

100% Pass Updated Microsoft - PL-600 Valid Test Labs

What's more, part of that Real4exams PL-600 dumps now are free: <https://drive.google.com/open?id=1jP7miKBi5Yowq4KIvpPxWXalfg7mmnR>

The more you can clear your doubts, the more easily you can pass the Microsoft Power Platform Solution Architect (PL-600) exam. Real4exams PL-600 practice test works amazingly to help you understand the PL-600 exam pattern and how you can attempt the real Microsoft Exam Questions. It is just like the final PL-600 exam pattern and you can change its settings. When you take Real4exams Microsoft PL-600 Practice Exams, you can know whether you are ready for the finals or not. It shows you the real picture of your hard work and how easy it will be to clear the PL-600 exam if you are ready for it.

The Related Certification Details

The Microsoft PL-600 test is connected with an expert-level certification, Microsoft Certified: Power Platform Solution Architect Expert. This certificate justifies the essential and time-critical cognizance related to Power Platform, customer engagement apps (Dynamics 365), relevant cloud solutions by Microsoft, and third-party technologies.

Microsoft PL-600 exam is a valuable certification for professionals who want to demonstrate their expertise in designing solutions using the Power Platform. PL-600 exam covers a broad range of topics and is suitable for individuals with different backgrounds and experience levels. Earning the certification can enhance an individual's career prospects and help them stand out in the job market.

Microsoft PL-600 Certification Exam consists of multiple-choice questions that assess a candidate's knowledge of the Power Platform and their ability to design and implement solutions using its various applications. PL-600 exam covers topics such as data modeling, user experience design, automation workflows, and security configurations. Earning this certification can help professionals advance their career in the technology field and demonstrate their expertise to potential employers and clients.

Microsoft PL-600 PDF Dumps Format - A Convenient Preparation Method

Through the feedback of many examinees who have used Real4exams's training program to pass some IT certification exams, it proves that using Real4exams's products to pass IT certification exams is very easy. Recently, Real4exams has developed the newest training solutions about the popular Microsoft Certification PL-600 Exam, including some pertinent simulation tests that will help you consolidate related knowledge and let you be well ready for Microsoft certification PL-600 exam.

Microsoft Power Platform Solution Architect Sample Questions (Q153-Q158):

NEW QUESTION # 153

A multinational organization uses a single Microsoft Power Platform environment. The instance hosts multiple customizations for different users in different regions.

Users in some regions complain about slow load time of the customizations.

You need to architect a solution based on the main requirement.
 What should you recommend? To answer, select the appropriate option in the answer area.
 NOTE: Each correct selection is worth one point.

Answer Area

Goal	Suggested solution
Divisions actively collaborate on customers.	Single instance; use Microsoft Azure Traffic Manager where needed Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance
Regions have separate customers but use the same functionality and need global reporting.	Multiple instances in different regions with data replication Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance
Regions have separate functionality and customers but need global reporting on data.	Single instance; use Microsoft Azure Traffic Manager Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance

Answer:

Explanation:

Goal	Suggested solution
Divisions actively collaborate on customers.	Single instance; use Microsoft Azure Traffic Manager where needed Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance
Regions have separate customers but use the same functionality and need global reporting.	Multiple instances in different regions with data replication Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance
Regions have separate functionality and customers but need global reporting on data.	Single instance; use Microsoft Azure Traffic Manager Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance

Explanation:

Goal	Suggested solution
Divisions actively collaborate on customers.	Single instance; use Microsoft Azure Traffic Manager where needed Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance
Regions have separate customers but use the same functionality and need global reporting. NEW QUESTION # 154

You need to design a Power Platform solution that meets the following requirements:

Capture data from a row during deletion to be used in an automated process.

Use AI to process forms and automate data entry from paper-based forms.

Which requirements can be met by using out-of-the box Power Platform components?

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

	Yes	No
Capture data from a row during deletion to be used in an automated process.	☐	☐
Use AI to process forms and automate data entry from paper-based forms.	☐	☐

Answer:

Explanation:

	Yes	No
Capture data from a row during deletion to be used in an automated process.	☒	☐
Use AI to process forms and automate data entry from paper-based forms.	☒	☐

Explanation

	Yes	No
Capture data from a row during deletion to be used in an automated process.	☐	☐
Use AI to process forms and automate data entry from paper-based forms.	☐	☐

Box 1: Yes

This can be done with Dataverse flows: The When a row is added, modified or deleted trigger runs a flow whenever a row of a selected table and scope changes or is created.

Box 2: Yes

AI Builder is a Microsoft Power Platform capability that provides AI models that are designed to optimize your business processes. AI Builder enables your business to use AI to automate processes and glean insights from your data in Power Apps and Power Automate.

NEW QUESTION # 155

A company plans to integrate a model-driven app with external data sources. The company has the following requirements:

* Consume data in its data warehouse from Microsoft Dataverse.

* Use a plug-in to retrieve information from an external service.

You need to recommend a Microsoft Azure component for each requirement.

Which Azure components should you recommend? To answer, drag the appropriate Azure components to the correct requirements. Each Azure component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

	Requirement	Azure component
Azure Event Hub	Consume data in a data warehouse.	
Azure Service Bus	Consume data from an external source.	
Azure Data Factory		
Azure Synapse Link		

Answer:

Explanation:

The screenshot shows the 'Answer Area' of a solution designer. On the left, a list of Azure components is shown: Azure Event Hub, Azure Service Bus, Azure Data Factory, and Azure Synapse Link. On the right, the 'Requirement' section lists two requirements: 'Consume data in a data warehouse.' and 'Consume data from an external source.' The 'Azure component' section on the far right shows the selected components: Azure Data Factory and Azure Service Bus.

Explanation:

This screenshot is identical to the one above, showing the 'Answer Area' with the same list of Azure components, requirements, and selected components.

NEW QUESTION # 156

You are designing a Microsoft Power Platform solution for a financial services company. Data from existing financial systems will be imported into Microsoft Dataverse and displayed to users as part of the app deployment.

The company has the following issues with data:

- * Phone numbers in records can contain letters in the record.
- * Security has not been applied to financial total values held in each record.
- * Users and managers can see all records.

You need to apply data quality standards to the solution.

What should you recommend? To answer, drag the appropriate solutions to the correct data quality items.

Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

The screenshot shows the 'Answer Area' of a solution designer. On the left, a list of solutions is shown: Masking rules, Field-level security, and Hierarchical security. On the right, the 'Data quality item' section lists three items: 'Phone numbers must contain only numbers.', 'Account financial totals are secured for only authorized users to access.', and 'Users must be able to view their records and managers must be able to view records for their team.' The 'Solution' section on the far right shows three empty boxes for selecting solutions.

Answer:

Explanation:

This screenshot is identical to the one above, showing the 'Answer Area' with the same list of solutions, data quality items, and empty solution boxes.

Explanation:

This screenshot is identical to the one above, showing the 'Answer Area' with the same list of solutions, data quality items, and empty solution boxes.

NEW QUESTION # 157

A company uses Microsoft Power Platform solutions.

The company plans to set up application lifecycle management (AIM) capabilities to store the solutions in source control, which will

be used to automate the release process.

You need to set up the initial ALM infrastructure to store the solutions in source control.

Which four actions should you perform in sequence?

To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Run the pipeline.
- Create an Export pipeline.
- Create an Azure DevOps Project.
- Install the Microsoft Power Platform Build Tools.
- Create a Release pipeline.
- Add a task for Microsoft Power Platform Import Solution.

Steps

-
-
-
-

Answer:

Explanation:

Actions

- Run the pipeline.
- Create an Export pipeline.
- Create an Azure DevOps Project.
- Install the Microsoft Power Platform Build Tools.
- Create a Release pipeline.
- Add a task for Microsoft Power Platform Import Solution.

Steps

- 1 Create an Azure DevOps Project.
- 2 Install the Microsoft Power Platform Build Tools.
- 3 Create a Release pipeline.
- 4 Add a task for Microsoft Power Platform Import Solution.

Explanation

Actions

- Run the pipeline.
