Quiz 2025 Fortinet High-quality NSE6_FSW-7.2 Passed

Are you still worried about the complex NSE6_FSW-7.2 exam? Do not be afraid. NSE6_FSW-7.2 exam dumps and answers from our FreePdfDump site are all created by the IT talents with more than 10 years' certification experience. Moreover, NSE6_FSW-7.2 Exam Dumps and answers are the most accuracy and the newest inspection goods.

Fortinet NSE 6 - FortiSwitch 7.2 Sample Questions (Q40-Q45):

NEW QUESTION # 40

Which two rules used by MSTP are similar to rules used by other STP methods? (Choose two.)

- A. MSTP uses root bridge selection, similar to rapid STP
- B. MSTP uses timers for transitioning the ports, similar to regular STP.
- C. MSTP uses alternate path and primary path, similar to regular STP.
- D. MSTP uses port role election, similar to rapid STP on the instances.

Answer: A,D

Explanation:

"MSTP is based on RSTP", so the same port role election and the same root bridge selection. Reference: FortiSwitch 7.2 Study

NEW QUESTION # 41

Which LLDP-MED Type-Length-Values does FortiSwitch collect from endpoints to track network devices and determine their characteristics?

- A. Location
- B. Power management
- C. Network policy
- **D. Inventory management**

Answer: D

NEW QUESTION # 42

In which two ways can you assign a FortiSwitch port to a VDOM using multi-tenancy setup? (Choose two.)

- A. Remove the managed FortiSwitch and allocate ports directly on FortiSwitch.
- **B. Create a virtual port pool on the FortiGate CLI.**
- **C. Switch the FortiLink interface to the target VDOM.**
- D. Assign a port to a VDOM directly on the managed FortiSwitch.

Answer: B,C

Explanation:

In a multi-tenancy setup on FortiGate, you can assign a FortiSwitch port to a VDOM in two primary ways:

Switch the FortiLink Interface to the Target VDOM (A): This method involves configuring the FortiLink interface, which is the dedicated interface used to manage FortiSwitch units from FortiGate, to operate within a specific VDOM. This effectively assigns all ports on the FortiSwitch, managed through that FortiLink interface, to the designated VDOM.

Create a Virtual Port Pool on the FortiGate CLI (C): Virtual port pools are created on FortiGate and allow ports from FortiSwitch to be grouped and assigned to a VDOM. This method is more granular and flexible, as it allows specific ports on the FortiSwitch to be dedicated to different VDOMs without requiring the entire switch or FortiLink interface to be dedicated to a single VDOM.

NEW QUESTION # 43

Refer to the diagnostic output:

```

# diagnose switch-controller switch-info mac-table
Vdom: root
S224EPTF19005928 0 :
MAC address Interface vlan
=====
04:d5:90:39:73:3d internal 4092
04:d5:90:3e:e2:88 port1 4089
00:50:56:96:e3:fc GVM1V0000141680 4089
04:d5:90:39:73:3d internal 4094
00:50:56:96:e3:fc GVM1V0000141680 4094
```

Two entries in the exhibit show that the same MAC address has been used in two different VLANs. Which MAC address is shown in the above output?

- A. It is a MAC address of FortiGate in HA configuration.
- B. It is a MAC address of an upstream FortiSwitch.
- **C. It is a MAC address of a switch that accepts multiple VLANs.**

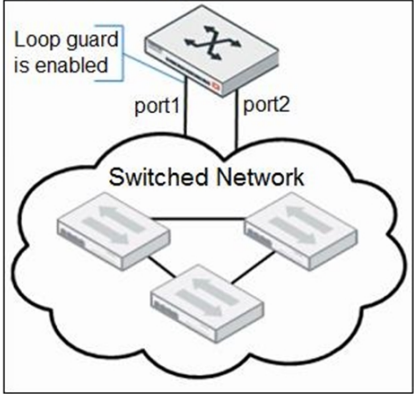

- D. It is a MAC address of FortiLink interface on FortiGate.

Answer: C

NEW QUESTION # 44

Exhibit.

LoopGuard-setup

LoopGuard-setup

```
# diagnose switch-controller switch-info loop-guard S108EF4N17000029:
S108EF4N17000029:
```

Portname	State	Status	Timeout (m)	Mac-Move	Count	Last-Event
port1	enabled	Triggered	2	0	1	2021-02-19 15:50:35
port2	disabled	-	-	-	-	-
port3	disabled	-	-	-	-	-
port4	disabled	-	-	-	-	-
port5	disabled	-	-	-	-	-
port6	disabled	-	-	-	-	-
port9	disabled	-	-	-	-	-
port10	disabled	-	-	-	-	-
8EF4N17000030-0	disabled	-	-	-	-	-
_FlInK1_MLAG0_	disabled	-	-	-	-	-

port1 and port2 are the only ports configured with the same native VLAN 10.

What are two reasons that can trigger port1 to shut down? (Choose two.)

- A. An endpoint sent a BPDU on port1 that it received from another interface.
- B. STP triggered a loop and applied loop guard protection on port1.
- C. Loop guard frame sourced from port1 was received on port1.
- D. port1 was shut down by loop guard protection.

Answer: C,D

NEW QUESTION # 45

.....

Our NSE6_FSW-7.2 Exam Dumps with the highest quality which consists of all of the key points required for the NSE6_FSW-7.2 exam can really be considered as the royal road to learning. FreePdfDump has already become a famous brand all over the world in this field since we have engaged in compiling the NSE6_FSW-7.2 practice materials for more than ten years and have got a fruitful outcome. You are welcome to download the free demos to have a general idea about our NSE6_FSW-7.2 training materials.
