Free PDF Quiz 2025 High-quality 2V0-11.25: Latest VMware Cloud Foundation 5.2 Administrator Test Answers

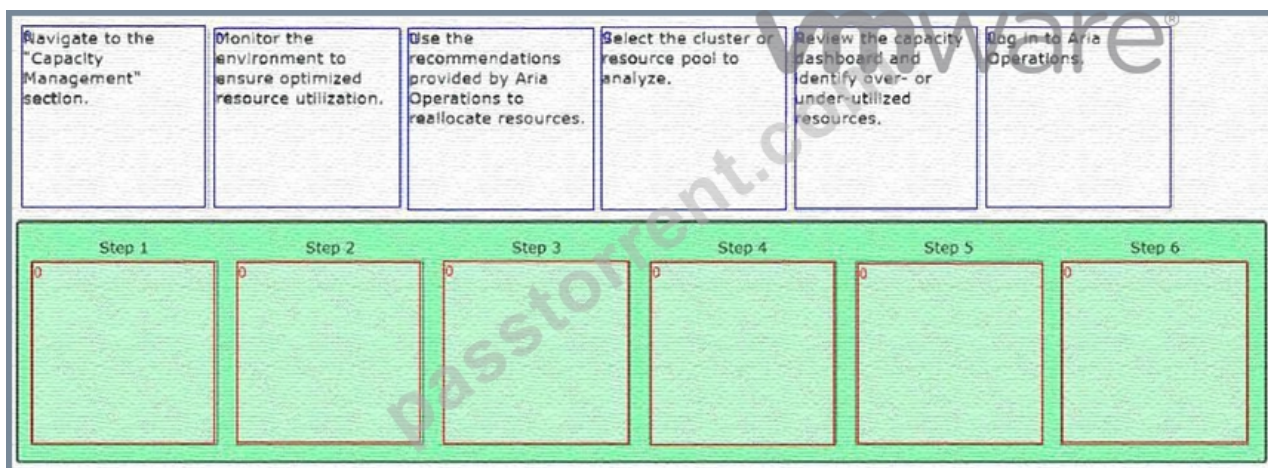

Our 2V0-11.25 exam braindumps are set high standards for your experience. That is the reason why our 2V0-11.25 training questions gain well brand recognition and get attached with customers all these years around the world. Besides, our 2V0-11.25 learning questions are not only high effective but priced reasonably. Their prices are acceptable for everyone and help you qualify yourself as and benefit your whole life.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q89-Q94):

NEW QUESTION # 89

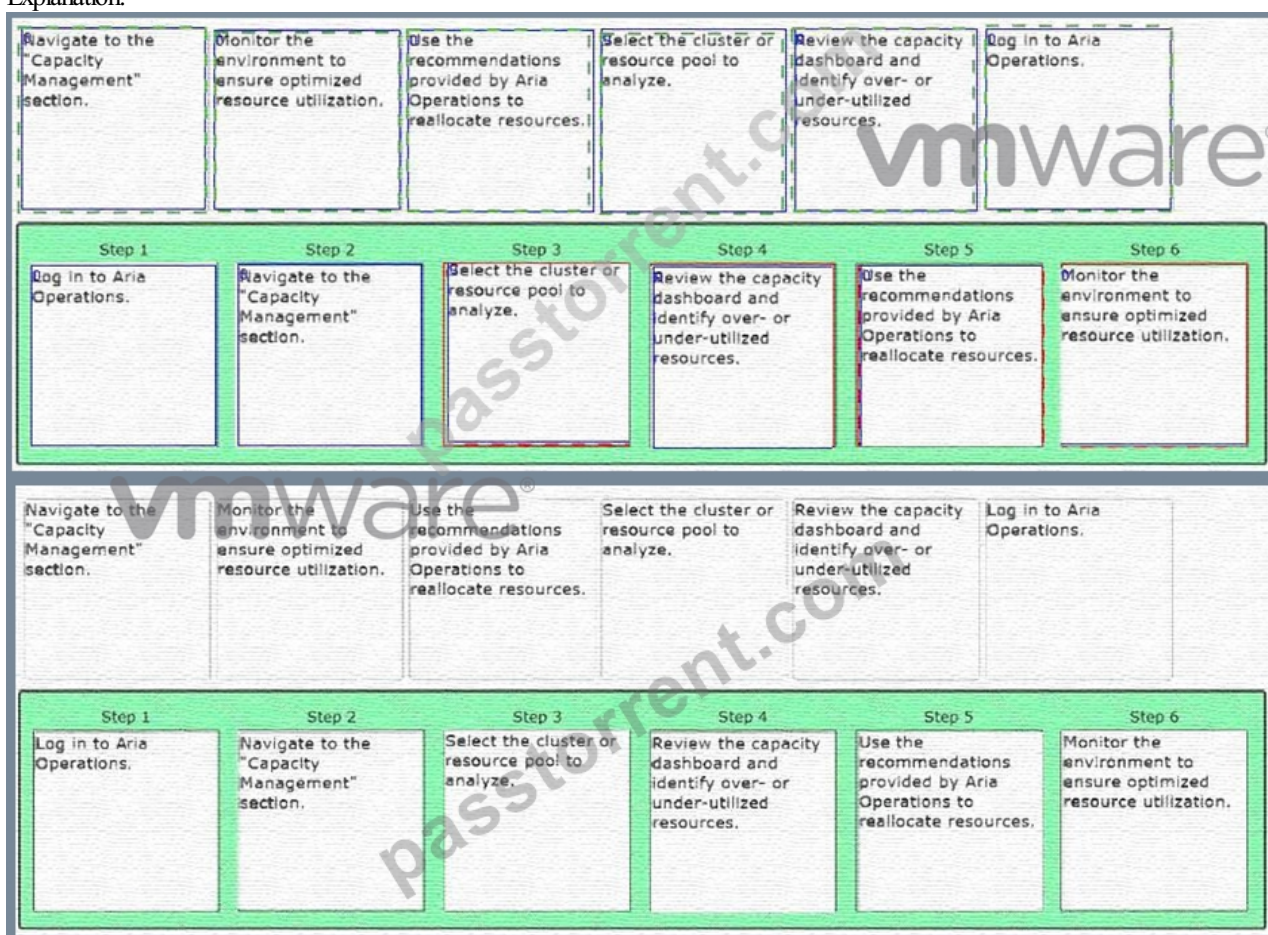

DRAG DROP

Put the following steps in the correct order to optimize resource allocation using Aria Operations.

