Microsoft Power Platform Solution Architect Sample Questions (Q50-Q55):

NEW QUESTION # 50

You are designing a data model for a Microsoft Power Platform solution.

The data model must meet the following requirements:

* When an account is assigned to a new salesperson, all opportunities that are associated with the account must be assigned to the new salesperson.

* When a salesperson assigns a lead to another salesperson, all phone call activities related to the lead must be assigned to the new salesperson.

You need to recommend cascading strategies for the data model.

Which cascading strategy should you recommend? To answer, drag the appropriate cascading strategies to the correct requirements. Each cascading strategy may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

The screenshot shows an exam question interface with two panes. The left pane, titled 'Cascading strategies', contains four options: 'Cascade All', 'Cascade Active', 'Cascade User Owned', and 'Cascade None'. The right pane, titled 'Answer Area', contains two requirements and a 'Cascading strategy' column with input boxes. The first requirement is 'When an account is assigned to a new salesperson, all opportunities that are associated with the account must be assigned to the new salesperson.' The second requirement is 'When a salesperson assigns a lead to another salesperson, all phone call activities related to the lead must be assigned to the new salesperson.' The Microsoft logo is visible at the bottom of the interface.

Answer:

Explanation:

Cascading strategies

- Cascade All
- Cascade Active
- Cascade User Owned
- Cascade None

Requirement

When an account is assigned to a new salesperson, all opportunities that are associated with the account must be assigned to the new salesperson.

When a salesperson assigns a lead to another salesperson, all phone call activities related to the lead must be assigned to the new salesperson.

Cascading strategy

- Cascade All
- Cascade User Owned

Explanation:

Cascading strategies

NEW QUESTION # 51

You are designing an integration between an Azure SQL database and a model-driven app. You have the following requirements:

- * Audit updates to the data.
- * Assign security role access to tables at the user level.
- * Assign security role access to tables at the organization level.
- * Enable change tracking.
- * Add and update data.

You need to implement virtual tables.

Which two requirements can you meet by using virtual tables? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Assign security role access to tables at the organization level.
- B. Add and update data.
- C. Audit updates to the data.
- D. Assign security role access to tables at the user level.
- E. Enable change tracking.

Answer: A,D

NEW QUESTION # 52

You need to ensure that the solution meets the data security and compliance requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION # 53

You are designing a Microsoft Power Platform solution for a financial services company. Data from existing financial systems will be imported into Microsoft Dataverse and displayed to users as part of the app deployment.

The company has the following issues with data:

- * Phone numbers in records can contain letters in the record.
- * Security has not been applied to financial total values held in each record.
- * Users and managers can see all records.

You need to apply data quality standards to the solution.

What should you recommend? To answer, drag the appropriate solutions to the correct data quality items.

Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Requirement	Solution
View, assign, and resolve inspection bottlenecks.	Booking rules Schedule board Proficiency models
Automatically input measurement readings from inspection gauges	Custom connector Azure IoT Hub connector Azure IoT Central connector Microsoft Dataverse connector

Explanation:

Box 1: Schedule board

Note: The Dynamics 365 Field Service schedule board provides an overview of resource availability and bookings you can make. When you're looking at the schedule board for the current day, you'll see a blue line that indicates the current time of day. You can also see a picture of all the resources listed on the schedule board. To quickly view contact information for a resource, hover over their name to view the contact card.

Box 2: Azure IoT Central connector

Azure IoT Central makes it easy to connect, monitor, and manage your IoT devices at scale. With the IoT Central V3 connector, you can trigger workflows when a rule has fired, and take actions by executing commands, updating properties, getting telemetry from devices, and more. Use this connector with your Azure IoT Central V3 application.

This connector is available in the following products and regions:

Service	Class	Regions
Logic Apps	Standard	 All Logic Apps regions except the following: - Azure Government regions - Azure China regions
Power Automate	Premium	All Power Automate regions except the following: - US Government (GCC) - US Government (GCC High) - China Cloud operated by 21Vianet
Power Apps	Premium	All Power Apps regions except the following: - US Government (GCC) - US Government (GCC High) - China Cloud operated by 21Vianet
