

# 2026 HP Pass-Sure HPE7-J02: Advanced HPE Storage Integrator Solutions Written Exam Exam Tutorials

BTW, DOWNLOAD part of FreeCram HPE7-J02 dumps from Cloud Storage: <https://drive.google.com/open?id=10diaqVckP5pxdlZszZBRDd580aqoePyE>

As long as you have a will, you still have the chance to change. Once you are determined to learn our HPE7-J02 study materials, you will become positive and take your life seriously. Through the preparation of the HPE7-J02 exam, you will study much practical knowledge. Of course, passing the exam and get the HPE7-J02 certificate is just a piece of cake. With the high pass rate of our HPE7-J02 practice braindumps as 98% to 100%, i can say that your success is guaranteed.

## HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Storage Access and Data Protection: This part of the exam tests the expertise of Infrastructure Engineers in configuring storage access, provisioning capacity, and applying replication policies. It also covers disaster recovery validation and role-based access control to secure storage operations.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Remote Support Configuration: This small but important section tests the ability of System Administrators to configure HPE solutions for remote support, ensuring proactive monitoring and timely resolution of technical issues.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Monitoring and Telemetry: This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Optimizing the Customer's Environment: This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Storage Transport in Multi-Site Solutions: This section evaluates the skills of Storage Architects in describing and applying transport technologies within multi-site solutions. It involves distinguishing between SAN topologies, analyzing transport components, and recommending advanced data protection methods to ensure reliability across enterprise environments.</li></ul>

## Pass Guaranteed Quiz 2026 Valid HP HPE7-J02: Advanced HPE Storage Integrator Solutions Written Exam Exam Tutorials

If you want to be a leader in some industry, you have to continuously expand your knowledge resource. Our FreeCram always updates the exam dumps and the content of our exam software in order to ensure the HPE7-J02 exam software that you have are the latest and comprehensive version. No matter which process you are preparing for HPE7-J02 Exam, our exam software will be your best helper. As the collection and analysis of our HPE7-J02 exam materials are finished by our experienced and capable IT elite.

### HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q16-Q21):

#### NEW QUESTION # 16

A global financial services company is looking to enhance its disaster recovery (DR) capabilities. They operate VMware workloads across multiple data centers and a mix of AWS and Azure cloud workloads. They need a solution that can replicate data with near-zero recovery point objectives (RPOs) and orchestrate rapid recovery of critical applications in case of a site-wide failure.

- A. Cohesity
- B. SimpliVity
- **C. Zerto**
- D. CommVault

**Answer: C**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Zerto, now part of HPE, provides continuous data protection (CDP) with near-zero RPOs and very low RTOs. It supports VMware workloads, as well as hybrid cloud deployments with AWS and Azure. Zerto is specifically designed for disaster recovery orchestration, enabling automated failover, failback, and application-consistent protection across sites and cloud environments.

Distractors:

B (CommVault): Primarily a backup/recovery and data management platform - RPOs are not near-zero.

C (Cohesity): Strong in backup, secondary storage, and ransomware recovery, but not near-zero RPO DR orchestration.

D (SimpliVity): Hyperconverged infrastructure with built-in backup, but not optimized for large-scale multi- cloud DR.

Key Concept: Continuous Data Protection (Zerto) for hybrid/multi-cloud disaster recovery.

Reference: HPE Zerto DR for Hybrid and Multi-cloud Environments.

#### NEW QUESTION # 17

A local startup company has grown rapidly and now needs block storage for enterprise workloads. They are virtualized with VMware and have a small IT staff. They are evaluating an HPE Alletra MP and a Pure FlashArray //X90R4.

Environment:

VMware 8.0

Cisco switches

Dell servers

HPE servers

What statement about HPE should you point out as a differentiator?

- A. HPE has the ability to disable garbage collection and overhead to meet workload requirements.
- B. HPE has live workload migration via the ActiveWorkload feature, based on a stretch cluster.
- **C. HPE provides full-stack visibility up to the app layer with prescriptive, actionable recommendations.**
- D. HPE can natively tier data on a software-only deployment.

**Answer: C**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Alletra with InfoSight provides end-to-end visibility from infrastructure through to virtual machines and applications. It offers prescriptive, AI-driven recommendations to simplify management - a key differentiator for startups with small IT staff. Pure arrays

do not offer the same level of integrated, cross-stack predictive analytics.

Distractors:

B: "ActiveWorkload" is not an HPE feature - HPE uses Peer Persistence for stretch clusters.

C: Garbage collection is managed automatically in HPE arrays; disabling it is not supported.

