As the saying goes, to sensible men, every day is a day of reckoning. Time is very important to people. People often complain that they are wasting their time on study and work. They do not have time to look at the outside world. Now, Data-Con-101 exam guide gives you this opportunity. Data-Con-101 test prep helps you save time by improving your learning efficiency. At the same time, Data-Con-101 Test Prep helps you to master the knowledge in the course of the practice. And at the same time, there are many incomprehensible knowledge points and boring descriptions in the book, so that many people feel a headache and sleepy when reading books. But with Data-Con-101 learning question, you will no longer have these troubles.

The Data-Con-101 study braindumps are compiled by our professional experts who have been in this career for over ten years. Carefully written and constantly updated content of our Data-Con-101 exam questions can make you keep up with the changing direction of the exam, without aimlessly learning and wasting energy. In addition, there are many other advantages of our Data-Con-101 learning guide. Hope you can give it a look and you will love it for sure!

Valid Dumps Data-Con-101 Files - Data-Con-101 New Test Materials

Are you still upset about how to pass Salesforce certification Data-Con-101 exam? Are you still waiting for the latest information about Salesforce certification Data-Con-101 exam? TestkingPDF has come up with the latest training material about Salesforce certification Data-Con-101 exam. Do you want to pass Salesforce certification Data-Con-101 exam easily? Please add TestkingPDF's Salesforce certification Data-Con-101 exam practice questions and answers to your cart now! TestkingPDF has provided part of Salesforce Certification Data-Con-101 Exam practice questions and answers for you on www.TestkingPDF.com and you can free download as a try. I believe you will be very satisfied with our products. With our products you can easily pass the exam. We promise that if you have used TestkingPDF's latest Salesforce certification Data-Con-101 exam practice questions and answers exam but fail to pass the exam, TestkingPDF will give you a full refund.

Salesforce Data-Con-101 Exam Syllabus Topics:

Topic	Details
Topic 1	• Data Ingestion and Modeling: This domain addresses bringing data into Data Cloud and structuring it properly through transformation, ingestion from various sources, and data mapping. It emphasizes best practices for modeling data to support identity resolution and validating ingested data using available tools.
Topic 2	• Identity Resolution: This domain explores creating unified customer profiles through matching and reconciliation processes. It covers how rule sets determine when records link together, how conflicting data is resolved, and understanding the outcomes and use cases of unified identities.
Topic 3	• Data Cloud Setup and Administration: This domain focuses on configuring and managing Data Cloud environments through permissions, data streams, data bundles, and data spaces. It also covers administrative tools and techniques for diagnosing and exploring data using reports, dashboards, flows, APIs, and explorer tools.

Salesforce Certified Data Cloud Consultant Sample Questions (Q17-Q22):

NEW QUESTION # 17

A customer requests that their personal data be deleted.

Which action should the consultant take to accommodate this request in Data Cloud?

- **A. Use the Data Rights Subject Request tool to request deletion of the customer's information.**
- B. Use a streaming API call to delete the customer's information.
- C. Use Consent API to request deletion of the customer's information.
- D. Use Profile Explorer to delete the customer data from Data Cloud.

Answer: A

NEW QUESTION # 18

An organization wants to enable users with the ability to identify and select text attributes from a picklist of options.

Which Data Cloud feature should help with this use case?

- A. Data harmonization
- B. Global picklists
- C. Transformation formulas
- **D. Value suggestion**

Answer: D

Explanation:

Value suggestion is a Data Cloud feature that allows users to see and select the possible values for a text field when creating segment filters. Value suggestion can be enabled or disabled for each data model object (DMO) field in the DMO record home. Value suggestion can help users to identify and select text attributes from a picklist of options, without having to type or remember the exact values. Value suggestion can also reduce errors and improve data quality by ensuring consistent and valid values for the segment filters. References: Use Value Suggestions in Segmentation, Considerations for Selecting Related Attributes

NEW QUESTION # 19

A consultant needs to package Data Cloud components from one organization to another.

Which two Data Cloud components should the consultant include in a data kit to achieve this goal?

Choose 2 answers

- **A. Data model objects**
- B. Segments
- C. Calculated insights
- **D. Identity resolution rulesets**

Answer: A,D

Explanation:

To package Data Cloud components from one organization to another, the consultant should include the following components in a data kit:

Data model objects: These are the custom objects that define the data model for Data Cloud, such as Individual, Segment, Activity, etc. They store the data ingested from various sources and enable the creation of unified profiles and segments¹.

Identity resolution rulesets: These are the rules that determine how data from different sources are matched and merged to create unified profiles. They specify the criteria, logic, and priority for identity resolution². References:

1: Data Model Objects in Data Cloud

2: Identity Resolution Rulesets in Data Cloud

NEW QUESTION # 20

Which method should a consultant use when performing aggregations in windows of 15 minutes on data collected via the Interaction SDK or Mobile SDK?

- A. Batch transform
- B. Formula fields
- **C. Streaming insight**
- D. Calculated insight

Answer: C

Explanation:

Streaming insight is a method that allows you to perform aggregations in windows of 15 minutes on data collected via the Interaction SDK or Mobile SDK. Streaming insight is a feature that enables you to create real-time metrics and insights based on streaming data from various sources, such as web, mobile, or IoT devices. Streaming insight allows you to define aggregation rules, such as count, sum, average, min, max, or percentile, and apply them to streaming data in time windows of 15 minutes. For example, you can use streaming insight to calculate the number of visitors, the average session duration, or the conversion rate for your website or app in 15-minute intervals. Streaming insight also allows you to visualize and explore the aggregated data in dashboards, charts, or tables.

NEW QUESTION # 21

A consultant is setting up Data Cloud for a multi-brand organization and is using data spaces to segregate its data for various brands. While starting the mapping of a data stream, the consultant notices that they cannot map the object for one of the brands. What should the consultant do to make the object available for a new data space?

- A. Copy data from the default data space to a new DMO using the Data Copy feature and link this DMO to the new data space.
- B. Create a new data stream and map the second data stream to the data space.
- **C. Navigate to the Data Space tab and select the object to be included in the new data space.**
- D. Create a batch transform to split data between different data spaces.

Answer: C

Explanation:

When setting up Data Cloud for a multi-brand organization, if a consultant cannot map an object for one of the brands during data stream setup, they should navigate to the Data Space tab and select the object to include it in the new data space. Here's why:

Understanding the Issue

The consultant is using data spaces to segregate data for different brands.

While mapping a data stream, they notice that an object is unavailable for one of the brands.

This indicates that the object has not been associated with the new data space.

Why Navigate to the Data Space Tab?

Data Spaces and Object Availability :

Objects must be explicitly added to a data space before they can be used in mappings or transformations within that space.

If an object is missing, it means it has not been included in the data space configuration.

Solution Approach :

By navigating to the Data Space tab , the consultant can add the required object to the new data space.

This ensures the object becomes available for mapping and use in the data stream.

Steps to Resolve the Issue

Step 1: Navigate to the Data Space Tab

Go to Data Cloud > Data Spaces and locate the new data space for the brand.

Step 2: Add the Missing Object

Select the data space and click on Edit .

Add the required object (e.g., a Data Model Object or Data Lake Object) to the data space.

Step 3: Save and Verify

Save the changes and return to the data stream setup.

Verify that the object is now available for mapping.

Step 4: Complete the Mapping

Proceed with mapping the object in the data stream.

Why Not Other Options?

A). Create a new data stream and map the second data stream to the data space :Creating a new data stream is unnecessary if the issue is simply object availability in the data space.

B). Copy data from the default data space to a new DMO using the Data Copy feature and link this DMO to the new data space :This is overly complex and not required if the object can simply be added to the data space.

C). Create a batch transform to split data between different data spaces :Batch transforms are used for data processing, not for resolving object availability issues.

Conclusion

The correct solution is to navigate to the Data Space tab and select the object to include it in the new data space . This ensures the object is available for mapping and resolves the issue efficiently.

NEW QUESTION # 22

.....

Being different from the other Data-Con-101 Exam Questions in the market, our Data-Con-101 practice materials have reasonable ruling price and satisfactory results of passing rate up to 98 to 100 percent. So our Data-Con-101 guide prep is perfect paragon in this industry full of elucidating content for exam candidates of various degrees to use for reference. It contains not only the newest questions appeared in real exams in these years, but the most classic knowledge to master.
