- B. Service centralization
- C. Service statefulness
- D. Service interdependence

Answer: A

Explanation:

Both Service-Oriented Architecture (SOA) and API-led connectivity emphasize the principle of service reusability. Here's a detailed explanation:

* Service Reusability:

* Definition: Service reusability is the principle where services are designed to be reusable across different applications and use cases.

* SOA: In SOA, services are modular components that can be reused in various business processes, reducing redundancy and promoting efficient service composition.

* API-led Connectivity: This approach also stresses creating reusable APIs (System APIs, Process APIs, Experience APIs) that can be leveraged across multiple projects and applications.

* Benefits:

* Efficiency: Reduces development time and effort by reusing existing services.

* Consistency: Ensures consistency in business logic and data access across different applications.

* Scalability: Facilitates scaling by using standardized and reusable services/APIs.

References

* MuleSoft Documentation: SOA vs. API-led Connectivity

* Service Reusability: Principles of Service Reusability

NEW QUESTION # 19

Which productivity advantage does Anypoint Platform have to both implement and manage an API?

- A. Automatic API specification generation
- B. Automatic API governance
- C. Automatic API semantic versioning
- D. Automatic API proxy generation

Answer: D

Explanation:

Anypoint Platform, MuleSoft's unified platform for API design and integration, offers several productivity advantages for both implementing and managing APIs. Among these features, automatic API proxy generation is particularly beneficial. Here's a step-by-step explanation:

* API Implementation:

* Design Center: In the Design Center, users can create API specifications using RAML or OAS.

This environment provides tools to design and document APIs effectively.

* Exchange: After defining the API, it can be published to Anypoint Exchange where it can be shared and discovered by others within the organization.

* Automatic API Proxy Generation:

* When an API is published to Exchange, Anypoint Platform allows for the automatic creation of an API proxy. An API proxy acts as a facade for your backend API, providing a layer of abstraction and security.

* Advantages:

* Security: Protects backend services by exposing only necessary endpoints and handling authentication, authorization, and rate limiting.

* Traffic Management: Helps in managing traffic through throttling and caching.

* Monitoring: Facilitates monitoring and logging to track API usage and performance.

* This automation saves time and reduces the complexity of manual proxy setup, allowing developers to focus on core business logic.

* API Management:

* API Manager: Provides a dashboard to manage API policies, versions, and SLA tiers. Users can apply security policies, monitor traffic, and analyze API usage.

* Monitoring: Integrated with Anypoint Monitoring, users get insights into API performance and health, enabling proactive management.

References

* MuleSoft Documentation: API Proxies

* MuleSoft Anypoint Platform Overview: Anypoint Platform

NEW QUESTION # 20

A key CI/CD capability of any enterprise solution is a testing framework to write and run repeatable tests. Which component of Anypoint Platform provides the test automation capabilities for customers to use in their pipelines?

- A. Mule Maven Plugin
- B. Anypoint CLI
- **C. MUnit**
- D. Exchange Mocking Service

Answer: C

Explanation:

A robust CI/CD pipeline requires automated testing to ensure code quality and functionality. MuleSoft's MUnit provides this capability for Mule applications. Here's a detailed explanation:

* MUnit:

* Purpose: MUnit is MuleSoft's testing framework for creating automated tests for Mule applications.

* Capabilities:

* Unit Tests: Write unit tests to validate the behavior of individual components and flows.

* Integration Tests: Test interactions between multiple components and external systems.

* CI/CD Integration:

* Automation: Integrate MUnit tests into CI/CD pipelines using tools like Jenkins, GitLab CI, or Bamboo.

* Repeatable Tests: Ensures that tests are executed consistently with each code change, catching issues early in the development process.

* Pipeline Execution:

* Build and Test: The pipeline automatically runs MUnit tests during the build process, providing immediate feedback on the code changes.

* Quality Assurance: Helps maintain high code quality and reduces the risk of defects in production.

References

* MuleSoft Documentation: MUnit

* CI/CD Best Practices: MuleSoft CI/CD

NEW QUESTION # 21

A system administrator needs to determine when permissions were last changed for an Anypoint Platform user. Which Anypoint Platform component should the administrator use to obtain this information?

- A. Mule Stack Traces
- **B. Audit Logging**
- C. Anypoint Monitoring
- D. Anypoint Studio

Answer: B

NEW QUESTION # 22

.....

Our MuleSoft-Integration-Associate exam questions are so popular among the candidates not only because that the quality of the MuleSoft-Integration-Associate study braidumps is the best in the market. But also because that our after-sales service can be the most attractive project in our MuleSoft-Integration-Associate Preparation questions. We have free online service which means that if you have any trouble, we can provide help for you remotely in the shortest time. And we will give you the best advices on the MuleSoft-Integration-Associate practice engine.
