2025 Useful Exam C-CPI-2506 Overviews | 100% Free Valid Braindumps SAP Certified Associate - Integration Developer Pdf

Perhaps you still feel confused about our SAP Certified Associate - Integration Developer test questions when you browse our webpage. There must be many details about our products you would like to know. Do not hesitate and send us an email. Gradually, the report will be better as you spend more time on our C-CPI-2506 exam questions. As you can see, our system is so powerful and intelligent. What most important it that all knowledge has been simplified by our experts to meet all people's demands. So the understanding of the C-CPI-2506 Test Guide is very easy for you. Our products know you better.

SAP Certified Associate - Integration Developer Sample Questions (Q11-Q16):

NEW QUESTION # 11

You use an APIKey for authentication in an HTTPS API call. In which part of the Content Modifier is the APIKey included?

- A. Message header
- B. Attachment
- C. Exchange property
- D. Message body

Answer: A

Explanation:

To use an API key for authentication in an HTTPS API call, you must include the API key in the message header of the content modifier step. The message header contains information related to the message, such as addressing, routing, or metadata. You can use the content modifier step to create or modify message headers using expressions or constants. The API key is typically passed as a value of a specific header field, such as Authorization or X-API-Key, depending on the API provider's requirements. You can use the Camel Simple Expression Language to access or construct the API key value from variables, properties, or system information. Reference: Content Modifier | SAP Help Portal, Using Camel Simple Expression Language | SAP Help Portal

NEW QUESTION # 12

What are some advantages of creating an OData interface through an API provider? Note: There are 2 correct answers to this question.

- A. Automatic creation of a Swagger UI
- B. Automatic creation of a RAML specification
- C. Automatic creation of an openAPI specification
- D. Automatic creation of a WSDL specification

Answer: A,C

Explanation:

When an OData service is created through an API Provider in SAP API Management:

The system can automatically generate an OpenAPI specification from the OData service.

A Swagger UI is automatically created to enable interactive testing and documentation.

Other options:

WSDL specification # Used for SOAP-based services, not OData.

RAML specification # Supported, but not auto-generated by SAP API Management for OData services.

Hence, the correct advantages are:

Swagger UI generation

NEW QUESTION # 13

What are some advantages of the cloud integration capability within SAP Integration Suite? Note: There are 2 correct answers to this question.

- A. Predefined scenarios can be used out-of-the-box.
- B. A local installation is not required.
- C. Integration processes can be developed offline.
- D. Customer-to-Customer (C2C) integrations can be developed.

Answer: A,B

Explanation:

Advantages of Cloud Integration capability in SAP Integration Suite:

Predefined scenarios # SAP delivers integration content packages (iFlows) that can be used directly.

No local installation # It runs as a cloud service, no on-premise setup required.

Other options:

Offline development is not supported (development happens in Web UI).

Customer-to-Customer (C2C) integrations are not a standard positioning; it's mainly B2B, B2G, and SAP-to-3rd-party scenarios.

So, correct advantages are out-of-the-box scenarios and no local installation required.

NEW QUESTION # 14

Which functionalities are used by OData?

- A. TCP, AtomPub, and JSON
- B. HTTP, AtomPub, and JSON
- C. SOAP, AtomPub, and JSON

Answer: B

Explanation:

OData uses HTTP, AtomPub, and JSON as its core functionalities. OData is an open protocol that allows the creation and consumption of queryable and interoperable RESTful APIs in a simple and standard way. OData builds on HTTP as the application protocol for transferring data between clients and servers. OData uses AtomPub as one of the formats for representing data feeds and entries in XML. OData also uses JSON as another format for representing data feeds and entries in a lightweight and human-readable way. Reference: [Introducing OData - SAP Learning](#), [OData Overview](#) | [OData - The Best Way to REST](#)

NEW QUESTION # 15

Which SAP Integration Suite component delivers the Cloud Event to the "emis-s4hana-uc123" message queue?

- A. Open Connector
- B. API Management
- C. Event Mesh
- D. Process Integration

Answer: C

Explanation:

In SAP Integration Suite, the component responsible for delivering Cloud Events to message queues is Event Mesh.

Event Mesh handles event-driven communication and manages message queues like `emis-s4hana-uc123`.

Process Integration (PI/PO) is on-premise middleware, not part of Integration Suite cloud services.

API Management handles APIs, not messaging events.

Open Connectors provides connectivity to third-party SaaS apps, not queue management.

Thus, the Cloud Event is delivered to the message queue via Event Mesh.
