#### NEW QUESTION # 17

A cloud administrator for an ISP identified a vulnerability in the software that controls all the firewall rules for a geographic area. To ensure the software upgrade is properly tested, approved, and applied, which of the following processes should the administrator follow?

- A. Incident management
- B. Configuration management
- C. Resource management
- **D. Change management**

**Answer: D**

Explanation:

Change management is an IT practice that aims to minimize disruptions to IT services while making changes to critical systems and services. Change management involves planning, testing, approving, and implementing changes in a controlled and systematic

manner<sup>6</sup>. A change is defined as adding, modifying, or removing anything that could have a direct or indirect effect on services<sup>5</sup>. In this case, the cloud administrator should follow the change management process to ensure that the software upgrade is properly tested, approved, and applied.
