SAP P_BTPA_2408 Exam Study Guide, P_BTPA_2408 Actual Exam

Stop wasting time on meaningless things. There are a lot wonderful things waiting for you to do. You still have the opportunities to

become successful and wealthy. The P_BTPA_2408 study materials is a kind of intelligent learning assistant, which is capable of aiding you pass the P_BTPA_2408 Exam easily. If you are preparing the exam, you will save a lot of troubles with the guidance of our P_BTPA_2408 study materials. Our company is aimed at relieving your pressure from heavy study load. So we strongly advise you to have a try.

SAP P_BTPA_2408 Exam Syllabus Topics:

Topic	Details
Topic 1	• SAP Key Methodologies: Your grasp of key methodologies such as SAP Integration Solution Advisory Methodology, SAP Application Extension Methodology, and SAP Data Analytics Methodology will be assessed in the SAP P_BTPA_2408 exam.
Topic 2	• SAP BTP Account Model: You will need to be well-versed in the SAP BTP account model, services, capabilities, including AI, and suite qualities to become a certified SAP Solution Architect.
Topic 3	• Solution Architecture: For the SAP P_BTPA_2408 Exam, understanding Solution Architecture is crucial for demonstrating your proficiency as an SAP Solution Architect. This section will test your knowledge of SAP reference architecture, the Intelligent Enterprise framework, and your ability to navigate the SAP Business Technology Platform (BTP).

SAP Certified Professional - Solution Architect - SAP BTP Sample Questions (Q23-Q28):

NEW QUESTION # 23

As a solution architect, you are asked for your opinion on an optimal integration. You are told that the data resides in two places, SAP S/4HANA (on-premise) and third party APIs. You are also told the following requirements:

*Periodically read the data from both systems, perform several transformations of the data, and forward the results to a business partner.

*Monitoring is to be done by a dedicated group from IT with SAP products.

*Maintenance of the integration part has a small budget, limited time, and limited resources. Which of the following solutions would you recommend as optimal for the design?

- A. A custom SAP Fiori App and Grafana
- **B. SAP Integration Suite and SAP Cloud ALM**
- C. SAP Build Process Automation and SAP Solution Manager
- D. SAP Build Apps and SAP Cloud ALM

Answer: B

NEW QUESTION # 24

A customer is struggling with organizing and managing the immense amount of data generated by the business. They have been told about several possible solutions that SAP BTP offers; however, they are confused about which solutions they should use. Their data is highly structured and includes customers, sales orders, and purchase orders. The data needs to be stored for both transactional and reporting purposes in a vector database. The client prefers to use the latest SAP solutions.

Which of the following SAP BTP solutions would you recommend?

- A. SAP Analytics Cloud
- B. SAP HANA Cloud, data lake
- **C. SAP HANA Cloud**
- D. SAP Datasphere

Answer: C

Explanation:

The customer needs a solution to store highly structured data (e.g., customers, sales orders, purchase orders) for transactional and reporting purposes, and they prefer the latest SAP solutions. SAP HANA Cloud is the most suitable option:

* Why SAP HANA Cloud?

- * Transactional and Analytical Workloads: Supports hybrid use cases for storing transactional data and enabling reporting/analytics.
- * Structured Data Management: Optimized for handling structured datasets such as sales and purchase orders.
- * Built-In Advanced Features: Includes machine learning and graph modeling capabilities to complement structured data storage.
- * Why Not Other Options?
- * SAP HANA Cloud, data lake (A): Suitable for unstructured or semi-structured data storage, but not optimized for transactional use cases.
- * SAP Datasphere (B): Designed for semantic data modeling and integration but relies on SAP HANA Cloud as the backend database.
- * SAP Analytics Cloud (D): A front-end analytics solution, not a database for structured transactional data storage.

References:

- * SAP HANA Cloud Overview
- * SAP BTP Data Management Solutions

NEW QUESTION # 25

A fit-to-standard analysis determined that the provided SAP Fiori App for SAP S/4HANA Cloud private edition was insufficient based on existing business requirements, and that a new front-end app must be built.

As a solution architect, you are asked to propose a solution and are told the following:

- * The backend logic running on SAP S/4HANA Cloud private edition is sufficient and an appropriate remote API for create, read, update, and delete (CRUD) operations exists.
- * The front-end app must be able to run on a variety of devices such as mobile phones and tablets.
- * Front-end app instances must scale up or down automatically based on administrator- provided scaling parameters.

