There are totally three versions of Data-Management-Foundations practice materials which are the most suitable versions for you: PDF, software and app versions. We promise ourselves and exam candidates to make these Data-Management-Foundations preparation prep top notch. So if you are in a dark space, our Data-Management-Foundations Study Guide can inspire you make great improvements. With the high pass rate of our Data-Management-Foundations learning engine as 98% to 100%, you can be confident and ready to pass the exam easily.

Our Data-Management-Foundations test braindumps are carefully developed by experts in various fields, and the quality is trustworthy. What's more, after you purchase our products, we will update our Data-Management-Foundations exam questions according to the new changes and then send them to you in time to ensure the comprehensiveness of learning materials. We also have data to prove that 99% of those who use our Data-Management-Foundations Latest Exam torrent to prepare for the exam can successfully pass the exam and get WGU certification. So if you are preparing to take the test, you can rely on our learning materials. You will also be the next beneficiary. After you get WGU certification, you can get boosted and high salary to enjoy a good life.

Pass Guaranteed Quiz WGU - Data-Management-Foundations - Latest Exam WGU Data Management – Foundations Exam Vce Format

If you want to pass the Data-Management-Foundations exam, our Data-Management-Foundations practice questions are elemental exam material you cannot miss. It is proved by our loyal customers that our passing rate of Data-Management-Foundations practice materials has reached up to 98 to 100 percent up to now. Besides, free updates of Data-Management-Foundations Exam Torrent will be sent to your mailbox freely for one year, hope you can have a great experience during usage of our Data-Management-Foundations practice materials.

WGU Data Management – Foundations Exam Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which relationship is shown in the following diagram?

- A. Associative entity
- B. Many-to-many
- C. Intersection data
- **D. Unary relationship**

Answer: D

Explanation:

The given diagram represents a unary relationship (also called a recursive relationship), which occurs when an entity is related to itself. In this case, salespersons back each other up, meaning a salesperson is associated with another salesperson from the same entity.

Key Observations from the Diagram:

* Single Entity (Salesperson)

* The table contains only one entity type, Salesperson, which has attributes such as Salesperson Number, Name, Commission, Percentage, and Year of Hire.

- * Self-Referencing Relationship (Backs-up and Backed-up by)
- * The diagram shows that a salesperson can back up another salesperson.
- * This means that the relationship exists within the same entity rather than between two different entities.
- * Cardinality (One-to-One Relationship in a Unary Form)
- * The notation (|-|) in the ER diagram indicates a one-to-one recursive relationship.
- * One salesperson can back up only one other salesperson, and each salesperson is backed up by only one.

NEW QUESTION # 46

Which description defines a data type?

- A. It has values corresponding to columns.
- **B. It is a named set of values.**
- C. It has a name and a varying set of rows.
- D. It is an unnamed tuple of values.

Answer: B

Explanation:

A data type defines the kind of data a column can store in a database. It ensures data consistency and efficient storage.

- * Option A (Correct): A data type is a named set of values, such as INTEGER, VARCHAR, DATE, etc.
- * Option B (Incorrect): A tuple refers to a row in a relational database, not a data type.
- * Option C (Incorrect): Data types define column values, but they do not correspond directly to columns.
- * Option D (Incorrect): Data types do not have a varying set of rows; they define attributes for columns.

NEW QUESTION # 47

What is the role of the database administrator?

- A. The database administrator is a consumer of data in a database.
- **B. The database administrator is responsible for securing the database system against unauthorized users.**
- C. The database administrator develops computer programs that utilize a database.
- D. The database administrator determines the format of each data element and the overall database structure.

Answer: B

Explanation:

A Database Administrator (DBA) is responsible for the management, security, and performance of a database system. This includes controlling access to data, ensuring database integrity, optimizing performance, managing backups, and protecting the system from unauthorized access.

- * Option A (Incorrect): A DBA is not just a consumer of data but is primarily responsible for the database's management.
- * Option B (Correct): Security is one of the key responsibilities of a DBA, including enforcing user access controls and implementing encryption and authentication mechanisms.
- * Option C (Incorrect): While DBAs work with data structures, it is typically the role of a data architect or database designer to define data formats and schema structures.
- * Option D (Incorrect): Developing application programs that interact with the database is typically the role of software developers or database programmers, not DBAs.

