

UiPath-TAEPv1 Latest Test Simulator - New UiPath-TAEPv1 Test Book

BONUS!!! Download part of BraindumpQuiz UiPath-TAEPv1 dumps for free: https://drive.google.com/open?id=1Up9idqPRww_J1QxIbKW_BtGc-wfNWzIdO

The UiPath-TAEPv1 test materials are mainly through three learning modes, Pdf, Online and software respectively. Among them, the software model is designed for computer users, can let users through the use of Windows interface to open the UiPath-TAEPv1 test prep of learning. It is convenient for the user to read. The UiPath-TAEPv1 test materials have a biggest advantage that is different from some online learning platform, the UiPath-TAEPv1 quiz torrent can meet the client to log in to learn more, at the same time, and people can use the machine online of UiPath-TAEPv1 test prep on all kinds of electronic devices.

Our system is high effective and competent. After the clients pay successfully for the UiPath-TAEPv1 study materials the system will send the products to the clients by the mails. The clients click on the links in the mails and then they can use the UiPath-TAEPv1 Study Materials immediately. Our system provides safe purchase procedures to the clients and we guarantee the system won't bring the virus to the clients' computers and the successful payment for our UiPath-TAEPv1 study materials.

New UiPath-TAEPv1 Test Book - UiPath-TAEPv1 Latest Braindumps Sheet

So, when you get the UiPath Test Automation Engineer Professional v1.0 UiPath-TAEPv1 exam dumps material for your UiPath Test Automation Engineer Professional v1.0 UiPath-TAEPv1 certification exam, you have to check whether they are providing you the UiPath Test Automation Engineer Professional v1.0 UiPath-TAEPv1 Practice Test or not. You must choose those who shall give you the UiPath Test Automation Engineer Professional v1.0 UiPath-TAEPv1 questions and not those who are giving you copied sheets only.

UiPath UiPath-TAEPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• UiPath Studio - Testing Panels and Templates: This section of the exam measures the skills of RPA Developers and focuses on how to work with testing panels in UiPath Studio. It includes how to create, import, and manage test cases, along with the use of Test Explorer for analyzing test outcomes. It also covers Descriptor and Activity Coverage panels used for examining object recognition and checking redundancy in test cases. The section further explains testing project templates, the Test Automation Framework, and how to customize execution and test case templates.

Topic 2	<ul style="list-style-type: none"> • UiPath Test Manager: This section of the exam measures the skills of Test Automation Engineers and focuses on using UiPath Test Manager for managing test lifecycles. It includes actions like defining custom fields, managing access, importing • exporting projects, and documenting manual steps using UiPath Task Capture. It also explains how to analyze test results, handle execution re-runs, manage KPIs, and create defects for failed test cases, along with troubleshooting common errors.:
Topic 3	<ul style="list-style-type: none"> • UiPath Studio - Test Activities and Workflow Best Practices: This section of the exam measures the skills of Test Automation Engineers and evaluates knowledge of using verification activities and test-specific functions within UiPath Studio. It involves working with test data generation, document attachments in test cases, and applying workflow analyzer rules for stable collaboration. It also includes mock testing to isolate test case components and ensure focused validations.
Topic 4	<ul style="list-style-type: none"> • CI • CD Implementation: This section of the exam measures the skills of RPA Developers and introduces the concepts of Continuous Integration and Continuous Delivery (CI • CD). It covers how to implement pipelines and perform tasks using the UiPath Command Line Interface (CLI) for streamlined and automated deployments of test workflows and processes.
Topic 5	<ul style="list-style-type: none"> • Environments, Applications, and • or Tools: This section of the exam measures the skills of RPA Developers and evaluates comfort with various tools and environments commonly used with UiPath. These include Microsoft Excel, JSON, XML, ERPs, web elements, browsers, virtual machines, version control systems, and UiPath components such as Studio, Orchestrator, and Robots.
Topic 6	<ul style="list-style-type: none"> • UiPath Test Suite – Orchestrator: This section of the exam measures the skills of Test Automation Engineers and covers how to manage test sets in UiPath Orchestrator. It includes creating, executing, scheduling, and deleting test sets, using test data queues, and analyzing results from the Test Execution page. It also discusses re-executing tests and linking test sets for better orchestration of test activities.
Topic 7	<ul style="list-style-type: none"> • UiPath Robot: This section of the exam measures the skills of RPA Developers and explains the role of testing robots and their connectivity with UiPath Orchestrator. It discusses the execution of test cases using both on-premises and cloud-based robots and highlights how different robot types support automation testing in a scalable environment.
Topic 8	<ul style="list-style-type: none"> • UiPath Test Suite Architecture and API Integrations: This section of the exam measures the skills of Test Automation Engineers and covers the fundamental capabilities of UiPath Test Suite in automating different types of testing such as UI, API, and data-driven testing. It includes an overview of Test Suite tools and how they integrate with each other, as well as with third-party application lifecycle management (ALM) tools through APIs. Candidates are expected to understand API testing concepts and how external tools can be connected for requirement synchronization, defect management, and test case tracking.

UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q107-Q112):

NEW QUESTION # 107

What is the maximum number of Projects that can be created in Test Manager?

