NEW QUESTION # 48

A marketer typically sends to a filtered data extension that contains their primary audience. They need to target only a portion of this population for an upcoming send.

What should they do to further segment their audience?

- A. Use the Split option to temporarily add additional filter criteria.
- B. Copy the data filter and build a new data extension with additional filter criteria.
- C. Copy thefiltered data extension and add additional filter criteria.

Answer: C

Explanation:

To target a portion of the population within a filtered data extension, the marketer should copy the filtered data extension and then apply additional filter criteria. This approach allows for the creation of a more specific subset of the original audience, ensuring that the upcoming send reaches the desired segment without altering the primary filtered data extension. NEW QUESTION # 49

Northern Trail Outfitters wants to utilize an Amazon s3 bucket to import data into Marketing Cloud Data Extensions.
What should be used to achieve this?

- A. Import Wizard
- B. Ingest API
- C. Import Activity

Answer: C

Explanation:

Import Activity in Salesforce Marketing Cloud allowsusers to automate the process of importing data from an external source like an Amazon S3 bucket into Data Extensions. The Import Activity can be set up in Automation Studio, where you can define the source, destination, and schedule for the data import. This method is verified in Salesforce Marketing Cloud documentation under Automation Studio and Import Activity setup.

NEW QUESTION # 50

NEW QUESTION # 51

Northern Trail Outfitters (NTO) wants to test Einstein Recommendations against the company's static product recommendations in a product return confirmation email. Next, NTO needs to evaluate the results and choose the winning option forfuture confirmations.

Which journey type is best suited to run this test?

- A. Single Send
- B. Transactional Send
- C. Multi-Step

Answer: C

Explanation:
A Multi-Step journey is best suited for testing Einstein Recommendations against static product recommendations in a product return confirmation email. This type of journey allows you to set up a series of steps or stages, including A/B testing or split activities, to test different content variations and measure their performance over time. By using a Multi-Step journey, NTO can create different paths within the journey for recipients to receive either Einstein Recommendations or static recommendations. The results can then be compared to determine the more effective recommendation strategy.
