Maybe most of people prefer to use the computer when they are study, but we have to admit that many people want to learn buy the paper, because they think that studying on the computer too much does harm to their eyes. NetSec-Pro test questions have the function of supporting printing in order to meet the need of customers. You can print our NetSec-Pro Exam Question on papers after you have downloaded it successfully. It not only can help you protect your eyes, but also it will be very convenient for you to make notes. We believe that you will like our NetSec-Pro exam prep.

Do not postpone seeking help from our extraordinary Palo Alto Networks NetSec-Pro dumps to get the crucial Palo Alto Networks NetSec-Pro certification exams. This platform allows you to self-assess your progress with a performance score. You can also customize your Palo Alto Networks NetSec-Pro mock tests according to the time and kinds of practice queries. It imitates the exact pattern of the actual Palo Alto Networks NetSec-Pro certification exam.

## NetSec-Pro Exam Torrent & NetSec-Pro Real Questions & NetSec-Pro Exam Cram

DumpsTests offers a free demo of the NetSec-Pro exam dumps for customers to try out before purchasing. This allows individuals to examine the NetSec-Pro exam prep material and make decisions. Customers will receive free updates to the NetSec-Pro exam questions for three months if any changes are made to the Palo Alto Networks Network Security Professional (NetSec-Pro) exam content after the purchase of the NetSec-Pro Practice Questions. DumpsTests has helped thousands of individuals worldwide in obtaining their NetSec-Pro certification through their real NetSec-Pro pdf dumps and practice tests. Passing the Palo Alto Networks Network Security Professional (NetSec-Pro) exam on the first attempt can save individuals both time and money.

## Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Platform Solutions, Services, and Tools: This section measures the expertise of security engineers and platform administrators in Palo Alto Networks NGFW and Prisma SASE products. It involves creating security and NAT policies, configuring Cloud-Delivered Security Services (CDSS) such as security profiles, User-ID and App-ID, decryption, and monitoring. It also covers the application of CDSS for IoT security, Enterprise Data Loss Prevention, SaaS Security, SD-WAN, GlobalProtect, Advanced WildFire, Threat Prevention, URL Filtering, and DNS security. Furthermore, it includes aligning AIOps with best practices through administration, dashboards, and Best Practice Assessments.</li> </ul>

## Palo Alto Networks Network Security Professional Sample Questions (Q13-Q18):

### NEW QUESTION # 13

After a firewall is associated with Strata Cloud Manager (SCM), which two additional actions are required to enable management of the firewall from SCM? (Choose two.)

- A. Configure NTP and DNS servers for the firewall.**
- B. Deploy a service connection for each branch site and connect with SCM.
- C. Configure a Security policy allowing "stratacloudmanager.paloaltonetworks.com" for all users.
- D. Install a device certificate.**

**Answer: A,D**

Explanation:

To fully manage a firewall from Strata Cloud Manager (SCM), it's essential to establish trust and ensure reliable connectivity:

Configure NTP and DNS servers

The firewall must have accurate time (NTP) and name resolution (DNS) to securely communicate with SCM and related cloud services.

"To ensure successful management, configure the firewall's NTP and DNS settings to synchronize time and resolve domain names such as stratacloudmanager.paloaltonetworks.com" (Source: SCM Onboarding Requirements) Install a device certificate A device certificate authenticates the firewall's identity when connecting to SCM.

"The device certificate authenticates the firewall to Palo Alto Networks cloud services, including SCM. It's a fundamental requirement to establish secure connectivity." (Source: Device Certificates) These steps ensure trust, secure communication, and successful onboarding into SCM.

### NEW QUESTION # 14

Which two content updates can be pushed to next-generation firewalls from Panorama? (Choose two.)

- A. Applications and threats**
- B. Advanced URL Filtering
- C. WildFire**

- D. GlobalProtect data file

**Answer: A,C**

Explanation:

Applications and threats

Panorama can push application and threat signature updates to managed firewalls, ensuring consistent application and threat visibility. "Panorama uses dynamic updates to distribute the latest application and threat signature packs to all managed firewalls." (Source: Manage Content Updates in Panorama) WildFire Panorama also distributes WildFire signature updates to firewalls for real-time malware detection.

"WildFire updates provide the latest malware signatures to enhance detection and prevention, and can be deployed to all managed firewalls via Panorama." (Source: WildFire and Dynamic Updates)

**NEW QUESTION # 15**

Which firewall attribute can an engineer use to simplify rule creation and automatically adapt to changes in server roles or security posture based on log events?

- A. Address objects
- B. Predefined IP addresses
- C. **Dynamic Address Groups**
- D. Dynamic User Groups

**Answer: C**

Explanation:

Dynamic Address Groups enable the firewall to automatically adjust security policies based on tags assigned dynamically (via log events, API, etc.). This eliminates the need for manual updates to policies when server roles or IPs change.

"Dynamic Address Groups allow you to create policies that automatically adapt to changes in the environment. These groups are populated dynamically based on tags, enabling automated security policy updates without manual intervention." (Source: Dynamic Address Groups)

**NEW QUESTION # 16**

In a service provider environment, what key advantage does implementing virtual systems provide for managing multiple customer environments?

- A. Shared threat prevention policies across all tenants
- B. Unified logging across all virtual systems
- C. **Logical separation of control and Security policy**
- D. Centralized authentication for all customer domains

**Answer: C**

Explanation:

Virtual systems provide logical separation in a single physical firewall, allowing different customers (or tenants) to have isolated control and security policies.

"Virtual systems enable service providers to offer logically separated, independent environments on a single firewall. Each virtual system can have its own security policies, interfaces, and administrators." (Source: Virtual Systems) This ensures secure, tenant-specific segmentation within multi-tenant environments.

**NEW QUESTION # 17**

Using Prisma Access, which solution provides the most security coverage of network protocols for the mobile workforce?

- A. Enterprise browser
- B. **Client-based VPN**
- C. Explicit proxy
- D. Clientless VPN

**Answer: B**

### Explanation:

Client-based VPN solutions like GlobalProtect provide full coverage for the mobile workforce by extending the enterprise security stack to remote endpoints. It establishes a secure tunnel, allowing consistent security policies across the enterprise perimeter and the mobile workforce.

"GlobalProtect is a client-based VPN that provides secure, consistent protection for mobile users by extending the security capabilities of Prisma Access to remote endpoints, covering all network protocols." (Source: GlobalProtect Admin Guide)

## NEW QUESTION # 18

In the course of your study, the test engine of NetSec-Pro actual exam will be convenient to strengthen the weaknesses in the learning process. This can be used as an alternative to the process of sorting out the wrong questions of NetSec-Pro learning torrent in peacetime learning, which not only help you save time, but also makes you more focused in the follow-up learning process with our NetSec-Pro Learning Materials. Choose our NetSec-Pro guide materials and you will be grateful for your right decision.
