The pass rate is 98% for Deep-Security-Professional exam bootcamp, if you choose us, we can ensure you that you can pass the exam just one time. In addition, we offer you free demo to have a try before buying, so that you can know what the complete version is like. In order to strengthen your confidence for Deep-Security-Professional training materials, we are pass guarantee and money back guarantee, and we will refund your money if you fail to pass the exam. We have a professional service team and they have the professional knowledge for Deep-Security-Professional Exam Bootcamp, if you have any questions, you can contact with them.

To earn the Trend Deep-Security-Professional Certification, candidates must pass a rigorous exam that covers a wide range of topics related to Deep Security. This includes installation and configuration, policy creation and management, event analysis and reporting, and troubleshooting. Deep-Security-Professional exam is designed to test a candidate's ability to effectively use Deep Security to protect critical systems and data.

The Trend Deep-Security-Professional exam covers a range of topics related to securing cloud environments, including the fundamentals of cloud security, the architecture and deployment of Deep Security, and advanced security techniques such as intrusion prevention, vulnerability scanning, and application control. Through this certification program, professionals will learn how to implement best practices for securing their cloud environments, as well as how to troubleshoot and optimize their security configurations.

Deep-Security-Professional Certification Sample Questions - Deep-Security-Professional Exam Cram

Are you tired of feeling overwhelmed and unsure about how to prepare for your Trend Micro Certified Professional for Deep Security (Deep-Security-Professional) exam? Are you ready to take control of your future and achieve the scores you want to get in the Trend Micro Certified Professional for Deep Security (Deep-Security-Professional) certification exam? If so, it's time to buy real Trend Deep-Security-Professional Dumps of ActualTestsQuiz our team of experts has designed the product that has already helped thousands of students just like you pass the exam.

Trend Deep-Security-Professional Certification Exam is designed to test the skills and knowledge of individuals who are interested in becoming certified professionals in the field of deep security. Trend Micro Certified Professional for Deep Security certification is offered by Trend Micro, a leading provider of cybersecurity solutions, and is recognized globally as a mark of expertise in deep security.

Trend Micro Certified Professional for Deep Security Sample Questions (Q16-Q21):

NEW QUESTION # 16

A collection of servers protected by Deep Security do not have Internet access. How can Smart Scan be used on these computers?

- A. Promote one of the Deep Security Agents on the air gapped computers to become a Relay.
- B. Smart Scan can be configured to use a local pattern file containing the same information as the Smart Protection Network.
- C. Smart Scan must contact the Smart Protection Network to function. Any servers without Internet access will be unable to use Smart Scan.
- **D. Install a Smart Protection Server in the environment and set it as the source for File Reputation information.**

Answer: D

Explanation:

For environments without Internet access, a Smart Protection Server can be deployed locally. This server provides File Reputation and Web Reputation services for Smart Scan, allowing air-gapped systems to use Smart Scan without requiring direct Internet access.

NEW QUESTION # 17

What is IntelliScan?

- A. IntelliScan is a malware scanning method that monitors process memory in real time. It can identify known malicious processes and terminate them.
- B. IntelliScan reduces the risk of viruses entering your network by blocking real-time compressed executable files and pairs them with other characteristics to improve mal-ware catch rates.
- **C. IntelliScan is a method of identifying which files are subject to malware scanning as determined from the file content. It uses the file header to verify the true file type.**
- D. IntelliScan is a mechanism that improves scanning performance. It recognizes files that have already been scanned based on a digital fingerprint of the file.

Answer: C

Explanation:

IntelliScan is a Trend Micro technology that determines which files to scan for malware based on the actual file type, rather than just the file extension. This is done by analyzing the file header, allowing Deep Security to correctly scan files even if their extension has been changed to disguise their true nature.

From the official documentation:

"IntelliScan is a scanning method that identifies the true file type by examining the file header, instead of relying only on the file extension. This ensures that malicious files cannot evade detection simply by renaming extensions." Option A is correct and matches the official explanation.

Options B, C, and D are incorrect and describe features not provided by IntelliScan.

NEW QUESTION # 18

Based on the following exhibit, what behavior would you expect for the Application Control Protection Module?

