By choosing a good training site, you can achieve remarkable results. Exam4Tests has committed to provide all real SAP C-S4TM-2023 practice tests. Exam4Tests SAP C-S4TM-2023 exam dumps authorized by the supplier, with wide coverage can save a lot of time for you. Guarantee your success in the first attempt. If you do not pass the SAP Business Solutions C-S4TM-2023 Exam on your first attempt we will give you a FULL REFUND of your purchasing fee. Failing an Exam won't damage you financially as we provide 100% refund on claim.

## SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q66-Q71):

### NEW QUESTION # 66

What is used as the basis for the transportation processes in which you name a source location, a destination location, and any transshipment locations necessary to complete it?

Please choose the correct answer.

- A. Ensure regulatory
- B. Nonconformance management
- C. Unit-level traceability
- D. A freight unit

**Answer: D**

### NEW QUESTION # 67

You perform sales order scheduling for a material with enough stock on hand. Which dates on the sales order are updated by SAP TM? Note: There are 2 correct answers to this question.

- A. Delivery date
- B. Transportation planning date
- C. Material availability date
- D. Loading date

**Answer: A,D**

### NEW QUESTION # 68

Which of the following statements apply to packaging units?

Note: There are 2 correct answers to this question.

- A. A packaging unit is one or more packages transported together
- B. A packaging unit is needed for each stage

- C. Packaging units can have a packaging hierarchy
- D. Packaging units cannot be assigned to transportation units

**Answer: A,C**

#### NEW QUESTION # 69

What is the maximum number of freight settlement documents that can be created from a freight order with two deliveries during its lifecycle, given that all the charge elements in the calculation sheet have a value greater than zero?

- A. No limit
- B. 0
- C. 1
- D. 2

**Answer: A**

Explanation:

In SAP S/4HANA Transportation Management, freight settlement documents (FSDs) are created based on freight orders to settle charges with carriers. According to the SAP documentation, there is no limit to the number of FSDs that can be created from a freight order during its lifecycle, as additional FSDs can be generated for changes, such as additional charges, corrections, or disputes, provided the charge elements have non-zero values. For a freight order with two deliveries, multiple FSDs can be created to account for initial settlements, amendments, or additional charges (e.g., detention or assessorial charges) throughout the lifecycle.

The other options are incorrect:

\* A (3), B (1), and C (2) assume a fixed number of FSDs, which is not accurate since the system allows multiple FSDs based on changes or additional requirements.

Reference:

SAP S/4HANA Cloud Private Edition, Transportation Management Study Guide: Unit 5 - Charge Calculation and Freight Settlement, Section on Freight Settlement Documents.

SAP Help Portal: Transportation Management - Freight Settlement ().

#### NEW QUESTION # 70

In a side-by-side scenario, which of the following objects can you map from transportation management (TM) to materials management (MM)? Note: There are 2 correct answers to this question.

- A. TM charge type to MM service master
- B. TM charge category to MM G/L account
- C. TM charge type to MM service material group
- D. TM purchasing organization to MM purchasing organization

**Answer: A,D**

Explanation:

In a side-by-side scenario integrating SAP S/4HANA Transportation Management (TM) with Materials Management (MM), specific objects are mapped to ensure seamless data transfer. According to the SAP documentation:

\* TM charge type to MM service master (A) is mapped to link transportation-related charges to service master records in MM, enabling accurate service procurement.

\* TM purchasing organization to MM purchasing organization (C) is mapped to align the organizational structure between TM and MM, ensuring consistent purchasing processes.

The other options are incorrect:

\* TM charge category to MM G/L account (B) is not a standard mapping, as charge categories are higher-level groupings and are not directly linked to G/L accounts.

\* TM charge type to MM service material group (D) is not typically mapped, as service material groups are less specific than service master records.

Reference:

SAP S/4HANA Cloud Private Edition, Transportation Management Study Guide: Unit 5 - Charge Calculation and Freight Settlement, Section on TM-MM Integration.
