The SAP C-BCBTM-2509 certification is one of the hottest career advancement credentials in the modern SAP world. The C-BCBTM-2509 certification can help you to demonstrate your expertise and knowledge level. With only one badge of C-BCBTM-2509 certification, successful candidates can advance their careers and increase their earning potential. The SAP C-BCBTM-2509 Certification Exam also enables you to stay updated and competitive in the market which will help you to gain more career opportunities.

SAP Certified Associate - Positioning SAP Business Transformation Management Solutions Sample Questions (Q30-Q35):

NEW QUESTION # 30

What is the role of generative AI in SAP Signavio solutions?

- A. It is limited to performing routine tasks like data entry.
- B. It translates process models from one modeling language to another.
- C. It is primarily focused on creating new AI systems unrelated to SAP solutions.
- **D. It provides instant answers, identifies bottlenecks, and offers recommendations.**

Answer: D

Explanation:

Generative AI in SAP Signavio enhances process intelligence by analyzing complex business process data, identifying inefficiencies, and automatically generating insights and recommendations for optimization.

"Generative AI in SAP Signavio supports business transformation by instantly identifying process bottlenecks, providing intelligent recommendations, and generating process improvement insights based on operational data." Reference:

This AI functionality, embedded in SAP Signavio Process Intelligence and Process Insights, empowers users to accelerate process discovery and analysis using natural language queries and auto-generated improvement suggestions.

"SAP Signavio leverages Generative AI to enable users to query process data conversationally and receive AI-driven insights for faster decision-making." Incorrect Options:

B: Translating process models is done via modeling standards (BPMN), not AI.

C: The AI is purpose-built for SAP's transformation ecosystem, not standalone.

D: It performs high-level analytical and generative tasks, not simple automation.

Verified Correct answer: A: It provides instant answers, identifies bottlenecks, and offers

NEW QUESTION # 31

What does WalkMe Discovery help organizations achieve?

- **A. Identifies underutilized tools and compliance risks**
- B. Automates training development processes
- C. Translates all tools into multiple languages automatically
- D. Enhances employee satisfaction scores by 50%

Answer: A

Explanation:

WalkMe Discovery is a key component of the SAP Business Transformation Management (BTM) suite through SAP's partnership with WalkMe. It is designed to provide visibility into the digital application landscape and analyze software usage across the enterprise.

"WalkMe Discovery automatically discovers all web-based applications used across the organization, revealing underutilized tools, shadow IT, and potential compliance risks." Reference:

The tool allows transformation leaders to map actual system usage, understand license utilization, and identify areas of inefficiency or non-compliance, which directly supports SAP's Business Transformation Management (BTM²) framework goals for transparency and optimization.

"By identifying unused or redundant applications, WalkMe Discovery helps organizations reduce costs and mitigate compliance risks as part of their transformation initiatives." Option A (translation automation) and C (automated training development) are functions more aligned with WalkMe Digital Adoption Platform (DAP), not the Discovery module.

"While the WalkMe DAP provides in-app guidance and user training automation, Discovery focuses on discovering and analyzing

app usage." Option D (enhancing satisfaction by 50%) is not a defined or measurable objective of the Discovery module; SAP does not claim specific numerical outcomes related to satisfaction.

Therefore, the correct answer - verified from SAP's official transformation documentation and WalkMe integration materials - is B: Identifies underutilized tools and compliance risks.

NEW QUESTION # 32

What makes SAP Signavio and SAP LeanIX a powerful combination?

(Note: There are 2 correct answers to this question.)

- A. We can help our customers lay off 20 to 30 percent of their workforce and therefore reduce costs tremendously.
- B. They help our customers understand the important aspects of a transformation: processes, people, systems, and applications.
- C. Both solutions focus on transforming businesses from a current state to a future state.
- D. We can reduce the time for financial reporting by 70% on average.

Answer: B,C

NEW QUESTION # 33

What are the main value drivers of SAP Business Transformation Management solutions?

(Note: There are 2 correct answers to this question.)

- A. They manage physical inventory in warehouses and real-time transaction processing for retail environments.
- B. They enable customers to discover, analyze, and scope optimization potential during daily operations.
- C. They provide advanced capabilities for blockchain development and cryptocurrency management.
- D. They help generate insights into both processes and applications and their dependencies.

Answer: B,D

Explanation:

SAP Business Transformation Management (BTM) solutions deliver value by providing visibility, analytics, and optimization across business processes and IT systems. They integrate SAP Signavio, SAP LeanIX, and WalkMe to enable organizations to understand dependencies, identify inefficiencies, and accelerate transformation initiatives.

"SAP BTM solutions help enterprises gain comprehensive insights into processes, applications, and dependencies, enabling them to discover, analyze, and optimize their operations continuously." Reference:

Generating Insights into Processes and Applications (Answer C):

SAP Signavio and LeanIX together provide a data-driven foundation that helps identify how processes and applications interact, uncovering optimization opportunities and transformation risks.

"By linking process intelligence with enterprise architecture management, SAP BTM solutions generate deep insights into process flows, system dependencies, and business value realization." Discovering and Scoping Optimization Potential (Answer D):

The BTM suite empowers users to continuously monitor performance and identify improvement opportunities during daily operations through analytics and observability.

"SAP BTM enables organizations to discover, analyze, and scope optimization potential within their daily business operations using integrated analytical capabilities." Incorrect Options:

A: Inventory and retail transaction management are handled by SAP S/4HANA and not part of BTM.

B: Blockchain and cryptocurrency management are not components of the BTM solution portfolio.

Therefore, the verified and correct answers as per SAP BTM documentation are:

C: They help generate insights into both processes and applications and their dependencies.

D: They enable customers to discover, analyze, and scope optimization potential during daily operations.

NEW QUESTION # 34

How does the integration between SAP Signavio and SAP LeanIX enhance IT and business alignment?

- A. Business processes are directly controlled by SAP LeanIX applications.
- B. Integration solely enhances reporting capabilities.
- C. The tools only provide visualization without actionable insights.
- D. The integration allows linking of business applications to business processes.

Answer: D

Explanation:

The integration between SAP Signavio and SAP LeanIX provides a unified view of business and IT, allowing companies to connect business processes (Signavio) with IT applications and systems (LeanIX). This integration bridges operational and architectural perspectives, ensuring full alignment between business goals and IT capabilities.

"Through the SAP Signavio and SAP LeanIX integration, organizations can link business processes to supporting IT applications, creating a shared view that strengthens IT-business alignment." Reference:

This integration supports transformation governance by combining process intelligence (what the business does) with enterprise architecture insights (how IT supports it).

"SAP enables enterprises to visualize dependencies between processes and applications, ensuring coordinated decision-making and improved transformation outcomes." Incorrect Options:

A: Reporting is a secondary feature; integration focuses on alignment, not reporting alone.

B: Both tools provide actionable insights via analytics and process intelligence.

C: LeanIX does not "control" processes; it maps IT dependencies and applications.

Verified Correct answer: D: The integration allows linking of business applications to business processes.

NEW QUESTION # 35

.....

Our C-BCBTM-2509 study materials can provide you with multiple modes of experience, there are three main modes to choose from: PDF, Software and Online. Firstly, the PDF version is printable.
