The design of our H19-301_V4.0 learning materials is ingenious and delicate. Every detail is perfect. For example, if you choose to study our learning materials on our windows software, you will find the interface our learning materials are concise and beautiful, so it can allow you to study H19-301_V4.0 learning materials in a concise and undisturbed environment. In addition, you will find a lot of small buttons, which can give you a lot of help. Some buttons are used to hide or show the answer. What's more important is that we have spare space, so you can take notes under each question in the process of learning H19-301_V4.0 Learning Materials.

Quitters never win and winners never quit. If you are determined to clear H19-301_V4.0 exam and obtain a certification you shouldn't give up because of one failure. If you are willing, our Huawei H19-301_V4.0 valid exam simulations file can help you clear exam and regain confidence. Every year there are thousands of candidates choosing our products and obtain certifications so that our H19-301_V4.0 valid exam simulations file is famous for its high passing-rate in this field. If you want to pass exam one-shot, you shouldn't miss our files.

Exam H19-301_V4.0 Simulator - Trustworthy H19-301_V4.0 Pdf

Are you considering the questions that how you can pass the H19-301_V4.0 exam and get a certificate? The best answer is to download and learn our H19-301_V4.0 quiz torrent. Our H19-301_V4.0 exam questions will help you get what you want in a short time. You just need little time to download and install it after you purchase our H19-301_V4.0 training prep, then you just need

spend about 20~30 hours to learn it. We are glad that you are going to spare your precious time to have a look to our H19-301_V4.0 exam guide.

Huawei HCSA-Presales-IP Network V4.0 Sample Questions (Q30-Q35):

NEW QUESTION # 30

Which of the following technologies can improve the reliability of firewalls?

- A. VLAN
- B. policies
- C. Security
- D. **NAT HRP**

Answer: D

Explanation:

NAT HRP (Hot Standby High Reliability Protocol) is used in Huawei firewalls to synchronize NAT sessions and state information between the active and standby firewalls. This enables seamless failover without session interruption, thereby improving the reliability of the firewall deployment.

A: VLAN is used for logical segmentation

B: Security is a broad concept, not a specific technology

C: Policies govern traffic handling but don't impact hardware reliability directly

NEW QUESTION # 31

Which of the following lifecycles can be viewed in the SCP? (Select all that Apply)

- A. Components or part numbers
- B. Products
- C. Solutions
- D. BOQs

Answer: A,B

Explanation:

In the SCP (Solution Configuration Platform), you can view the lifecycle statuses of:

A: Components/part numbers: You can see information like General Availability (GA), End of Sale (EOS), End of Maintenance (EOM), and End of Support (EOS).

C: Products: Product lifecycle status, including planned phase-out timelines, is also available.

B: Solutions and D. BOQs (Bill of Quantities) are not associated directly with lifecycle management. BOQs are outcome documents generated after configuration, and solutions are broader design packages.

NEW QUESTION # 32

Huawei's aggregation router NetEngine 8000 M14 supports control-forwarding separation and hardware redundancy.

- A. True
- B. False

Answer: A

Explanation:

The Huawei NetEngine 8000 M14 is a high-performance aggregation router that features:

Control-forwarding separation: Enhances flexibility and reduces performance bottlenecks.

Hardware redundancy: Supports redundant power supplies, fans, and control boards to ensure carrier-grade reliability (99.999%). These capabilities make it ideal for core and aggregation-layer deployments in large enterprise and carrier networks.

NEW QUESTION # 33

In the NAC solution, which of the following authentication modes does not require users to install any client software and is applicable to scenarios where dumb terminals such as IP phones and printers need to access the network?

- A. Portal authentication
- B. 802.1X authentication
- **C. MAC address authentication**
- D. Wireless authentication

Answer: C

Explanation:

MAC address authentication (also known as MAC bypass authentication) is typically used for non-intelligent endpoints such as printers, IP phones, and IoT devices that cannot run client software or access a portal for login.

The authentication process is completed by identifying the device's MAC address and mapping it to predefined policies in the NAC system.

It does not require client installation or human interaction - making it ideal for "dumb terminals." By contrast, 802.1X and portal authentication require software clients or web-based logins and are designed for user-driven authentication.

#####

NEW QUESTION # 34

Which of the following are the highlights of the Huawei SD-WAN Solution? (Select all that Apply)

- **A. Large-scale networking, secure and reliable**
- **B. Intelligent traffic steering, superior experience**
- **C. One network to multiple clouds, on-demand interconnection**
- **D. Integrated management, control, and analysis, intelligent O&M**

Answer: A,B,C,D

Explanation:

The Huawei SD-WAN solution provides four main highlights, all of which are options listed in this A: One network to multiple clouds, on-demand interconnection: Seamless cloud access through intelligent link selection.

B: Large-scale networking, secure and reliable: Supports extensive deployment across thousands of branches with encrypted tunnels.

C: Integrated management, control, and analysis, intelligent O&M: Uses iMaster NCE for unified control and AI-powered O&M.

D: Intelligent traffic steering, superior experience: Dynamically selects the best path based on application type and network performance.

These highlights are found in official Huawei solution documentation and are emphasized in the HCSA-IP training.