- A. Since this computer is in Maintenance Mode, Application Control will allow any Blocked software to temporarily run.
- **B. Since this computer is in Maintenance Mode, new or changed software will be automatically added to the list of Allowed software in the currently active ruleset.**
- C. Since this computer is in Maintenance Mode, updates to the Application Control Protection Module will be applied.
- D. Since this computer is in Maintenance Mode, Application Control will ignore any Blocked software in the currently active ruleset.

Answer: B

Explanation:

When Maintenance Mode is enabled for Application Control, any new or changed software is automatically added to the list of allowed software. This feature is intended to support software installation, patching, or upgrades without manual intervention.

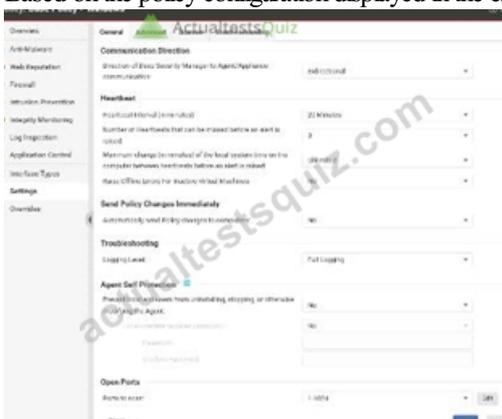

From the official documentation:

"When a computer is in Maintenance Mode, Application Control allows all new software to run and automatically adds it to the inventory of allowed software." References:

Trend Micro Deep Security Application Control Guide: Maintenance Mode

NEW QUESTION # 19

Based on the policy configuration displayed in the exhibit, which of the following statements is true?

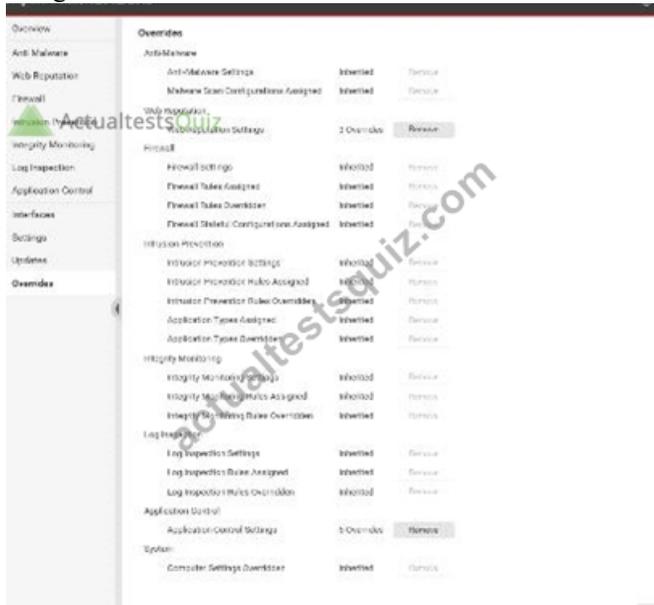

- A. Changes to any of the Deep Security policies will be send to the Deep Security Agents as soon as the changes are saved.
- B. Deep Security Agents will send event information to Deep Security Manager every 10 minutes.
- C. If the Deep Security Manager does not receive a message from the Deep Security agent every 20 minutes, an alert will be raised.
- **D. Administrators with access to the protected Server will be able to uninstall the Deep Security Agent through Windows Control Panel.**

Answer: D

NEW QUESTION # 20

The Overrides settings for a computer are displayed in the exhibit. Which of the following statements is true regarding the displayed configuration?

- A. The configuration for the Protection Modules is inherited from the policy assigned to this computer, except for the configuration of the Web Reputation and Application Control Protection Modules which have been set at the computer level.
- **B. The Protection Modules identified as Inherited in the exhibit have not yet been configured. Only the Web Reputation and Application Control Protection Modules have been configured.**
- C. The Protection Modules identified as Inherited in the exhibit have not yet been enabled. Only the Web Reputation and Application Control Protection Modules have been enabled at this point.
- D. The Web Reputation and Application Control Protection Modules have been assigned a different policy that the other Protection Modules and as a result, are displayed with overrides.

Answer: B
