Salesforce Media Cloud Accredited Professional (AP) Exam Sample Questions (Q19-Q24):

NEW QUESTION # 19

A publishing company has an existing media plan creation process that was setup using OmniStudio a few months ago. A new requirement has come up where the user will be required to enter a new secondary budget field and this field should be stored with the rest of the media plan details.

On which object should a Consultant add this field so that it is stored with the rest of the media plan and can be added to the appropriate OmniScript?

- A. Quote
- **B. Media Plan Placement**

- C. Opportunity
- D. Order

Answer: B

NEW QUESTION # 20

When a media plan is submitted to the ad servers, there is an error related to missing creative or a notification related to a change in the program schedule.

How can this error or notification be made visible on Media Cloud?

- A. Through Einstein for Ad Servers
- B. Through data present on Media Cloud
- C. Through real-time integration to ad servers
- D. Through campaign analytics reports

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Media Cloud leverages real-time integrations with ad servers to surface errors or notifications such as missing creatives or schedule changes directly in the system. This allows users to act promptly based on live data. Reporting and analytics are more historical and do not provide immediate error visibility. Einstein is not specifically designed for ad server error reporting.

NEW QUESTION # 21

A company is planning to do an audit and needs a report to determine all the price list changes that have been configured in all streaming packages configured in Media Cloud.

Which set of objects should a Consultant access to generate such report?

- A. Product, Pricing Variable, Pricing Variable Binding
- B. Product, Pricing Plan, Pricing Plan Step, Price List
- C. Product, Price Book, Price Book Entry, Price List
- D. Product, Price List Entry, Pricing Element

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Pricing Plan, Pricing Plan Step, and Price List objects are part of the managed pricing framework in Media Cloud used to define and track pricing changes. These objects collectively reflect the price list changes over streaming packages. Product and Price Book objects are standard Salesforce objects but do not capture the pricing plan step details critical for auditing price changes.

NEW QUESTION # 22

An Administrator is mapping a user to Media Cloud personas. In the current role, the user builds media plans from request for proposals (RFPs), reviews past performance to gain insights, and proposes proactive solutions.

To which persona should the user be mapped?

- A. Ad Ops
- B. Media Planner
- C. Yield Manager
- D. Designer

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The Media Planner persona is responsible for creating media plans based on RFPs, analyzing past campaign data, and proposing strategic media buys. Yield Managers focus more on inventory optimization, Designers on creative development, and Ad Ops on campaign execution.

NEW QUESTION # 23

A Media Publisher is using Advertising Sales Management (ASM) to manage their B2B Ad Sales business and has decided to use Google Ad Manager (GAM).

Which two actions should a Consultant perform before testing the GAM integration?

Choose 2 answers

- A. Create a new Named Credential to store the GAM endpoint.
- B. Add the GAM endpoint in the OmniStudio Integration Procedure.
- C. Add the GAM URL as a new CSP Trusted Site.
- D. Create a new Auth. Provider that specifies the Consumer Key and Consumer Secret from GAM.

Answer: A,B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Before testing GAM integration, it is necessary to configure secure and proper connectivity. Creating a Named Credential in Salesforce secures the endpoint URL along with authentication details, which simplifies callouts. Adding the GAM endpoint to the OmniStudio Integration Procedure ensures that the system can route requests correctly. The Auth Provider creation is a valid step but not always required if Named Credentials handle authentication. Adding the GAM URL to the Content Security Policy (CSP) Trusted Sites ensures browser security for client-side interactions but is a secondary step.