Answer:

Explanation:

NEW QUESTION # 90

An organization is integrating VMware vCenter with Active Directory (AD) to streamline user authentication. As part of this process, the administrator needs to add AD as an identity source in vCenter.

Which three steps must be performed to successfully add AD as an identity source? (Choose three.)

- A. Reboot the vCenter Server to apply the identity source settings.
- B. Navigate to the vCenter Single Sign-On configuration in the vSphere Client.
- C. Configure DNS settings on all ESXi hosts to point to the AD DNS servers.
- D. Enter the Domain Name and the credentials of an AD user with domain join privileges
- E. Select 'Add Identity Source' and choose 'Active Directory (Integrated Windows Authentication)'.

Answer: B,D,E

Explanation:

When adding AD as an identity source, you need to enter the Domain Name and provide the credentials of an AD user with domain join privileges to authenticate and add the domain.

In the vSphere Client, you need to select 'Add Identity Source' and choose the appropriate method for AD integration, which is typically 'Active Directory (Integrated Windows Authentication)'.

The process to add AD as an identity source is performed under the vCenter Single Sign-On (SSO) configuration in the vSphere Client.

NEW QUESTION # 91

An administrator is responsible for monitoring the logs of multiple vSphere components using VMware Aria Operations for Logs. They notice an increase in error logs for a specific ESXi host.

Which two steps should be taken to pinpoint the issue? (Choose two.)

- A. Correlate the error logs with recent configuration changes on the ESXi host.
- B. Restart the ESXi host to resolve the issue immediately
- C. Filter the logs by the ESXi host name and error severity.
- D. Delete all old logs to free up space and generate new logs.
- E. Check for patterns or repeated error messages over a specific time frame.

Answer: C,E

Explanation:

Filtering the logs by the ESXi host name and error severity helps narrow down the logs to those relevant to the specific host and allows for easier identification of significant errors.

Checking for patterns or repeated error messages over a specific time frame helps identify the root cause of the issue and determine if the errors are linked to a specific event or condition.

NEW QUESTION # 92

Which vSphere component is essential for providing persistent storage to Kubernetes workloads deployed on IaaS Control Plane?

- A. Control Plane Storage Policy
- B. Pod Service
D vSAN
- C. Container Image Virtual Disks

Answer: B

Explanation:

The vSphere Pod Service is essential for providing persistent storage to Kubernetes workloads deployed on IaaS Control Plane (formerly vSphere with Tanzu). It enables the integration of Kubernetes with vSphere, allowing the creation of persistent volumes and the management of storage resources for Kubernetes workloads, ensuring that they can utilize vSphere's storage capabilities like vSAN.

NEW QUESTION # 93

An administrator is deploying a new VMware Cloud Foundation (VCF) environment. After uploading the completed Deployment Parameter Workbook, the validation task fails and an error message is displayed within the VMware Cloud Builder GUI.

Which log file can the administrator use to identify the cause of the validation error?

- A. domainmanager.log
- B. vcf-bringup-debug.log
- C. jsongenerator-
<timestamp>.log
- D. sos.log

Answer: B

Explanation:

According to the official VMware Cloud Foundation Deployment Guide and VMware Cloud Builder troubleshooting documentation, the primary log file used for tracking and diagnosing bring-up and validation errors in a new VCF deployment is:

A). vcf-bringup-debug.log

Exact Extract from VMware Documentation:

"The vcf-bringup-debug.log file records detailed information about all bring-up operations, including parameter validation checks, environment checks, and errors encountered during the deployment process.

When a validation task fails in the Cloud Builder GUI, this log file provides the necessary diagnostic information to identify the cause of the error." Why Not the Other Options?

B). sos.log: Used for SDDC Manager service health and not specific to Cloud Builder validation or deployment tasks.

C). domainmanager.log: Used for ongoing domain management and operations within SDDC Manager, not for Cloud Builder or bring-up process.

D). jsongenerator-`<timestamp>`.log: Related to the generation of JSON files from the parameter workbook, but not the source for in-depth validation or deployment errors.

Summary:

When a validation task fails during the deployment of a new VMware Cloud Foundation environment in Cloud Builder, the administrator should review the vcf-bringup-debug.log file to diagnose and resolve the error, as directed by official VMware documentation.

NEW QUESTION # 94

.....

Our passing rate is high so that you have little probability to fail in the exam because the 2V0-11.25 guide torrent is of high quality. But if you fail in exam unfortunately we will refund you in full immediately at one time and the procedures are simple and fast. If you have any questions about VMware Cloud Foundation 5.2 Administrator test torrent or there are any problems existing in the process of the refund you can contact us by mails or contact our online customer service personnel and we will reply and solve your doubts or questions promptly. We guarantee to you that we provide the best 2V0-11.25 study torrent to you and you can pass the exam with high possibility and also guarantee to you that if you fail in the exam unfortunately we will provide the fast and simple refund procedures.