D: Data tiering is not natively provided as "software-only" - HPE uses GreenLake and Alletra services.

Key Concept: InfoSight = predictive analytics and app-to-infra visibility differentiator.

Reference: HPE InfoSight for Alletra Datasheet.

### NEW QUESTION # 18

Which statement is correct when deploying an HPE Zerto DR solution where an Extended Journal Copy is required with a one-year retention period?

- **A. HPE Zerto integrates with HPE StoreOnce to enable long-term retention for Extended Journal Copies.**
- B. Extended Journal Copies always come from the target site to avoid impact on the production site.
- C. HPE Zerto supports a maximum of 30-day retention and cannot exceed this period.
- D. An additional license is required to enable the Extended Journal Copy feature.

**Answer: A**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Zerto Extended Journal allows retention up to one year by integrating with secondary storage like HPE StoreOnce. Short-term journals (seconds to days) reside on primary replication storage, while long-term copies (weeks/months/years) are offloaded to StoreOnce for cost-efficient retention.

Distractors:

A: No separate license is required - it is a standard Zerto feature when integrated.

C: Extended Journals can be sourced from production or target, depending on setup; not "always" target.

D: Incorrect - Zerto supports >30 days retention with Extended Journal.

Key Concept: Zerto + HPE StoreOnce for long-term DR retention.

Reference: HPE Zerto with StoreOnce White Paper.

### NEW QUESTION # 19

You are meeting with a customer who wants to replace their current file storage system. You plan to recommend HPE GreenLake for File Storage. The customer asks whether the solution can provide cross-protocol access to the same data using both NFS and SMB simultaneously.

What is the impact on your design?

- **A. HPE GreenLake for File Storage supports native cross-protocol access with NFS, SMB, and S3. You must enable both protocols per share**
- B. Two different IP pools are required, one for each access protocol. The virtual IP pool address enables cross-protocol functionality
- C. A 3rd-party SDS solution such as Qumulo or Scality should be discussed since the HPE GreenLake for File Storage does not support this
- D. This is perfectly possible with HPE GreenLake for File Storage by creating two file shares (one for each protocol) and setting up replication

**Answer: A**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE GreenLake for File Storage, powered by VAST Data software, natively supports cross-protocol access (NFS, SMB, and S3) to the same dataset. This means a file written via NFS can be accessed via SMB or S3 without replication. For cross-protocol access, both protocols must be enabled at the share/bucket level.

This is a core differentiator of HPE's GreenLake for File Storage solution.

Distractors:

A: Wrong, because GreenLake for File Storage already has native multi-protocol support - no need for 3rd party SDS.

C: Incorrect, as replication between separate shares is not required; it is a native capability.

D: Misleading - IP pools are used for load balancing and client connectivity, but not required to enable cross-protocol access.  
Key Concept: Multi-protocol access in HPE GreenLake for File Storage (NFS/SMB/S3).  
Reference: HPE GreenLake for File Storage Technical Overview, VAST Data Universal Storage white papers

### NEW QUESTION # 20

A pool of Microsoft SQL servers started to use the Alletra 6000 family array six months ago. The data growth has been higher than expected, and the performance of the databases is facing some latency issues.

Which method would allow both capacity and performance to grow when expanding the array, while keeping the management simple?

- A. By initially selecting the timeless storage option for the array.
- **B. By adding more arrays and capacity to a single scale-out group.**
- C. By selecting more flash to cache ratio on the expansion shelves.
- D. By including more NIC cards to load balance host traffic.

**Answer: B**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Alletra 6000 is a scale-out architecture array. Adding more arrays to a single scale-out group increases both performance (IOPS, throughput) and capacity, while maintaining single-pane management via HPE Data Services Cloud Console. This is the most efficient way to address both capacity growth and latency reduction for SQL workloads.

Distractors:

B: Adding NICs may help with throughput but not backend latency or capacity scaling.

C: Flash-to-cache ratios can optimize read caching but don't fundamentally increase system-wide performance.

D: Timeless storage is a procurement/licensing option, not a performance/capacity scaling method.

Key Concept: Alletra 6000 scale-out clustering for balanced growth of capacity and performance.

Reference: HPE Alletra 6000 Technical Architecture Guide.

### NEW QUESTION # 21

.....

By resorting to our HPE7-J02 exam materials, we can absolutely reap more than you have imagined before. We have clear data collected from customers who chose our HPE7-J02 practice braindumps, and the passing rate is 98-100 percent. So your chance of getting success will be increased greatly by our HPE7-J02 study questions. Besides, the price of our HPE7-J02 learning guide is very favourable even the students can afford it.
