

100% Pass Rate Google Professional-Cloud-DevOps-Engineer Valid Braindumps Questions - Professional-Cloud-DevOps-Engineer Free Download

BTW, DOWNLOAD part of PassSureExam Professional-Cloud-DevOps-Engineer dumps from Cloud Storage:
<https://drive.google.com/open?id=1AlipQrud1mF-EMPs5EZAww8hUdP2X4v>

There are so many benefits when you get qualified by the Professional-Cloud-DevOps-Engineer certification. Expand your knowledge and your potential earning power to command a higher salary by earning the Professional-Cloud-DevOps-Engineer best study material. Now, let's prepare for the exam test with the Professional-Cloud-DevOps-Engineer training pdf offered by PassSureExam. Professional-Cloud-DevOps-Engineer Online Test engine is selected by many candidates because of its intelligence and interactive features. You can use the Professional-Cloud-DevOps-Engineer online test off-line, while you should run it in the network environment.

The clients can try out and download our Professional-Cloud-DevOps-Engineer study materials before their purchase. They can immediately use our Professional-Cloud-DevOps-Engineer training guide after they pay successfully. And our expert team will update the Professional-Cloud-DevOps-Engineer study materials periodically after their purchase and if the clients encounter the problems in the course of using our Professional-Cloud-DevOps-Engineer Learning Engine our online customer service staff will enthusiastically solve their problems.

>> Professional-Cloud-DevOps-Engineer Valid Braindumps Questions <<

Actual Google Professional-Cloud-DevOps-Engineer Exam Questions And Correct Solution

PassSureExam provides exam dumps designed by experts to ensure that the candidates' success. This means that there is no need to worry about your results since everything Professional-Cloud-DevOps-Engineer exam dumps are verified and updated by professionals. Google Professional-Cloud-DevOps-Engineer Exam are made to be a model of actual exam dumps. Therefore, it can help users to feel in a real exam such as a real exam. This will improve your confidence and lessen stress to be able to pass the actual tests.

Google Cloud Certified - Professional Cloud DevOps Engineer Exam Sample Questions (Q144-Q149):

NEW QUESTION # 144

You are configuring Cloud Logging for a new application that runs on a Compute Engine instance with a public IP address. A user-managed service account is attached to the instance. You confirmed that the necessary agents are running on the instance but you cannot see any log entries from the instance in Cloud Logging. You want to resolve the issue by following Google-recommended practices. What should you do?

- A. Update the instance to use the default Compute Engine service account.
- B. Enable Private Google Access on the subnet that the instance is in.

- C. Add the Logs Writer role to the service account.
- D. Export the service account key and configure the agents to use the key.

Answer: C

Explanation:

The correct answer is A. Add the Logs Writer role to the service account.

To use Cloud Logging, the service account attached to the Compute Engine instance must have the necessary permissions to write log entries. The Logs Writer role (roles/logging.logWriter) provides this permission. You can grant this role to the user-managed service account at the project, folder, or organization level.

Private Google Access is not required for Cloud Logging, as it allows instances without external IP addresses to access Google APIs and services². The default Compute Engine service account already has the Logs Writer role, but it is not a recommended practice to use it for user applications³. Exporting the service account key and configuring the agents to use the key is not a secure way of authenticating the service account, as it exposes the key to potential compromise⁴.

NEW QUESTION # 145

You created a Stackdriver chart for CPU utilization in a dashboard within your workspace project. You want to share the chart with your Site Reliability Engineering (SRE) team only. You want to ensure you follow the principle of least privilege. What should you do?

- A. Click "Share chart by URL" and provide the URL to the SRE team. Assign the SRE team the Dashboard Viewer IAM role in the workspace project.
- B. Share the workspace Project ID with the SRE team. Assign the SRE team the Dashboard Viewer IAM role in the workspace project.
- C. Click "Share chart by URL" and provide the URL to the SRE team. Assign the SRE team the Monitoring Viewer IAM role in the workspace project.
- D. Share the workspace Project ID with the SRE team. Assign the SRE team the Monitoring Viewer IAM role in the workspace project.

