Ethics-In-Technology PDF Download & Ethics-In-Technology New Braindumps Questions

Passing WGU certification Ethics-In-Technology exam is not simple. Choose the right training is the first step to your success and choose a good resource of information is your guarantee of success. While the product of PassCollection is a good guarantee of the

resource of information. If you choose the PassCollection product, it not only can 100% guarantee you to pass WGU Certification Ethics-In- Technology Exam but also provide you with a year-long free update.

WGU Ethics In Technology QCO1 Sample Questions (Q53-Q58):

NEW QUESTION # 53

An individual soils a used television on an e-commerce website without knowing or disclosing that it is damaged Which two ethical problems is the seller engaged in? Choose 2 answers.

- A. Misrepresentation
- B. Breach of contract
- C. Conflict of interest
- D. Negligence

Answer: A,D

Explanation:

The individual sells a used television without knowing or disclosing that it is damaged, which raises two ethical concerns:

- * Negligence - The seller fails to inspect the product properly before selling it, which is careless and irresponsible.
- * Misrepresentation - The seller does not disclose the damage, leading the buyer to believe the product is in working condition.

Why These Two Options?

- * Negligence applies because the seller should have checked the TV before listing it.
- * Misrepresentation applies because the seller fails to provide accurate information, even if unintentional.
- * B. Breach of Contract - There is no formal contract in typical e-commerce transactions unless explicitly agreed upon.
- * C. Conflict of Interest - This applies when personal interests interfere with professional duties, which is not the case here.

Why Not the Other Options? Thus, the correct answers are A. Negligence and D. Misrepresentation, as they reflect the ethical failures in this situation.

- * Kantian Ethics - Duty to provide truthful information.
- * Consumer Protection Laws (e.g., U.S. FTC Guidelines).
- * Beauchamp, T., & Childress, J. (2019). Principles of Biomedical Ethics.

NEW QUESTION # 54

How can organizations differentiate between ethical decision-making and legal decision-making frameworks?

- A. Ethical decision-making frameworks help an organization navigate a set of rules that convey what people can and cannot do. Legal decision-making frameworks help an organization uphold a code of behavior generally agreed upon by members of the larger society which the organization operates in.
- B. Ethical decision-making frameworks provide a complete guide to legal decision-making but go beyond to encompass decision-making tools to employ in situations where the law is not clearly defined or easily applied.
- C. Ethical decision-making frameworks help an organization uphold a code of behavior generally agreed upon by the members of the larger society which the organization operates in. Legal decision-making frameworks help an organization to navigate a set of rules that convey what people can and cannot do.
- D. Legal decision-making frameworks provide a complete guide to ethical decision-making but go beyond to encompass decision-making tools to employ in situations where the ethical code is not clearly defined or easily applied.

Answer: C

Explanation:

Organizations must understand the distinction between ethical and legal decision-making frameworks to ensure responsible governance.

- * Ethical Decision-Making Frameworks:
 - * Guide organizations in upholding moral standards and values.
 - * Help navigate moral dilemmas where laws may not provide clear guidance.
 - * Are based on societal values and professional codes of ethics (e.g., ACM Code of Ethics, IEEE Code of Conduct).
- * Legal Decision-Making Frameworks:
 - * Provide a set of enforceable rules that dictate what is permissible and impermissible.
 - * Help organizations comply with laws and regulations (e.g., GDPR, HIPAA, and consumer protection laws).
 - * Ensure legal liability is minimized.
- * A & D: These options incorrectly suggest that legal and ethical frameworks are comprehensive guides for each other, which is

false. Ethics go beyond legal rules, and legal decisions do not always ensure ethical behavior.

* C: This reverses the correct roles of ethical and legal frameworks.

Why Not the Other Options? Thus, the best answer is B, as it correctly distinguishes the role of ethics and law in decision-making.

* Moor, J. (1985). "What is Computer Ethics?" *Metaphilosophy*, 16(4), 266-275.

* Floridi, L. (2013). *The Ethics of Information*. Oxford University Press.

* IEEE Code of Ethics (2020).

* General Data Protection Regulation (GDPR) (2018).

NEW QUESTION # 55

What is a Gramm-Leach-Bliley Act (GLBA) financial privacy rule that presents a threat to data privacy?

- A. Pretexting
- B. Safeguard
- C. Opt-out
- D. Opt-in

Answer: C

NEW QUESTION # 56

A software company continues to refine and update the predictive algorithm that makes its product the market leader. Although the company announces some changes, most are unannounced so that people and businesses remain unaware.

What is this company protecting?

- A. Trademark
- B. Trade secret
- C. Trade dress
- D. Tradecraft

Answer: B

Explanation:

A trade secret refers to confidential business information that provides a company with a competitive advantage. In this scenario, the software company continuously refines and updates its predictive algorithm but does not fully disclose these changes, ensuring that competitors and customers remain unaware of its proprietary methods.

Unlike trademarks (which protect branding), trade dress (which protects product appearance), or tradecraft (which refers to espionage techniques), trade secrets involve valuable, undisclosed business methods or formulas.

* Trade Secret Protection (Defend Trade Secrets Act, DTSA, 2016) - Protects companies from misappropriation of confidential information.

* Intellectual Property Ethics - Companies must balance secrecy with ethical transparency in product updates.

* Utilitarian vs. Deontological Perspectives - Keeping trade secrets protects business interests but may impact consumer trust.

* ACM Code of Ethics (Intellectual Property & Transparency) - Encourages responsible innovation without misleading consumers.

Relevant Ethical References in Technology: Thus, the correct answer is B. Trade secret, as the company protects its undisclosed algorithm updates.

NEW QUESTION # 57

To gain access to the electronic health record of a critically injured patient, an intensive care specialist decided to circumvent privacy policies to save the patient. Which decision-making process guided the action of the specialist?

- A. Ethical and illegal
- B. Unethical and illegal
- C. Unethical and legal
- D. Ethical and legal

Answer: A
