Best Talend Talend-Core-Developer Practice & Free Talend-Core-Developer

Practice Exams

Experts at BraindumpsVCE strive to provide applicants with valid and updated Talend Talend-Core-Developer exam questions to prepare from, as well as increased learning experiences. We are confident in the quality of the Talend Talend-Core-Developer preparational material we provide and back it up with a money-back guarantee.

Talend Core Certified Developer Exam Sample Questions (Q25-Q30):

NEW QUESTION # 25

You need a list of all customers whose first name contains "Tom" and who are older than 18. Which processor should be used?

- A. Aggregate
- **B. Filter**
- C. Join
- D. Data sampling

Answer: B

Explanation:

Comprehensive and Detailed Explanation:

To filter customer records based on first name containing "Tom" and age greater than 18, the Filter processor is the correct choice.

* The Filter processor allows users to set conditional rules to extract only the required data.

* Users can specify conditions such as:

first_name CONTAINS "Tom"

AND

age > 18

* This ensures that only relevant records are included in the output.

Why not other options?

* Option A (Join): Used to combine data from multiple datasets based on a key field, not for filtering.

* Option B (Aggregate): Used for summarizing data, such as calculating counts, sums, or averages.

* Option D (Data Sampling): Used to select a random subset of data, not for filtering based on conditions.

NEW QUESTION # 26

What are the key capabilities of Talend Cloud Data Preparation that improve data quality and accessibility? Choose 3 answers.

- **A. Standardize data**
- B. Format data
- **C. Transform**
- **D. Cleanse data**
- E. Discover

Answer: A,C,D

Explanation:

Comprehensive and Detailed Explanation:

Talend Cloud Data Preparation enhances data quality and accessibility through:

* Cleanse data (Option C):

* Identifying and correcting inaccuracies or inconsistencies to ensure data integrity.

* Transform (Option D):

* Modifying data structures or values to meet specific requirements or formats.

* Standardize data (Option E):

* Ensuring uniformity in data presentation and format, facilitating consistency across datasets.

Why not other options?

* Option A: Discovery is typically associated with data profiling, not preparation.

* Option B: Formatting is a subset of transformation and standardization processes.

NEW QUESTION # 27

Which operations can you perform using a tMap component? Choose 3 answers.

- A. Transform data from single or multiple sources to single or multiple destinations.
- B. Load single lookup tables only.
- C. Map data using filters, constraints, and simple explicit joins.
- D. Reject data using inner join rejections.
- E. Perform full outer joins.

Answer: A,C,E

Explanation:

Comprehensive and Detailed Explanation:

The tMap component in Talend allows for various data transformation and mapping operations. The correct operations include:

- * A. Map data using filters, constraints, and simple explicit joins.
- * tMap allows mapping fields between sources and destinations with filters and constraints.
- * B. Perform full outer joins.
- * Unlike tJoin, tMap supports full outer joins, allowing all records from both tables to be included.
- * C. Transform data from single or multiple sources to single or multiple destinations.
- * You can map multiple input sources to multiple output targets with transformations.

NEW QUESTION # 28

After enabling the Observability Metric Collector metric generation located in the `\etc\org.talend.ipaas.rt.observability.cfg`, which additional configurations should you apply? Choose 2 answers.

- A. Schedule the metrics generation using CRON based trigger
- B. Configure the time zone
- C. Lifetime
- D. Frequency

Answer: C,D

Explanation:

Comprehensive and Detailed Explanation:

After enabling the Observability Metric Collector in Talend's configuration file (`org.talend.ipaas.rt.observability.cfg`), it's essential to set additional parameters to control the behavior of metric collection:

- * Frequency (Option C): Determines how often metrics are collected. Setting this ensures that data is gathered at appropriate intervals for monitoring needs.
 - * Lifetime (Option D): Specifies how long the collected metrics are retained. This helps manage storage and ensures that outdated metrics are purged.
- Configuring these parameters ensures that the metric collection aligns with organizational requirements for monitoring and performance analysis.

NEW QUESTION # 29

Which component can be used to read a CSV file in an ESB Route?

- A. cMap
- B. tFileInputDelimited
- C. cFileInputDelimited
- D. cFile
- E. tMap

Answer: C

Explanation:

Comprehensive and Detailed Explanation:

In Talend's Enterprise Service Bus (ESB) routes, the appropriate component to read a CSV file is `cFileInputDelimited`. This component is specifically designed for Camel routes to handle delimited files like CSVs.

NEW QUESTION # 30

.....

- [illegible]
