Pass Guaranteed Quiz Microsoft - AZ-120 –Professional Exam Lab Questions

The web-based AZ-120 practice exam can be taken via the internet from any browser like Firefox, Safari, Opera, MS Edge, Internet Explorer, and Chrome. You don't need to install any excessive plugins and software to take this Microsoft AZ-120 Practice Test. Windows, Mac, iOS, Android, and Linux support this Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) practice exam.

Obligatory Prerequisites

It is compelling to earn the Azure Administrator Associate/Azure Solutions Architect Expert certifications along with the Linux and SAP HANA validations before aiming at the Microsoft AZ-120 exam. These designations provide a strong foundation for advanced learning that one might face during AZ-120 exam journey. As the Microsoft AZ-120 exam is associated with a specialty certification, aspirants should be equipped with certain expertise. Thus, it is advised to have a thorough understanding of SAP applications like SAP HANA, SAP related to OS servers & databases, SAP BW/4HANA, and SAP NetWeaver. More so, Azure portals, ARM templates, disaster recovery design, networking, virtualization, and cloud infrastructure are some of the other vital technological areas where prior excellence by a Microsoft AZ-120 Exam candidate is expected.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q247-Q252):

NEW QUESTION # 247

You have an SAP workload on an Azure virtual machine.

You have a built-in role-based access control (RBAC) role definition in the JSON format.

You plan to change the built-in role definition to a custom role definition.

Which property value in the built-in role definition must you change?

- A. assignableScopes
- B. actions
- C. notActions
- D. roleHoae

Answer: D

NEW QUESTION # 248

You are planning an SAP NetWeaver deployment on Azure. The database tier will consist of two Azure virtual machines that have Microsoft SQL Server 2017 installed. Each virtual machine will be deployed to a separate availability zone.

You need to perform the following:

* Minimize network latency between the virtual machines.

* Measure network latency between the virtual machines.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

To minimize latency: **Enable Accelerated Networking.**

To measure latency, use: **Next hop in Azure Network Watcher**

Answer:

Explanation:

Answer Area

To minimize latency: **Enable Accelerated Networking.**

To measure latency, use: **Next hop in Azure Network Watcher**

Explanation

Answer Area

To minimize latency: **Enable Accelerated Networking.**

To measure latency, use: **Niping**

NEW QUESTION # 249

You have an Azure subscription.

You plan to deploy an SAP landscape.

You need to configure an NFS cluster that will host the storage for the landscape. The solution must ensure that the cluster is available if an Azure datacenter fails.

How should you configure the cluster? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Virtual machine resiliency:

Network resiliency:

Disk type:

Answer:

Explanation:

Virtual machine resiliency:

Network resiliency:

Disk type:

Explanation:

Answer Area

Virtual machine resiliency:

Network resiliency:

Disk type:

NEW QUESTION # 250

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements		Yes	No
Oracle Real Application Clusters (RAC) can be used to provide high availability of SAP databases on Azure.		☐	☐
You can host SAP databases on Azure by using Oracle on a virtual machine that runs Windows Server 2016.		☐	☐
You can host SAP databases on Azure by using Oracle on a virtual machine that runs SUSE Linux Enterprise Server 12 (SLES 12).		☐	☐

Answer:

Explanation:

Statements		Yes	No
Oracle Real Application Clusters (RAC) can be used to provide high availability of SAP databases on Azure.		☒	☐
You can host SAP databases on Azure by using Oracle on a virtual machine that runs Windows Server 2016.		☐	☒
You can host SAP databases on Azure by using Oracle on a virtual machine that runs SUSE Linux Enterprise Server 12 (SLES 12).		☐	☒

NEW QUESTION # 251

You have an on-premises deployment of SAP HANA that contains a production environment and a development environment. You plan to migrate both environments to Azure.

You need to identify which Azure virtual machine-series to use for each environment. The solution must meet the following requirements:

- * Minimize costs.
- * Be SAP HANA-certified.

What should you identify for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

SAP HANA Developer Edition:

SAP S/4 HANA:

Answer:

Explanation:

Answer Area

SAP HANA Developer Edition:

SAP S/4 HANA:

Explanation

Answer Area

SAP HANA Developer Edition:

SAP S/4 HANA:
