

100% Pass VMware - 2V0-16.25 - Perfect VMware vSphere Foundation 9.0 Administrator Trustworthy Source

VMware vSphere®
Foundation

P.S. Free 2025 VMware 2V0-16.25 dumps are available on Google Drive shared by TestPassKing: https://drive.google.com/open?id=1AC9am5M5KOVl5W1l19u_kFhEjFItMs6Q

The 24/7 support system is available for our customers so that they can message us anytime. We will solve all of their queries or assist them in everything as soon as possible. Free demos and up to 365 days of free updates are also available at TestPassKing. Buy the VMware 2V0-16.25 Exam Dumps now and achieve your destination with us!!

VMware 2V0-16.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.
Topic 2	<ul style="list-style-type: none">Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.
Topic 3	<ul style="list-style-type: none">VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.

Topic 4	<ul style="list-style-type: none"> • Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.
Topic 5	<ul style="list-style-type: none"> • Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.

Free PDF VMware - 2V0-16.25 - VMware vSphere Foundation 9.0 Administrator –Efficient Trustworthy Source

With all the above merits, the most outstanding one is 100% money back guarantee of your success. Our 2V0-16.25 experts deem it impossible to drop the exam, if you believe that you have learnt the contents of our 2V0-16.25 study guide and have revised your learning through the 2V0-16.25 Practice Tests. If you still fail to pass the exam, you can take back your money in full without any deduction. Such bold offer is itself evidence on the excellence of our products and their indispensability for all those who want success without any second thought.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q49-Q54):

NEW QUESTION # 49

An administrator is tasked with deploying a VMware Cloud Foundation (VCF) Operations for Logs appliance into vSphere Foundation.

After downloading the .ova, which component does the administrator use to deploy the file?

- A. VCF Fleet Management
- **B. vSphere Client**
- C. VCF Operations
- D. VCF Automation

Answer: B

Explanation:

To deploy the VCF Operations for Logs OVA appliance:

- * The vSphere Client is used to deploy .ova and .ovf templates directly into a vCenter environment.
- * After deployment, the appliance can be configured and integrated with VCF.

Other options:

- * A. VCF Fleet Management# Used for multi-instance management, not OVA deployment.
- * C. VCF Automation# Provides automation workflows, not appliance deployment.
- * D. VCF Operations# Monitoring and analytics platform, not used for OVA installs.

References:

VMware Cloud Foundation 9.0 -Deploying VCF Operations for Logs Appliance VMware Docs: Deploy OVF/OVA Templates Using vSphere Client

NEW QUESTION # 50

An administrator must configure identity access for VMware vSphere Foundation (VVF) to allow admin accounts from the enterprise Active Directory domain corp.local to log in using domain credentials. Security requires authentication to use the default Active Directory protocol, without federation.

Which configuration step is required to enable Active Directory users to authenticate to vCenter?

- A. Add the domain controller certificate to the Trusted Root store in vCenter.
- B. Configure Identity Federation using SAML with corp.local.
- **C. Add Active Directory over LDAP as an identity source.**
- D. Configure a trusted identity provider using OpenID Connect (OIDC).

Answer: C

Explanation:

To allow Active Directory domain users (corp.local) to authenticate in vCenter with domain credentials:

* The correct method is configuring Active Directory over LDAP as an identity source. (D)

* This uses the default AD protocol (LDAP/Kerberos) without requiring SAML or OIDC federation.

Other options:

* A. Adding domain controller certificate# Needed for LDAPS but not the main step.

* B. Identity Federation with SAML# Requires federation, not allowed per requirements.

* C. OpenID Connect (OIDC)# Used for external IdPs, not traditional AD auth.

VMware Docs: Add AD over LDAP as Identity Source

NEW QUESTION # 51

An administrator is tasked with importing a vSphere Lifecycle Manager image and applying it to a cluster containing six hosts, with two of the hosts in maintenance mode. The administrator uses the vSphere Client, navigates to the cluster, and edits the remediation settings to enable Parallel Remediation and clicks the Remediate All button to execute the remediation process.

What is the expected result of this remediation process?

- A. The image is remediated on the hosts in maintenance mode in parallel, and when completed the hosts not in maintenance mode are remediated in parallel.
- B. The image is remediated on the four hosts not in maintenance mode, in sequence. The hosts in maintenance mode are not remediated.
- C. The image is remediated on the four hosts not in maintenance mode, in parallel. The hosts in maintenance mode are not remediated.
- **D. The image is remediated on the hosts in maintenance mode in parallel. The hosts not in maintenance mode are not remediated.**

Answer: D

Explanation:

When using vSphere Lifecycle Manager (vLCM) with Parallel Remediation enabled, the following rules apply:

* Parallel remediation only applies to ESXi hosts that are already in Maintenance Mode.

* vLCM does not put hosts into Maintenance Mode automatically in this mode.

* Similarly, it does not exit Maintenance Mode automatically after remediation.

* Hosts not in Maintenance Mode are skipped.

* If Parallel Remediation is activated, vLCM remediates only those hosts that are already in Maintenance Mode.

* Any hosts that are not in Maintenance Mode remain untouched.

* Remediation happens in parallel for all eligible hosts.

* In this case, two of the six hosts are in Maintenance Mode. Those two hosts will be remediated in parallel.

* The remaining four hosts (not in Maintenance Mode) will not be remediated at all.

Why the other options are incorrect:

* A. Four hosts not in maintenance mode are remediated in parallel##Incorrect. Hosts must already be in Maintenance Mode to be remediated.

* B. Hosts in maintenance mode first, then non-maintenance hosts##Incorrect. Non-maintenance mode hosts are skipped, not remediated after.

* C. Four hosts remediated sequentially, others skipped##Incorrect. Parallel Remediation does not touch non-maintenance mode hosts.

* D. Hosts in maintenance mode remediated in parallel; others skipped##Correct and matches VMware documentation.

References:

VMware vSphere 9.0 Documentation -Parallel Remediation for Lifecycle Manager Images VMware vSphere 9.0 Documentation - Parallel remediation applies only to ESX hosts already in maintenance mode

NEW QUESTION # 52

An administrator has successfully deployed the VMware Cloud Foundation (VCF) Installer appliance to begin a new VMware vSphere Foundation (VVF) deployment. The VMware ESX hosts are powered on and meet all hardware and connectivity prerequisites.

What is the next step to begin deploying vSphere Foundation?

- A. Install SDDC Manager using the VCF Installer.
- B. Manually deploy the vCenter Server Appliance.
- **C. Launch the VCF Installer deployment wizard.**
- D. Enable SSH on all ESX hosts.

Answer: C

Explanation:

After successfully deploying the VCF Installer appliance, and ensuring ESXi hosts are powered on and meet prerequisites, the next steps to:

* Launch the VCF Installer deployment wizard, which guides administrators through host onboarding, vCenter deployment, and cluster setup for vSphere Foundation.

Other options:

* A. Enable SSH on all ESX hosts# Not required unless troubleshooting.

* C. Install SDDC Manager using VCF Installer# Only applies to full Cloud Foundation, not vSphere Foundation deployment.

* D. Manually deploy vCenter Server Appliance# The Installer wizard automates this.

VMware Cloud Foundation 9.0 -Using VCF Installer for vSphere Foundation VMware Docs: VCF Installer Deployment Workflow

NEW QUESTION # 53

An administrator is tasked to configure shared storage for a VMware vSphere Foundation (VVF) cluster at a remote location.

The following is available at the remote location:

* Two ESX servers.

* Two 1GbE network cards per ESX.

* One sixteen port 1GbE Switch.

* One NVMe per ESX for the Operating System.

* One storage system supporting network and fiber channel capabilities.

What storage protocol must the administrator use at the remote location?

- **A. NFS**
- B. vSAN
- C. Local Storage
- D. Fiber Channel

Answer: A

Explanation:

The scenario:

* Remote site with 2 ESXi servers, 1GbE networking only.

* Storage system supports both network (NAS/iSCSI/NFS) and Fiber Channel.

* Fiber Channel is not feasible (no FC switches/HBAs).

* vSAN requires more than 2 nodes (minimum 3 for standard vSAN, 2+Witness for 2-node), not mentioned here.

The most suitable solution:

* Use NFS storage over 1GbE. (D)

* Provides shared storage accessible to both ESXi hosts.

Other options:

* A. vSAN# Needs 3+ nodes or a witness, not supported in this config.

- * B. Local storage# Not shared, fails HA/DRS requirements.
- * C. Fiber Channel# Requires HBAs and FC switch, not available.

NEW QUESTION # 54

.....

You may face many choices of attending the certificate exams and there are a variety of certificates for you to get. You want to get the most practical and useful certificate which can reflect your ability in some area. If you choose to attend the test 2V0-16.25 certification buying our 2V0-16.25 exam guide can help you pass the 2V0-16.25 test and get the valuable certificate. Our company has invested a lot of personnel, technology and capitals on our products and is always committed to provide the top-ranking 2V0-16.25 study material to the clients and serve for the client wholeheartedly.
