## Valid AI-102 Exam Online | AI-102 Latest Exam Pattern

We all know, the IT industry is a new industry, and it is one of the chains promoting economic development, so its important role can not be ignored. Our BootcampPDF's AI-102 exam training materials is the achievement of BootcampPDF's experienced IT experts with constant exploration, practice and research for many years. Its authority is undeniable. If you buy our AI-102 VCE Dumps, we will provide one year free renewal service.

Microsoft AI-102 Exam is intended for professionals who are interested in a career in AI and want to demonstrate their expertise in designing and implementing AI solutions using Microsoft Azure. AI-102 exam is also suitable for those who are already working with Azure and want to upgrade their skills to work with AI services. Passing AI-102 Exam enables candidates to earn the Microsoft Certified: Azure AI Engineer Associate certification, which is recognized globally and validates their proficiency in designing and implementing AI solutions using Azure services.

## Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q120-Q125):

NEW QUESTION # 120

You plan to use containerized versions of the Anomaly Detector API on local devices for testing and in on-premises datacenters.

You need to ensure that the containerized deployments meet the following requirements:

\* Prevent billing and API information from being stored in the command-line histories of the devices that run the container.

\* Control access to the container images by using Azure role-based access control (Azure RBAC).

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. (Choose four.) NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

**Answer:**

Explanation:

Explanation:

Step 1: Pull the Anomaly Detector container image.

Step 2: Create a custom Dockerfile

Step 3: Build the image

Step 4: Push the image to an Azure container registry.

**NEW QUESTION # 121**

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

**NEW QUESTION # 122**

You have a product knowledgebase that contains multiple PDF documents.

You need to build a chatbot that will provide responses based on data in the knowledgebase. The solution must minimize development effort and costs.

What should you include in the solution?

- A. Azure AI Language custom question answering
- B. Azure OpenAI
- C. Azure AI Language conversational language understanding (CLU)
- D. Azure AI language detection

**Answer: A**

**NEW QUESTION # 123**

You have an Azure AI Search solution and a collection of blog posts that include a category field.

You need to index the posts. The solution must meet the following requirements:

- Include the category field in the search results.
- Ensure that users can search for words in the category field.
- Ensure that users can perform drill down filtering based on category.

Which index attributes should you configure for the category field?

- A. retrievable, facetable, and key
- B. retrievable, filterable, and sortable
- C. searchable, sortable, and retrievable
- D. searchable, facetable, and retrievable

**Answer: D**

Explanation:

Retrievable: Include the category field in the search results.

Searchable: Ensure that users can search for words in the category field.

Facetable: Ensure that users can perform drill down filtering based on category.
