We can make a promise to you that our study

materials will be the best C_SIGDA_2403 study guide for you to prepare for your exam.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q46-Q51):

NEW QUESTION # 46

What is the Process Conformance Widget used for?

- A. Visualizing the way tasks are performed and backtracking the process flow
- B. Visualizing the traffic through your process
- C. Visualizing different variants against a BPMN model of a process
- D. Visualizing the performance indicators

Answer: C

Explanation:

The Process Conformance Widget in SAP Signavio is used for visualizing different variants of a process against a predefined BPMN model. This tool is instrumental in identifying deviations from the intended process model, highlighting areas where the actual process flow differs from the designed flow. Such insights are critical for understanding process compliance, identifying unauthorized or inefficient variations, and taking corrective actions to align actual process execution with organizational standards and expectations. It is not primarily focused on backtracking process flow, visualizing performance indicators, or monitoring traffic through the process, but rather on conformance to the modeled process. References: SAP Signavio Documentation

NEW QUESTION # 47

What can be used to create a workflow? Note: There are 3 correct answers to this question.

- A. Activities
- B. Gateways
- C. Events
- D. Attributes
- E. Artifacts

Answer: A,B,C

NEW QUESTION # 48

What do Timer Events and Conditional Events have in common?

- A. They can only be catching-type events.
- B. They can only be used as end events.
- C. They can only be used as start events.
- D. They can only be throwing-type events.

Answer: A

Explanation:

Timer Events and Conditional Events in the context of BPMN (Business Process Model and Notation) share a common characteristic: they can only be catching-type events. Catching events are used to represent a point in the process where the flow waits for something to happen. Timer Events wait for a specific point in time or duration, while Conditional Events wait for a specific condition to become true. Neither can initiate a process flow (hence, not starting events) nor end a process flow but act within the process to catch or wait for their respective triggers.

NEW QUESTION # 49

Who becomes Tenant Owner of a workspace in SAP Signavio Process Manager?

- A. Dedicated users selected by the administrator
- B. Every user who is assigned to the user group Tenant Owner
- C. Every user who is assigned to the user group Administrators account
- **D. The initial user who registered for a workspace**

Answer: D

Explanation:

The Tenant Owner of a workspace in SAP Signavio Process Manager is:

- * Option D (The initial user who registered for a workspace): The Tenant Owner role is automatically assigned to the initial user who creates or registers for the workspace. This user has the highest level of administrative rights, including managing user permissions, configuring the workspace, and overseeing
- * the overall use of SAP Signavio within the organization. This role is crucial for ensuring the security and proper governance of the process modeling environment.

- * SAP Signavio Administration Guide
- * SAP Signavio User Management Documentation

NEW QUESTION # 50

How would you start capturing process documentation? Note: There are 3 correct answers to this question.

- A. Creating task descriptions
- **B. Conducting process interviews**
- **C. Running workshops with process participants**
- D. Verifying customer data
- **E. Creating process-related surveys**

Answer: B,C,E

Explanation:

Capturing process documentation in SAP Signavio involves gathering detailed information about how processes are executed. The SAP Signavio Process Manager Documentation provides guidance:

- * Exact Extract:"To capture process documentation, organizations should:
- * Run workshops with process participants to map out process steps and responsibilities.
- * Create process-related surveys to collect input from stakeholders on process details.
- * Conduct process interviews to gather in-depth insights from key process owners or performers." (SAP Signavio Process Manager User Guide, section on "Process Documentation Methods").
- * Explanation:
- * Option A (Running workshops with process participants):Workshops bring together stakeholders to collaboratively map processes, identify steps, and document roles, often using tools like SAP Signavio Process Manager for modeling.
- * Option D (Creating process-related surveys):Surveys collect feedback from a broader group of process participants, capturing details about tasks, challenges, or variations that may not emerge in workshops.
- * Option E (Conducting process interviews):Interviews with process owners or key performers provide detailed, qualitative insights into process execution, helping to refine documentation.
- * Option B (Creating task descriptions)is incorrect as task descriptions are an output of documentation, not a method to start capturing it.
- * Option C (Verifying customer data)is incorrect because customer data verification is related to data quality, not process documentation.
