Tracking and reporting features of our SAP C_BCBTM_2509 practice exam software makes it easier for you to identify and overcome mistakes. Customization feature of this format allows you to change time limits and questions numbers of mock exams.

SAP Certified Associate - Positioning SAP Business Transformation Management Solutions Sample Questions (Q25-Q30):

NEW QUESTION # 25

What unique technology powers WalkMe's AI-first Digital Adoption Platform (DAP), enabling it to understand application context and drive adoption success?

- **A. DeepUI Technology**
- B. SAP Ecosystem Integration
- C. FedRAMP Certified Platform
- D. Library of Pre-Made Content

Answer: A

Explanation:

DeepUI Technology is the core AI capability within WalkMe's Digital Adoption Platform (DAP). It enables the platform to understand, interpret, and interact with user interfaces dynamically without requiring code-level integration.

"WalkMe's DeepUITM technology leverages AI to recognize and interact with any user interface element, allowing context-aware guidance and automation across applications." Reference:

Within SAP's BTM context, DeepUI allows WalkMe to seamlessly overlay SAP applications, providing real-time assistance and ensuring users complete digital processes correctly - a core aspect of digital adoption enablement.

"DeepUI powers WalkMe's AI-first approach, enabling contextual understanding of SAP Fiori, S/4HANA, and other applications for consistent adoption experiences." Option B (SAP Ecosystem Integration) describes compatibility, not the underlying AI engine.

Option C (Library of Pre-Made Content) is a feature, not a technology.

Option D (FedRAMP Certified Platform) refers to compliance for U.S. federal systems, not functionality.

Therefore, the verified and accurate answer based on SAP BTM and WalkMe documentation is A: DeepUI Technology.

NEW QUESTION # 26

What are the benefits of SAP Business Transformation Management solutions?

(Note: There are 2 correct answers to this question.)

- A. They are tools limited to IT landscape analysis and financial reporting.
- B. They are process mining tools which can help identifying process and IT infrastructure bottlenecks.
- **C. They empower organizations to drive digital transformation by enhancing process efficiency and IT infrastructure management.**
- **D. They provide visibility into processes, people, and applications and therefore support our customers in their ERP transformation.**

Answer: C,D

Explanation:

SAP Business Transformation Management (BTM) Solutions are comprehensive, cross-functional tools designed to give organizations visibility across business processes, people, and technology - empowering them to manage digital transformation effectively.

"SAP BTM solutions provide end-to-end visibility across processes, people, and applications, helping organizations streamline ERP transformation initiatives." Reference:

Visibility Across the Enterprise (Answer B):

SAP BTM combines the analytical power of SAP Signavio (process intelligence), SAP LeanIX (enterprise architecture), and WalkMe (adoption enablement) to support holistic transformation initiatives.

"BTM solutions provide a unified view of the business and IT landscape, ensuring transparency across processes, systems, and stakeholders." Driving Digital Transformation and Efficiency (Answer C):

These solutions enable companies to improve process performance and IT infrastructure through insight-driven optimization and modernization.

"By enhancing process efficiency and IT infrastructure management, SAP BTM empowers organizations to drive digital transformation with measurable business outcomes." Incorrect Options:

A: BTM solutions go far beyond IT analysis; they connect business, IT, and people perspectives.

D: While process mining is part of the suite (via Signavio), BTM offers much broader transformation management beyond mining alone.

Therefore, the verified answers are:

B: They provide visibility into processes, people, and applications and therefore support our customers in their ERP transformation.

C: They empower organizations to drive digital transformation by enhancing process efficiency and IT infrastructure management.

NEW QUESTION # 27

How does the integration between SAP Signavio and SAP LeanIX enhance IT and business alignment?

- A. The integration allows linking of business applications to business processes.
- B. Business processes are directly controlled by SAP LeanIX applications.
- C. Integration solely enhances reporting capabilities.
- D. The tools only provide visualization without actionable insights.

Answer: A

Explanation:

The integration between SAP Signavio and SAP LeanIX provides a unified view of business and IT, allowing companies to connect business processes (Signavio) with IT applications and systems (LeanIX). This integration bridges operational and architectural perspectives, ensuring full alignment between business goals and IT capabilities.

"Through the SAP Signavio and SAP LeanIX integration, organizations can link business processes to supporting IT applications, creating a shared view that strengthens IT-business alignment." Reference:

This integration supports transformation governance by combining process intelligence (what the business does) with enterprise architecture insights (how IT supports it).

"SAP enables enterprises to visualize dependencies between processes and applications, ensuring coordinated decision-making and improved transformation outcomes." Incorrect Options:

A: Reporting is a secondary feature; integration focuses on alignment, not reporting alone.

B: Both tools provide actionable insights via analytics and process intelligence.

C: LeanIX does not "control" processes; it maps IT dependencies and applications.

Verified Correct answer: D: The integration allows linking of business applications to business processes.

NEW QUESTION # 28

How does SAP differentiate itself from competitors in the area of business transformation?

- A. By providing a comprehensive suite of capabilities across all project phases with high integration.
- B. By focusing on traditional methodologies without leveraging data-driven insights.
- C. By limiting transparency and accessibility of insights and recommendations.
- D. By avoiding collaboration with ecosystem partners and other stakeholders.

Answer: A

Explanation:

SAP distinguishes itself in the transformation landscape through its comprehensive and fully integrated suite of Business Transformation Management (BTM) solutions. This suite connects business process intelligence (SAP Signavio), enterprise architecture management (SAP LeanIX), and digital adoption (WalkMe) into one end-to-end transformation framework.

"SAP differentiates itself by offering a comprehensive suite of integrated capabilities that cover every phase of business transformation - from discovery and design to implementation and adoption." Reference:

Unlike competitors that provide isolated tools, SAP enables continuous, data-driven transformation through unified visibility across business, IT, and adoption layers.

"SAP's integrated transformation platform supports data-driven insights, ecosystem collaboration, and transparency throughout the transformation journey." Incorrect Options:

A: SAP promotes transparency, not limits it.

B: SAP actively collaborates with partners (e.g., WalkMe, LeanIX, Signavio).

D: SAP uses modern, insight-driven approaches - not traditional static ones.

Verified Correct answer: C: By providing a comprehensive suite of capabilities across all project

NEW QUESTION # 29

Of the following options, which technologies does SAP provide to help organizations transform?

- A. SAP Sales and SAP HR
- **B. SAP Signavio and SAP LeanIX solutions**
- C. SAP ERP and SAP CRM
- D. SAP Finance and SAP Marketing

Answer: B

Explanation:

SAP enables digital transformation primarily through its Business Transformation Management (BTM) portfolio, led by SAP Signavio and SAP LeanIX. These technologies give organizations the tools to visualize, plan, and manage transformation initiatives effectively.

"SAP helps organizations accelerate transformation with SAP Signavio for business process transformation and SAP LeanIX for enterprise architecture and technology management." Reference:

SAP Signavio enables business process analysis, mining, and optimization, while SAP LeanIX supports enterprise architecture, application portfolio management, and technology risk compliance - together offering full visibility from business to IT.

"The combination of SAP Signavio and SAP LeanIX forms the backbone of SAP's transformation offerings, aligning business process improvements with IT landscape modernization." Incorrect Options:

A, B, and C refer to standard ERP or LOB modules, not transformation-focused solutions.

Verified Correct answer: D: SAP Signavio and SAP LeanIX solutions.

NEW QUESTION # 30

.....

Our C_BCBTM_2509 exam simulation is accumulation of knowledge about the exam strictly based on the syllabus of the exam. They give users access to information and exam, offering simulative testing environment when you participate it like in the classroom.