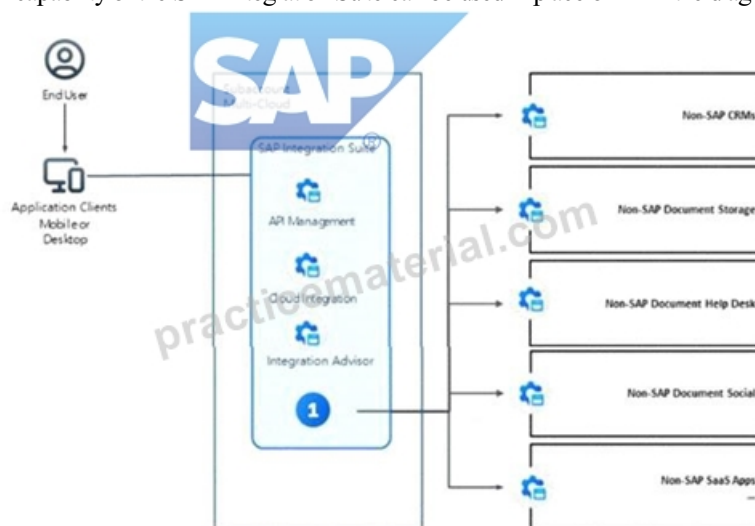

Which of the following runtimes would be optimal for the new front-end app? Note: There are 2 correct answers to this question.

- A. SAP BTP, ABAP environment
- B. SAP BTP, Kyma runtime
- C. SAP BTP, Cloud Foundry runtime
- D. SAP BTP, Neo environment

Answer: B,C

NEW QUESTION # 26

The following design (see attached diagram) uses third-party REST APIs that are publicly available through the internet. Which capability of the SAP Integration Suite can be used in place of "1" in the diagram?

- A. SAP Cloud Connector
- B. SAP Connectivity Service
- C. SAP Business Connector
- D. SAP Open Connectors

Answer: D

Explanation:

VSAP Open Connectors is the most appropriate capability for replacing "I" in the diagram, as it enables seamless integration with third-party REST APIs.

* Why SAP Open Connectors?

* Provides pre-built connectors for third-party REST APIs, ensuring easier integration with publicly available APIs over the internet.

* Includes features like authentication, API abstraction, and unified access to multiple non-SAP services.

* Other Options:

* B (SAP Cloud Connector): Used for secure connectivity between SAP BTP and on-premise systems, not for public REST APIs.

* C (SAP Business Connector): Legacy solution for integrating SAP and non-SAP systems, not ideal for REST API integration.

* D (SAP Connectivity Service): Provides general network connectivity but lacks the specific API management and abstraction features of Open Connectors.

References:

* SAP Open Connectors Overview

NEW QUESTION # 27

As a solution architect, you are in a meeting about the design of a new application to manage the delivery process of goods or services. The extension will be maintained by the line of business (as opposed to IT).

The following application parameters/features are discussed:

*Tracking deliveries in real-time

*Optimizing delivery routes

*Providing delivery notifications to customers.

*Scaling according to usage

*Maintenance downtime must be short.

Which extension type is best suited for this application?

- A. Key user
- **B. Side-by-side**
- C. Classic

Answer: B

Explanation:

A side-by-side extension is best suited for an application that requires:

* Real-time tracking of deliveries.

* Optimization algorithms for delivery routes.

* High scalability and minimal maintenance downtime.

By developing this extension in SAP BTP, it can run independently of the core ERP system, allowing for scaling and agility, which is essential for line-of-business-managed solutions.

Side-by-side extensions leverage cloud services and ensure that maintenance or updates to the extension do not disrupt the core system.

NEW QUESTION # 28

.....

While all of us enjoy the great convenience offered by P_BTPA_2408 information and cyber networks, we also found ourselves more vulnerable in terms of security because of the inter-connected nature of information and cyber networks and multiple sources of potential risks and threats existing in P_BTPA_2408 information and cyber space. Taking this into consideration, our company can provide the best electronic P_BTPA_2408 Exam Torrent for you in this website. I strongly believe that under the guidance of our P_BTPA_2408 test torrent, you will be able to keep out of troubles way and take everything in your stride.
