What's more, part of that Easy4Engine VMCE\_v12 dumps now are free: [https://drive.google.com/open?id=1HdTs8-Rey1x0e\\_2O542vygBwNZPnx95e](https://drive.google.com/open?id=1HdTs8-Rey1x0e_2O542vygBwNZPnx95e)

Easy4Engine is professional and is built for nearly all IT certification examinations. It not only ensures the quality, best service, but also the cheap price. Having Easy4Engine, you will not worry about VMCE\_v12 certification exams and answers. Moreover, Easy4Engine can provide VMCE\_v12 Latest Dumps demo and VMCE\_v12 study guide for you, which will help you pass VMCE\_v12 exam in a short time and let you be close to your dream to become an elite.

## Veeam VMCE\_v12 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Data protection strategies: This section of the exam covers an overview of data protection strategies.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Veeam Data Platform: This section deals with the identification and description of the goal of each major product in the Veeam Data Platform.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Incident Response Planning: This section of the exam covers integrating Veeam Backup and Replication into the incident response strategy.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Moving or copying backups: This section of the exam covers use cases for backup processes using VeeamMover.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Initial security considerations: This section defines ways and tools to secure the Veeam backup server.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>Agent backup: This section of the exam covers the identification of protection groups for automating the installation of Veeam Agents.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>Replication: This section of the exam covers the description of use cases, architectures, and elements of replication jobs.</li> </ul>
Topic 13	<ul style="list-style-type: none"> <li>Transport modes: This section aims to analyze different methods to collect and read data from the production environment.</li> </ul>
Topic 14	<ul style="list-style-type: none"> <li>Scale-out Backup Repository: This section of the exam covers the description of the architecture, placement policies, and data tiers.</li> </ul>
Topic 15	<ul style="list-style-type: none"> <li>Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.</li> </ul>
Topic 16	<ul style="list-style-type: none"> <li>Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.</li> </ul>

## Quiz VMCE\_v12 - Accurate Veeam Certified Engineer v12 Valid Exam Materials

The price for VMCE\_v12 learning materials is reasonable, and no matter you are a student or an employee, you can afford the expense. In addition, VMCE\_v12 exam dumps are edited by professional experts, and therefore the quality can be guaranteed. VMCE\_v12 exam materials cover most of the knowledge points for the exam, and you can master them through study. In order to let you know the latest information for the exam, we offer you free update for 365 days after purchasing, and the update version for VMCE\_v12 Exam Dumps will be sent to you automatically.

### Veeam Certified Engineer v12 Sample Questions (Q109-Q114):

#### NEW QUESTION # 109

Some VMware virtual machines must be restored from the most recent backup due to four different problems. For which problem can a Full VM Restore be completed using Quick Rollback?

- A. The virtual machine does not start after the datastore runs out of space.

- B. The virtual machine does not start after a software update fails inside the virtual machine.
- C. The virtual machine fails to start after it is migrated to a different VMware host in a different data center.
- D. The virtual machine does not start after a host power outage.

**Answer: B**

#### NEW QUESTION # 110

A physical Linux file server needs to be migrated to VMware ESXi. The server has several volumes: /dev/sda (60GB), /dev/sdb (1TB) and /dev/sdc (4TB).

What is the quickest option to migrate the server?

- A. Create an empty VM and perform bare metal recovery inside the VM.
- B. Export all disks, create an empty VM and attach the disks.
- C. Perform Instant Disk Recovery for each volume.
- D. Perform Instant VM Recovery.

**Answer: D**

Explanation:

The quickest option for migrating a physical Linux file server with multiple volumes to VMware ESXi is to perform Instant VM Recovery. This feature allows you to run the server directly from the backup file in a VMware environment, significantly reducing the time and complexity involved in migration.

#### NEW QUESTION # 111

There is a company-wide mandate to migrate operations off corporate datacenters and over to AWS, Azure, and GCE. The Veeam engineer has backups of VMware, Hyper-V, and Nutanix VMs stored in on-premises repositories. The performance of a test restore was not satisfactory.

Which solution should the engineer deploy?

- A. Caching servers on premises and in the cloud
- B. Veeam WAN Accelerators on premises and in the cloud
- C. Helper appliance in the cloud
- D. Upgraded bandwidth to the Internet

**Answer: C**

Explanation:

[https://helpcenter.veeam.com/docs/backup/vsphere/restore\\_amazon\\_proxy\\_appliance.html?ver=120](https://helpcenter.veeam.com/docs/backup/vsphere/restore_amazon_proxy_appliance.html?ver=120)

#### NEW QUESTION # 112

If you need to run a script to stop a service in order to get an application-consistent backup on a Windows server, where can the script be run?

- A. In the virtual machines setting of the job, add a script in the scripts tab under "Run the following script before the job:"
- B. Copy the script to the VM and schedule the script to run prior to the start of the backup job using the Windows Task Scheduler in the VM
- C. In the guest processing setting of the job, enable application-aware processing and add a pre-freeze script to the VM
- D. Configure the script to run on the Veeam Backup & Replication server using the Windows Task Scheduler

**Answer: C**

#### NEW QUESTION # 113

A Microsoft SQL server is running in a VMware VM. The VM is very sensitive to snapshots, and can only be snapshotted once per day at 3 AM. However, the RPO for the databases running inside the VM is 1 hour.

Which two Application-Aware Processing Settings should be selected in the backup job so that the 1 hour RPO for the databases is

met? (Choose two.)

- A. SQL Tab: Choose how this job should process Microsoft SQL Server Transaction Logs: Do not truncate logs
- B. General Tab: VSS Settings: Process transaction logs with this job
- C. SQL Tab: Choose how this job should process Microsoft SQL Server Transaction Logs: Back up logs periodically
- D. General Tab: VSS Settings: Perform copy only
- E. SQL Tab: Choose how this job should process Microsoft SQL Server Transaction Logs: Truncate Logs

**Answer: B,C**

Explanation:

To meet the 1-hour RPO for the databases within the VM, while only being able to snapshot the VM once per day, the best strategy is to enable regular transaction log backups (option A) and process transaction logs with the job (option E). This setup allows the system to capture changes in the SQL Server transaction logs at intervals less than the RPO requirement, without needing to snapshot the entire VM more frequently.