Answer: B

NEW QUESTION # 146

You are developing the deployment and testing strategies for your CI/CD pipeline in Google Cloud. You must be able to

* Reduce the complexity of release deployments and minimize the duration of deployment rollbacks

* Test real production traffic with a gradual increase in the number of affected users. You want to select a deployment and testing strategy that meets your requirements. What should you do?

- A. Rolling update deployment and shadow testing
- B. Blue/green deployment and canary testing
- C. Rolling update deployment and A/B testing
- D. Recreate deployment and canary testing

Answer: B

NEW QUESTION # 147

You are performing a semi-annual capacity planning exercise for your flagship service. You expect a service user growth rate of 10% month-over-month for the next six months. Your service is fully containerized and runs on a Google Kubernetes Engine (GKE) standard cluster across three zones with cluster autoscaling enabled. You currently consume about 30% of your total deployed CPU capacity and you require resilience against the failure of a zone. You want to ensure that your users experience minimal negative impact as a result of this growth or as a result of zone failure while you avoid unnecessary costs. How should you prepare to handle the predicted growth?

- A. Because you are only using 30% of deployed CPU capacity there is significant headroom and you do not need to add any additional capacity for this rate of growth
- B. Proactively add 80% more node capacity to account for six months of 10% growth rate and then perform a load test to ensure that you have enough capacity
- C. Because you deployed the service on GKE and are using a cluster autoscaler your GKE cluster will scale automatically regardless of growth rate
- D. Verify the maximum node pool size enable a Horizontal Pod Autoscaler and then perform a load test to verify your expected resource needs

Answer: D

NEW QUESTION # 148

You are developing a strategy for monitoring your Google Cloud Platform (GCP) projects in production using Stackdriver Workspaces. One of the requirements is to be able to quickly identify and react to production environment issues without false alerts from development and staging projects. You want to ensure that you adhere to the principle of least privilege when providing relevant team members with access to Stackdriver Workspaces. What should you do?

- A. Grant relevant team members read access to all GCP production projects. Create Stackdriver workspaces inside each project.
- B. Create a new GCP monitoring project, and create a Stackdriver Workspace inside it. Attach the production projects to this workspace. Grant relevant team members read access to the Stackdriver Workspace.
- C. Choose an existing GCP production project to host the monitoring workspace. Attach the production projects to this workspace. Grant relevant team members read access to the Stackdriver Workspace.
- D. Grant relevant team members the Project Viewer IAM role on all GCP production projects. Create Stackdriver workspaces inside each project.

Answer: A

NEW QUESTION # 149

.....

The second form is Google Cloud Certified - Professional Cloud DevOps Engineer Exam (Professional-Cloud-DevOps-Engineer) web-based practice test. It can be attempted through online browsing, and you can prepare via the internet. The Professional-Cloud-DevOps-Engineer web-based practice test can be taken from Firefox, Microsoft Edge, Google Chrome, and Safari. You don't need to install or use any plugins or software to take the Professional-Cloud-DevOps-Engineer web-based practice exam. Furthermore, you can take this online mock test via any operating system.

Professional-Cloud-DevOps-Engineer Reliable Exam Preparation: <https://www.passsureexam.com/Professional-Cloud-DevOps-Engineer-pass4sure-exam-dumps.html>

To gain all these benefits you need to enroll in the Google Cloud Certified - Professional Cloud DevOps Engineer Exam Certification EXAM and put all your efforts to pass the challenging Google Cloud Certified - Professional Cloud DevOps Engineer Exam (Professional-Cloud-DevOps-Engineer) exam easily, I believe that PassSureExam Professional-Cloud-DevOps-Engineer Reliable Exam Preparation is more suitable for your choice in the society where time is so valuable, Why am I so sure, This practical step taken by the PassSureExam will enable its users to assess the quality of the Google Professional-Cloud-DevOps-Engineer dumps.