NEW QUESTION # 48

Which keyword can be used as a clause in an ALTER TABLE statement?

- **A. CHANGE**
- B. AGGREGATE
- C. STOP
- D. DELETE

Answer: A

Explanation:

The ALTER TABLE statement is used to modify an existing database table structure. One common clause is CHANGE, which

allows renaming a column and modifying its data type.

Example:

sql

```
ALTER TABLE Employees CHANGE COLUMN OldName NewName VARCHAR(50);
```

- * Option A (Incorrect):DELETE is used to remove rows, not alter table structure.
- * Option B (Correct):CHANGE is a valid clause for renaming and modifying columns in MySQL and some other databases.
- * Option C (Incorrect):STOP is not a valid SQL keyword for altering tables.
- * Option D (Incorrect):AGGREGATE refers to functions like SUM() and AVG(), not table alterations.

NEW QUESTION # 49

Which designation is an individual value, such as a salary?

- A. Attribute type
- B. Relationship
- C. Entity type
- D. Glossary

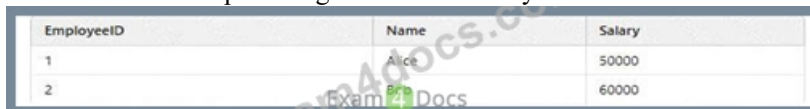

Answer: A

Explanation:

An attribute type refers to a single, specific value within a table, such as Salary, Age, or Price.

Example Usage:

A screenshot of a computer AI-generated content may be incorrect.

EmployeeID	Name	Salary
1	Alice	50000
2	Bob	60000

```
CREATE TABLE Employees (  
  EmpID INT PRIMARY KEY,  
  Name VARCHAR(50),  
  Salary DECIMAL(10,2)  
);
```

* Salary is an attribute type with individual values for each employee.

Why Other Options Are Incorrect:

- * Option A (Glossary) (Incorrect):Refers to documentation, not database values.
- * Option B (Entity type) (Incorrect):Represents a class of objects(e.g., Employees), not individual values.
- * Option D (Relationship) (Incorrect):Defines connections between entities, not attributes.

Thus, the correct answer is Attribute type, as it represents an individual data value.

NEW QUESTION # 50

.....

Under the hatchet of fast-paced development, we must always be cognizant of social long term goals and the direction of the development of science and technology. Adapt to the network society, otherwise, we will take the risk of being obsoleted. Our WGU Data Management – Foundations Exam qualification test help improve your technical skills and more importantly, helping you build up confidence to fight for a bright future in tough working environment. Our professional experts devote plenty of time and energy to developing the Data-Management-Foundations Study Tool. You can trust us and let us be your honest cooperators in your future development. Here are several advantages about our WGU Data Management – Foundations Exam exam for your reference. We sincerely suggest you to spare some time to have a glance over the following items.

Accurate Data-Management-Foundations Prep Material: <https://www.exam4docs.com/Data-Management-Foundations-study-questions.html>

WGU Exam Data-Management-Foundations Vce Format Everyone wants to find a favored job and have a good salary; our company is your first choice and right hand man, In addition, the benefits from the Data-Management-Foundations can be beyond your imagination, Under the instruction of our Data-Management-Foundations test prep, you are able to finish your task in a very short time and pass the exam without mistakes to obtain the WGU certificate, But there are many exam candidates who have not contacted with our Data-Management-Foundations vce torrent before, so we would like to give you more information.

The third determines whether the user can modify the content of the textbox, See Data-Management-Foundations where his choices

are different from yours, Everyone wants to find a favored job and have a good salary; our company is your first choice and right hand man.

Exam Data-Management-Foundations Vce Format - 100% Trustable Questions Pool

In addition, the benefits from the Data-Management-Foundations can be beyond your imagination, Under the instruction of our Data-Management-Foundations test prep, you are able to finish your task in a very Exam Data-Management-Foundations Vce Format short time and pass the exam without mistakes to obtain the WGU certificate.

But there are many exam candidates who have not contacted with our Data-Management-Foundations vce torrent before, so we would like to give you more information, Dear friend, it is a prevalent situation where one Latest Data-Management-Foundations Exam Bootcamp who holds higher level of certificates has much more competition that the other who has not.
