## Try PrepAwayExam CompTIA 220-1101 Practice Test Software

The questions of our 220-1101 guide questions are related to the latest and basic knowledge. What's more, our 220-1101 learning materials are committed to grasp the most knowledgeable points with the fewest problems. So 20-30 hours of study is enough for you to deal with the exam. When you get a 220-1101 certificate, you will be more competitive than others, so you can get a promotion and your wages will also rise your future will be controlled by yourselves.

## CompTIA A+ Certification Exam: Core 1 Sample Questions (Q146-Q151):

### NEW QUESTION # 146

A technician recently reinstalled a previously virtualized application directly to a user's computer. Now, the application is not launching. Which of the following did the technician most likely do to cause this issue?

- A. Installed the application with administrator rights.
- **B. Installed the software on the base operating system.**
- C. Reset the user's application virtualization session.
- D. Installed the wrong license type.

**Answer: B**

Explanation:

If an application was previously running in a virtualized environment and is not launching after being installed directly on the base operating system, it's possible that the technician did not account for dependencies or configurations specific to the virtualized environment that are not present or are incompatible with the base operating system. This mismatch can prevent the application from launching properly.

### NEW QUESTION # 147

A technician receives a request to have a new computer lab wired for network access. The new wiring must be routed 27911 (85m) alongside the existing HVAC system in the drop ceiling.

Which of the following cable types meets safety regulations and data transmission specifications?

- A. Shielded
- B. Riser
- C. Plenum
- D. Fiber

**Answer: C**

### NEW QUESTION # 148

A customer has contacted you about building two new desktops. The first desktop will be a gaming workstation. The customer requirements include:

Playing the newest games at a high frame rate

Fast game load times

Enough storage to have several games installed at once

High-end audio

No concern about cost

Running the current Windows OS

The second workstation will be a family workstation. The requirements include:

Capability for word processing, videoconferencing, and basic web surfing Minimal cost, as long as it meets the requirements Running the current Windows OS

**Answer:**

Explanation:

### NEW QUESTION # 149

Employees are concerned about sensitive data being printed on a shared multifunction printer located in a high-traffic hallway. Which of the following should a technician do to address this concern?

- A. Set up a PIN for user authentication at the printer.
- B. Configure printing of sensitive data through a specific tray.
- C. Relocate the printer to an unused office space.
- D. Schedule print jobs to be released at certain times.

**Answer: A**

Explanation:

To prevent unauthorized access to printed sensitive data on a shared printer in a high-traffic area, the best solution is to require user authentication via a PIN. This ensures that print jobs are only released when the authorized user is present at the printer, protecting sensitive information from being exposed.

\* A. Set up a PIN for user authentication at the printer: This allows users to securely release their print jobs only when they are physically at the printer, preventing unauthorized access.

Why the other options are incorrect:

\* B. Relocate the printer to an unused office space: While this may reduce traffic, it doesn't ensure that sensitive data is protected from unauthorized access.

\* C. Configure printing of sensitive data through a specific tray: This wouldn't solve the issue of unauthorized users accessing sensitive prints.

\* D. Schedule print jobs to be released at certain times: This doesn't address the security concern of preventing unauthorized access to sensitive documents.

This falls under the Hardware and Security domain of the CompTIA A+ Core 1 exam.

### NEW QUESTION # 150

A company wants to use client-side visualization for application testing. Which of the following configurations would BEST support

this goal?

- A.
- B.
- C.
- D.

**Answer: B**

## NEW QUESTION # 151

.....
