NEW QUESTION # 24

What is included in WalkMe's embedded content provided with SAP applications?

- A. Customizable digital adoption content
- B. Comprehensive analytics and insights
- C. Basic guidance like help menus and tooltips
- D. The full suite of WalkMe features

Answer: C

Explanation:

The correct answer is:

C . Basic guidance like help menus and tooltips ☐

☐ Explanation

According to SAP's documentation, when WalkMe is embedded within SAP applications (such as SuccessFactors or S/4HANA), users are provided with contextual, in-app guidance features-including smart walkthroughs, tooltips, task lists, and on-demand help menus. These are considered "basic guidance" rather than the full breadth of WalkMe's platform capabilities.

☐ Why the other options are incorrect

* A. The full suite of WalkMe features

Embedded WalkMe content delivers a subset focused on guidance-not the full product suite.

* B. Comprehensive analytics and insights

While analytics are available in the platform, they are not part of the embedded content. Those insights are part of the broader WalkMe offering outside the embedded scope.

* D. Customizable digital adoption content

Customized training and adoption flows are built and managed in the full WalkMe platform-not included in the out-of-the-box embedded offering.

Which WalkMe service offering provides a quick time-to-value deployment with a fixed price and scope?

- A. Digital Experience Analytics
- B. WalkMe Shield
- C. Activation SKU
- D. Time & Materials Engagement

Answer: C

Explanation:

The WalkMe service offering that provides a quick time-to-value deployment with a fixed price and scope is:

C . Activation SKU ☐

☐ Why this is correct

The Activation SKU is designed specifically for fast-track deployments—typically delivering pre-configured workflows with a fixed scope and cost. It enables organizations to implement WalkMe for specific applications (like Salesforce or SAP SuccessFactors) and go live in as little as 4 weeks, offering a clear, predictable time-to-value outcome without scope creep

☐ Why the other options aren't correct

A . Digital Experience Analytics - This is focused on gathering and analyzing usage data; it's not a deployment package.

B . Time & Materials Engagement - This engagement model is flexible but not fixed-price and doesn't ensure rapid deployment.

D . WalkMe Shield - A quality assurance tool for testing and automating content; not related to deployment scope or pricing.

☐ Final Answer:

C . Activation SKU provides the bundled, fixed-scope deployment that ensures a rapid go-live and predictable investment.

- B. Sentiment Analysis
- C. Customizable Landing Pages
- **D. Digital Onboarding and Training Modules**

Answer: D

The WalkMe feature that best addresses the challenge of introducing new employees to a complex SaaS application while reducing training costs and boosting adoption is:
