The moment you choose to go with our CAP Study Materials, your dream will be more clearly presented to you. Next, through my introduction, I hope you can have a deeper understanding of our CAP learning quiz. We really hope that our CAP study materials will give you the help to pass the exam.

The SecOps Group Certified AppSec Practitioner Exam Sample Questions (Q36-Q41):

NEW QUESTION # 36

Joan is a project management consultant and she has been hired by a firm to help them identify risk events within the project. Joan would first like to examine the project documents including the plans, assumptions lists, project files, and contracts. What key thing will help Joan to discover risks within the review of the project documents?

- A. Plans that have loose definitions of terms and disconnected approaches will reveal risks.
- B. Poorly written requirements will reveal inconsistencies in the project plans and documents.
- C. The project documents will help the project manager, or Joan, to identify what risk identification approach is best to pursue.
- **D. Lack of consistency between the plans and the project requirements and assumptions can be the indicators of risk in the project.**

Answer: D

NEW QUESTION # 37

Observe the HTTP request below and identify the vulnerability attempted.

GET /help.php?file=../../etc/passwd HTTP/1.1

Host: example.com

User-Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64; rv:107.0) Gecko/20100101 Firefox/107.0 Accept:

text/html,application/xhtml+xml,application/xml;q=0.9,image/avif,image/webp,*/*;q=0.8 Accept-Language: en-GB,en;q=0.5

Accept-Encoding: gzip, deflate Upgrade-Insecure-Requests: 1 Sec-Fetch-Dest: document Sec-Fetch-Mode: navigate Sec-Fetch-

Site: none Sec-Fetch-User: ?1 Cookie: JSESSIONID=38RB5ECV10785B53AF29816E92E2E50 Te: trailers Connection: keep-alive

- A. Code Injection Vulnerability
- B. Cross-Site Request Forgery Vulnerability
- C. All of the above
- **D. Path Traversal Vulnerability**

Answer: D

Explanation:

The HTTP request is a GET to /help.php with a parameter file=../../etc/passwd. Let's analyze the vulnerability:

* The file parameter includes ../ sequences, which are used to navigate up the directory structure (.. moves up one directory level). The request attempts to access /etc/passwd, a sensitive system file on Linux servers that contains user information.

* This is indicative of a Path Traversal Vulnerability (also known as Directory Traversal), where an attacker manipulates file paths to access unauthorized files outside the intended directory. If the server does not sanitize or restrict the file parameter, it may serve the contents of /etc/passwd, leading to sensitive information disclosure.

* Option A ("Cross-Site Request Forgery Vulnerability"): CSRF involves tricking a user into making an unintended request, typically via a malicious form or link. This request does not indicate CSRF; it's a direct attempt to manipulate file access, so this is incorrect.

* Option B ("Path Traversal Vulnerability"): As explained, the ../ sequences in the file parameter are a clear attempt at path traversal, making this the correct answer.

* Option C ("Code Injection Vulnerability"): Code injection involves executing malicious code (e.g., PHP, SQL), but this request aims to read a file, not execute code, so this is incorrect.

* Option D ("All of the above"): Since only Path Traversal applies, this is incorrect.

The correct answer is B, aligning with the CAP syllabus under "Path Traversal" and "OWASP Top 10 (A05):

2021 - Security Misconfiguration). "References: SecOps Group CAP Documents - "Path Traversal Attacks," "Input Validation," and "OWASP Secure Coding Practices" sections.

NEW QUESTION # 38

In which of the following elements of security does the object retain its veracity and is intentionally modified by the authorized subjects?

- A. Nonrepudiation
- **B. Integrity**
- C. Availability
- D. Confidentiality

Answer: B

NEW QUESTION # 39

Your project has several risks that may cause serious financial impact should they happen. You have studied the risk events and made some potential risk responses for the risk events but management wants you to do more. They'd like for you to create some type of a chart that identified the risk probability and impact with a financial amount for each risk event. What is the likely outcome of creating this type of chart?

- A. Risk response
- B. Quantitative analysis
- **C. Contingency reserve**
- D. Risk response plan

Answer: C

NEW QUESTION # 40

Which one of the following is the only output for the qualitative risk analysis process?

- A. Enterprise environmental factors
- B. Organizational process assets
- **C. Risk register updates**
- D. Project management plan

Answer: C

Explanation:

Section: Volume D

NEW QUESTION # 41

.....
