globally and is highly valued by employers in the IT industry.

Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) Sample Questions (Q77-Q82):

NEW QUESTION # 77

Which common network element is required for creating an AWS Self-Service Account?

- A. NTP
- B. SNMP
- C. FQDN
- **D. DNS**

Answer: D

Explanation:

Comprehensive and Detailed Explanation

When configuring a Self-Service Account for AWS, Prism Central must be able to:

* Resolve AWS service endpoint URLs

* Validate API calls via name-based resolution

Nutanix documentation specifies that DNS is required for all cloud-provider integrations, including AWS, Azure, and GCP.

Therefore, DNS is the required network element.

Correct answer: B

NEW QUESTION # 78

What two view options are available when launching Calm blueprints? (Choose two.)

- A. View as Admin
- **B. Consumer**
- C. View as Project Admin
- **D. Developer**

Answer: B,D

Explanation:

When launching Calm blueprints, there are two view options available: Developer and Consumer. The Developer view allows you to create, edit, and manage blueprints, as well as access advanced features such as macros, actions, and scripts. The Consumer view allows you to launch and manage applications from the Marketplace, as well as access basic features such as variables, tasks, and alerts. The view option is determined by the role assigned to the user in the project. Users with the Project Admin or Project Auditor role can switch between the Developer and Consumer views, while users with the Project User role can only access the Consumer view. Reference:

Nutanix Certified Professional - Multicloud Automation (NCP-MCA) v6.5, Section 1 - Describe and Differentiate Automation Concepts and Principles, page 3 Nutanix Multicloud Automation Administration (NMCAA), Module 2 - Nutanix Calm, Lesson 2.1 - Nutanix Calm Overview, page 9 Nutanix Calm User Guide, Introduction to Nutanix Calm, Nutanix Calm User Interface

NEW QUESTION # 79

Which two features does the Calm Marketplace provide? (Choose two.)

- A. Library of executable tasks
- **B. Published and versioned Blueprints**
- **C. Set of pre-seeded application Blueprints**
- D. Store of all Blueprints created in Calm

Answer: B,C

Explanation:

The Calm Marketplace acts as an application store, providing end users with a catalog of available applications. By default, Calm comes pre-seeded with validated Blueprints for multiple open source and enterprise applications. These are the set of pre-seeded application Blueprints. Additionally, Marketplace Manager acts as a staging area for publishing default and user-created Blueprints

to your local Marketplace.

These are the published and versioned Blueprints. The other two options, library of executable tasks and store of all Blueprints created in Calm, are not features of the Calm Marketplace. References: Calm: Marketplace - Read the Docs and Calm Marketplace - Read the Docs

NEW QUESTION # 80

Within a Calm blueprint, which two actions can an administrator apply to a Service under the Guest Customization section? (Choose two.)

- A. Apply a Sysprep file
- B. Apply a Cloudinit Script
- C. Modify the base OS image
- D. Choose UEFI or Legacy BIOS

Answer: A,B

Explanation:

Within a Calm blueprint, an administrator can apply two actions to a Service under the Guest Customization section: Apply a Cloudinit Script and Apply a Sysprep file. These actions allow the administrator to customize the configuration and behavior of the virtual machines that are provisioned from the blueprint. A Cloudinit Script is a set of commands or scripts that run on Linux-based virtual machines during the boot process. A Sysprep file is a configuration file that specifies the Windows settings and options for the virtual machines.

These actions can be used to perform tasks such as setting the hostname, network configuration, user accounts, software installation, and more. References:

* Nutanix Multicloud Automation Administration (NMCAA), Module 2 - Nutanix Calm, Lesson 2.2 - Blueprint Management, page 9

* Nutanix Calm User Guide, Blueprint, Guest Customization

NEW QUESTION # 81

Refer to exhibits.

The variable VM_NAME is giving a warning that indicates that the variable is not found. When checking the Service tab, the variable is found to match the VM_NAME field entry as shown in the exhibit below:

What is causing this warning message?

- A. Service Name matches the variable name
- B. VM_NAME variable must be defined under Application Profile
- C. @@{calm_time}@@ output is longer than allowed for a Service Name
- D. User modifiable variable for VM_NAME is not allowed

Answer: D
