

New F5CAB1 Test Test & New F5CAB1 Dumps Pdf

2026 Latest Actual4Dumps F5CAB1 PDF Dumps and F5CAB1 Exam Engine Free Share: https://drive.google.com/open?id=1hNdFKDcFMrb-QRaQgz_AiYk2eWm8x9Yt

Our F5CAB1 study materials' developers to stand in the perspective of candidate, fully consider their material basis and actual levels of knowledge, formulated a series of scientific and reasonable learning mode, meet the conditions for each user to tailor their learning materials. What's more, our F5CAB1 Study Materials are cheap and cheap, and we buy more and deliver more. The more customers we buy, the bigger the discount will be. In order to make the user a better experience to the superiority of our F5CAB1 study materials.

F5 F5CAB1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• BIG IP Administration Data Plane Configuration: This section of the exam measures skills of System Administrators and covers configuring BIG IP objects that control data plane behavior. It focuses on setting up virtual servers, pools, nodes, monitors, and profiles so that applications are delivered reliably and efficiently according to design requirements.
Topic 2	<ul style="list-style-type: none">• BIG IP Administration Support and Troubleshooting: This section of the exam measures skills of Network Administrators and covers identifying and resolving common issues that affect BIG IP operation. It focuses on using logs, statistics, diagnostic tools, and basic troubleshooting methods to restore normal traffic flow and maintain stable application delivery.
Topic 3	<ul style="list-style-type: none">• BIG IP Administration Data Plane Concepts: This section of the exam measures skills of Network Administrators and covers how BIG IP handles application traffic on the data plane. It includes understanding flow of traffic, key data path components, basic concepts of load balancing, and how security and performance features affect user traffic.

Topic 4	<ul style="list-style-type: none"> • BIG IP Administration Install Initial Configuration and Upgrade: This section of the exam measures skills of System Administrators and covers the lifecycle tasks for deploying and maintaining a BIG IP system. It includes installing the platform, performing initial setup, applying licenses, configuring basic networking, and planning and executing software upgrades and hotfixes.
Topic 5	<ul style="list-style-type: none"> • BIG IP Administration Control Plane Administration: This section of the exam measures skills of System Administrators and covers managing the control plane where BIG IP is configured and administered. It includes working with user accounts, roles, device settings, configuration management, and using the graphical interface and command line for daily administrative tasks.

New F5CAB1 Dumps Pdf - F5CAB1 Vce Torrent

F5CAB1 certification is more and more important for this area, but the exam is not easy for many candidates. Our F5CAB1 practice materials make it easier to prepare exam with a variety of high quality functions. Their quality function is observably clear once you download them. We have three kinds of F5CAB1 practice materials moderately priced for your reference. All these three types of F5CAB1 practice materials win great support around the world and all popular according to their availability of goods, prices and other term you can think of. Just come and buy them!

F5 BIG-IP Administration Install, Initial Configuration, and Upgrade Sample Questions (Q59-Q64):

NEW QUESTION # 59

Which two items demonstrate the creation of a new volume for software images?
(Choose two.)

- A. Using the GUI, go to System > Software Management > Available Images > Install, and in the Install Software Image pop-up window, type the new volume name or number and click Install.
- B. Using the GUI, go to System > Disk Management, select New Volume. In the pop-up window, type the name or number of the new volume and click Apply.
- C. `tmsh install software image /shared/images/BIGIP-<version>.iso volume HD1.5 create-volume`
- D. `tmsh install sys software image /shared/images/BIGIP-<version>.iso volume HD1.5 create-volume`
- E. `tmsh install /sys software image BIGIP-<version>.iso volume HD1.5 create-volume`

Answer: B,C

Explanation:

In BIG-IP, software images are installed on boot volumes (for example, HD1.1, HD1.2, HD1.3, etc.).

To install software on a new volume, the administrator must instruct the system to create a new boot location before installation.

There are two correct ways to create a new volume:

A). `tmsh` command (with correct syntax)

`tmsh install software image /shared/images/BIGIP-<version>.iso volume HD1.5 create-volume` This syntax correctly includes:

* `install software image`

* full path to ISO (`/shared/images/...`)

* volume name (HD1.5)

* `create-volume` keyword

This instructs BIG-IP to create the new boot volume as part of the installation.

C). Using the GUI # System > Disk Management

From the Disk Management menu, the administrator can:

* Select "New Volume"

* Enter the volume identifier (e.g., HD1.5)

* Apply changes

This GUI method is officially supported and explicitly creates a new boot volume before installing the software.

Why the other options are incorrect:

