In the process of using the Google Cloud Certified - Professional Cloud Database Engineer study training dumps, once users have any questions about our study materials, the user can directly by E-mail us, our products have a dedicated customer service staff to answer for the user, they are 24 hours service for you, we are very welcome to contact us by E-mail and put forward valuable opinion for us. Our Professional-Cloud-Database-Engineer latest questions already have many different kinds of learning materials, users may be confused about the choice, what is the most suitable Professional-Cloud-Database-Engineer Test Guide? Believe that users will get the most satisfactory answer after consultation. Our online service staff is professionally trained, and users' needs about Professional-Cloud-Database-Engineer test guide can be clearly understood by them. The most complete online service of our company will be answered by you, whether it is before the product purchase or the product installation process, or after using the Professional-Cloud-Database-Engineer latest questions, no matter what problem the user has encountered.

The most important thing for preparing the Professional-Cloud-Database-Engineer exam is reviewing the essential point. In order to service the candidates better, we have issued the Professional-Cloud-Database-Engineer test prep for you. Our company has accumulated so much experience about the test. So we can predict the real test precisely. Almost all questions and answers of the real exam occur on our Professional-Cloud-Database-Engineer Guide braindumps. That means if you study our study guide, your passing rate is much higher than other candidates. Preparing the exam has shortcut.

## Valid Professional-Cloud-Database-Engineer Exam Bootcamp & Professional-Cloud-Database-Engineer Simulation Questions

If you don't professional fundamentals, you should choose our Google Professional-Cloud-Database-Engineer new exam simulator online rather than study difficultly and inefficiently. Learning method is more important than learning progress when your goal is obtaining certification. For IT busy workers, to buy Professional-Cloud-Database-Engineer new exam simulator online not only will be a high efficient and time-saving method for most candidates but also the highest passing-rate method.

## Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q113-Q118):

### NEW QUESTION # 113

Your organization has an existing app that just went viral. The app uses a Cloud SQL for MySQL backend database that is experiencing slow disk performance while using hard disk drives (HDDs). You need to improve performance and reduce disk I/O wait times. What should you do?

- A. Create a read replica of the instance with SSDs, and perform a failover to the new instance
- **B. Export the data from the existing instance, and import the data into a new instance with solid-state drives (SSDs).**
- C. Edit the instance to change the storage type from HDD to SSD.
- D. Create a high availability (HA) failover instance with SSDs, and perform a failover to the new instance.

**Answer: B**

Explanation:

<https://stackoverflow.com/questions/72034607/can-i-change-storage-type-from-hdd-to-ssd-on-cloud-sql-after-creating-an-instance>

### NEW QUESTION # 114

Your organization operates in a highly regulated industry. Separation of concerns (SoC) and security principle of least privilege (PoLP) are critical. The operations team consists of:

Person A is a database administrator.

Person B is an analyst who generates metric reports.

Application C is responsible for automatic backups.

You need to assign roles to team members for Cloud Spanner. Which roles should you assign?

- **A. roles/spanner.databaseAdmin for Person A  
roles/spanner.databaseReader for Person B  
roles/spanner.backupWriter for Application C**
- B. roles/spanner.databaseAdmin for Person A  
roles/spanner.databaseUser for Person B  
roles/spanner.backupWriter for Application C
- C. roles/spanner.databaseAdmin for Person A  
roles/spanner.databaseReader for Person B  
roles/spanner.backupAdmin for Application C
- D. roles/spanner.databaseAdmin for Person A  
roles/spanner.databaseUser for Person B  
roles/spanner.databaseReader for Application C

**Answer: A**

Explanation:

<https://cloud.google.com/spanner/docs/iam#spanner.backupWriter>

### NEW QUESTION # 115

Your company is using Cloud SQL for MySQL with an internal (private) IP address and wants to replicate some tables into BigQuery in near-real time for analytics and machine learning. You need to ensure that replication is fast and reliable and uses Google-managed services. What should you do?

- A. Use Database Migration Service to replicate tables into BigQuery.
- B. Develop a custom data replication service to send data into BigQuery.
- C. Use Cloud SQL federated queries.
- **D. Use Datastream to capture changes, and use Dataflow to write those changes to BigQuery.**

**Answer: D**

Explanation:

"Datastream is a serverless and easy-to-use Change Data Capture (CDC) and replication service that allows you to synchronize data across heterogeneous databases, storage systems, and applications reliably and with minimal latency. Datastream supports change data streaming from Oracle and MySQL databases to Google Cloud Storage (GCS). The service offers streamlined integration with Dataflow templates to power up to date materialized views in BigQuery for analytics, replicate their databases into Cloud SQL or Cloud Spanner for database synchronization, or leverage the event stream directly from GCS to realize event-driven

architectures."

#### NEW QUESTION # 116

You are building an Android game that needs to store data on a Google Cloud serverless database. The database will log user activity, store user preferences, and receive in-game updates. The target audience resides in developing countries that have intermittent internet connectivity. You need to ensure that the game can synchronize game data to the backend database whenever an internet network is available. What should you do?

- A. Use Firestore.
- **B. Use Cloud SQL with an external (public) IP address.**
- C. Use Cloud Spanner.
- D. Use an in-app embedded database.

**Answer: B**

#### NEW QUESTION # 117

You are configuring a new application that has access to an existing Cloud Spanner database. The new application reads from this database to gather statistics for a dashboard. You want to follow Google-recommended practices when granting Identity and Access Management (IAM) permissions. What should you do?

- A. Create a new service account, and grant it the spanner.databases.select permission.
- B. Create a new service account, and grant it the Cloud Spanner Database Reader role.
- **C. Create a new service account, and grant it the Cloud Spanner Database Admin role.**
- D. Reuse the existing service account that populates this database.

**Answer: C**

#### NEW QUESTION # 118

.....

After successful competition of the Google Professional-Cloud-Database-Engineer certification, the certified candidates can put their career on the right track and achieve their professional career objectives in a short time period. For the recognition of skills and knowledge, more career opportunities, professional development, and higher salary potential, the Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) certification exam is the proven way to achieve these tasks quickly.
