

100% Pass Quiz VMware - 2V0-17.25 - Efficient VMware Cloud Foundation 9.0 Administrator Test Dumps Pdf

Our 2V0-17.25 vce braindumps will boost your confidence for taking the actual test because the pass rate of our preparation materials almost reach to 98%. You can instantly download the free trial of 2V0-17.25 Exam PDF and check its credibility before you decide to buy. Our 2V0-17.25 free dumps are applied to all level of candidates and ensure you get high passing score in their first try.

VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.
Topic 2	VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.
Topic 3	Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.
Topic 4	Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.

New VMware 2V0-17.25 Exam Pass4sure & 2V0-17.25 Reliable Test Online

Our 2V0-17.25 study braindumps for the overwhelming majority of users provide a powerful platform for the users to share. Here, the all users of the 2V0-17.25 exam questions can through own ID number to log on to the platform and other users to share and exchange, can even on the platform and struggle with more people to become good friend, pep talk to each other, each other to solve their difficulties in study or life. The 2V0-17.25 Prep Guide provides user with not only a learning environment, but also create a learning atmosphere like home.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q34-Q39):

NEW QUESTION # 34

Which two resources can be configured in a VM Class in VMware vSphere with vSphere Supervisor? (Choose two.)

- A. Memory
- B. CPU
- C. PCI devices
- D. Storage
- E. Network interface

Answer: A,B

Explanation:

A VM Class predefines hardware for Supervisor-managed VMs: "The VM class... defines such parameters as the number of virtual CPUs, memory capacity, and reservation settings." Administration steps show these are configurable: "You can configure hardware resources such as CPU, memory, and different devices" when editing a VM class. Additionally, the DCUI/API specification underscores CPU and Memory fields: "--cpu-count ... Required." and "--memory- mb ... Required." for a VM class. While network adapters, PCI devices, and instance storage can also be added via advanced config, the question asks for two; CPU and Memory are canonical, always-present VM Class resources per the core definition above.

NEW QUESTION # 35

A cluster is experiencing frequent host disconnects.

Which troubleshooting steps or checks might help identify the root cause?

- A. Reviewing vpxd.log and hostd.log for errors
- B. Testing DNS resolution for forward and reverse lookups
- C. Confirming that firewall ports for management traffic are open
- D. Deleting the cluster and re-adding all hosts manually

Answer: A,B,C

Explanation:

Checking logs (A), ensuring correct firewall rules (B), and verifying DNS resolution (D) are key. Deleting and recreating the cluster (C) is rarely the first step and may cause more disruption.

NEW QUESTION # 36

An administrator has been tasked with deploying a VCF-Aware VMware Aria Suite Lifecycle within a newly provisioned VMware Cloud Foundation environment.

Which four details will the Cloud Administrator require to complete the deployment via SDDC Manager?

(Choose four.)

- A. The FQDN of the Aria Suite Lifecycle appliance
- B. The password for the vcfadmin@local account
- C. The password for the admin@local account
- D. The password for the root account
- E. A free IP Address within the cross-region virtual network segment

- F. A free IP address on the VMware NSX Tier 0
- G. The FQDN of the Aria Suite Lifecycle cluster

Answer: A,B,D,G

Explanation:

The fully qualified domain name (FQDN) of the Aria Suite Lifecycle appliance and cluster are necessary for proper configuration and integration within the VMware Cloud Foundation environment.

The password for the root account is required to authenticate and provide administrative access to the environment.

The password for the vcfadmin@local account is needed to perform administrative tasks related to VMware Cloud Foundation (VCF).

NEW QUESTION # 37

When planning disaster recovery for a VMware data center, which of the following best practices or tools can help create a robust DR strategy?

- A. Site Recovery Manager (SRM) for orchestrated failover
- B. Manual VM backups stored on local host datastores only
- C. Regularly testing the failover plan in a sandbox environment
- D. Cross-site vMotion with Stretch Cluster configurations

Answer: A,C,D

Explanation:

SRM (A) automates and orchestrates failover; stretch clusters enable cross-site vMotion for resilience (C); and testing DR in a controlled environment (D) ensures readiness. Storing backups only on local host datastores (B) creates a single point of failure and is not recommended.

NEW QUESTION # 38

To analyze host logs from multiple ESXi servers centrally, an administrator sets up:

- A. A centralized syslog server or vRealize Log Insight
- B. vCenter High Availability
- C. VMkernel port groups dedicated to user traffic
- D. Data center bridging (DCB) switches

Answer: A

Explanation:

Sending logs to a remote syslog server or using vRealize Log Insight is a standard practice for centralized log management and easier troubleshooting in a VMware environment.

NEW QUESTION # 39

.....

We are a team of the exam questions providers of VMware braindumps in the IT industry that ensure you to pass actual test 100%. We have experienced and professional IT experts to create the latest 2V0-17.25 Exam Questions And Answers which are approach to the real 2V0-17.25 practice test. Try download the free dumps demo.