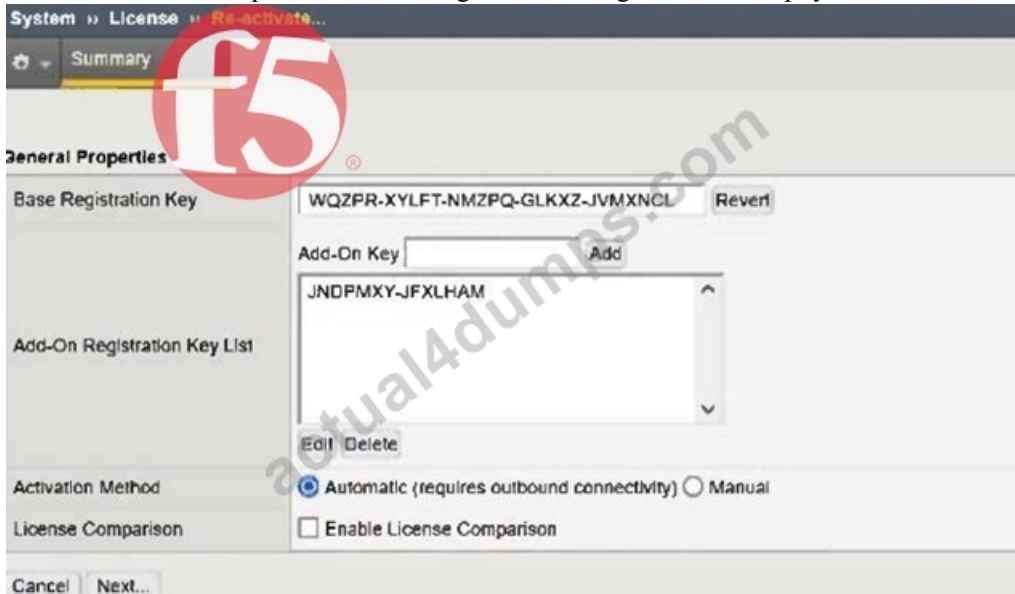

B). Incorrect `tmsh` syntax

* Missing `/shared/images/` path

- * Incorrect command structure
 - D). Incorrect command structure
 - * Missing required keywords and correct command hierarchy
 - E). Software Management # Install does NOT create volumes
 - * This installs to an existing volume only
 - * The GUI install dialog does not create new boot volumes
- Thus, only Option A and Option C properly create a new software volume.

NEW QUESTION # 60

An administrator is in the process of reactivating the license using the interface displayed in the exhibit.

What is the address of the license server to which the BIG-IP device must be able to establish an outbound connection in order to use the Automatic Activation Method?

- A. ask.f5.com
- B. activate.f5.com
- C. license.f5.com
- D. callhome.f5.com

Answer: B

Explanation:

When you choose Automatic as the activation method in the License > Re-activate screen, the BIG-IP device itself contacts F5's license activation service over the Internet.

For successful automatic activation:

The BIG-IP must have outbound network connectivity (typically via the management interface).

DNS resolution and routing must allow it to reach the F5 license activation host (the one shown in option D).

The device sends its dossier and registration key to that service and receives an updated license file in return, which is then installed automatically.

The other hostnames in the options are not used by BIG-IP for license activation, so they cannot be correct in the context of Automatic Activation.

NEW QUESTION # 61

Which of the following actions is NOT required during the initial setup of a BIG-IP system?

- A. Set up SSL certificates
- B. Assign an administrative password
- C. Set up self-IPs
- D. Install a software license

Answer: A

Explanation:

Setting up SSL certificates is typically done after the initial setup, not during it. The main tasks during initial setup involve network configuration and licensing.

NEW QUESTION # 62

When is the License Service Check Date enforced on a BIG-IP system?

- A. After editing a virtual server
- **B. During a software install**
- C. During system startup

Answer: B

Explanation:

The Service Check Date determines whether a particular software version is allowed to run under the device's license.

* When installing or upgrading TMOS, the installer checks the Service Check Date stored in the BIG-IP license file.

* If the license date is older than the minimum required for the target version, the software installation is blocked.

* This check happens specifically during a software install, not during routine device operations.

Editing virtual servers or system startup do not trigger this validation.

Thus, the enforcement happens during software installation.

NEW QUESTION # 63

Which of the following are resource allocation settings for modules? (Pick the 2 correct responses below)

- A. Maximum
- B. Limited
- **C. Nominal**
- **D. Dedicated**

Answer: C,D

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration - Install, Initial Configuration, and Upgrade:

When provisioning modules on a BIG-IP system, F5 provides specific resource allocation settings that define how system resources - CPU, memory, and disk - are distributed to each licensed module. The two valid and officially recognised allocation settings are Nominal and Dedicated .

Nominal instructs the system to allocate a moderate, balanced share of resources to the module. It allows the module to function effectively while sharing system resources with other provisioned modules. This is the most commonly used setting in multi-module deployments.

Dedicated allocates the maximum available system resources exclusively to a single module. When this setting is applied, it is typically the only module provisioned, as it consumes resources at a level that prevents other modules from operating concurrently in a meaningful capacity.

Option A - Maximum is not a valid BIG-IP provisioning allocation level; it does not appear in the official provisioning interface or documentation as a selectable resource tier.

Option C - Limited similarly does not exist as a defined resource allocation setting within BIG-IP module provisioning. It may superficially resemble valid terminology but has no standing in the official provisioning framework.

Administrators access these settings via System > Resource Provisioning in the Configuration Utility, where each licensed module displays its available allocation options.

NEW QUESTION # 64

.....

Our passing rate of F5CAB1 learning quiz is 99% and our F5CAB1 practice guide boosts high hit rate. Our F5CAB1 test torrents are compiled by professionals and the answers and the questions we provide are based on the real exam. The content of our F5CAB1 exam questions is simple to be understood and mastered. To let you get well preparation for the exam, our software

provides the function to stimulate the real exam and the timing function to help you adjust the speed. Based on those merits of our F5CAB1 Guide Torrent you can pass the F5CAB1 exam with high possibility.