- A. 100 Test Manager Projects
- B. 10 Test Manager Projects
- **C. Unlimited Test Manager Projects**
- D. 50 Test Manager

Answer: C

Explanation:

In UiPath Test Manager, there is no predefined limit on the number of projects that can be created. You can create unlimited Test Manager Projects, as long as your system's resources and configuration can handle the required capacity.

NEW QUESTION # 108

What is the correct order of stages of the Testing process?

Instructions: Drag the Description found on the left and drop on the correct order of stages found on the right.

Answer Area

Description

Design Plan Analyze

Implement Execute

Order of Stages

1st

2nd

3rd

4th

5th

Answer:

Explanation:

Description

Design Plan Analyze

Implement Execute

Order of Stages

1st Plan

2nd Analyze

3rd Design

4th Implement

5th Execute

NEW QUESTION # 109

Which of the custom field actions can be used in order to change the default value of a custom field within an object in UiPath Test Manager?

- A. Rename
- **B. Change Default Value**
- C. Delete and Create
- D. Edit

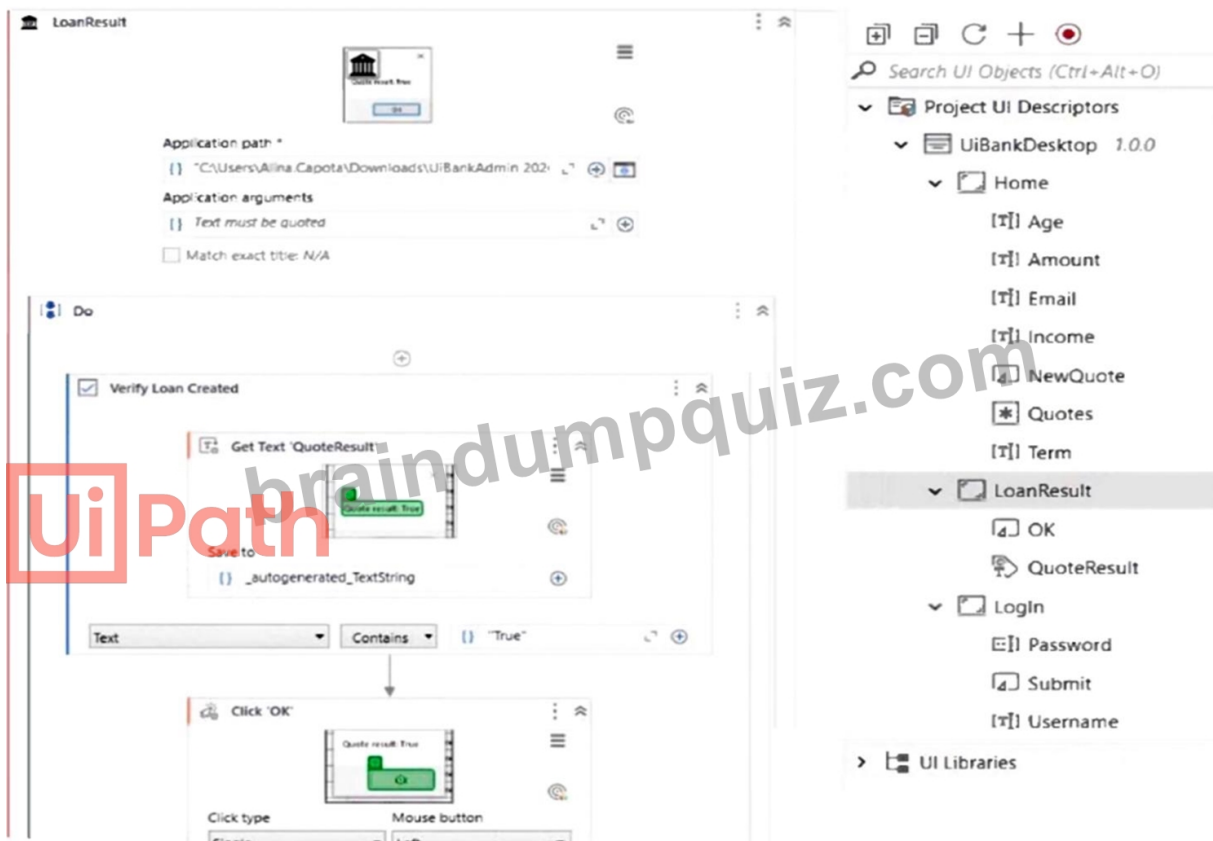

Answer: B

Explanation:

In UiPath Test Manager, the action "Change Default Value" is specifically used to modify the default value of a custom field within an object, such as a requirement, test case, or defect. This helps maintain consistent metadata across projects.

NEW QUESTION # 110

Consider the following snippet:

What should be improved to ensure the Test Case will not fail with exception?

- A. Click 'OK' should be removed.
- B. The ObjectRepository should be changed so all the elements fall into Home screen.
- C. In the Verification point ' _autogenerated_ TextString' should be removed.
- D. The ApplicationPath should be provided dynamically.

Answer: D

Explanation:

The ApplicationPath in the "Launch Application" activity is hardcoded, which can lead to failures if the file path changes or differs across environments. To avoid exceptions and improve flexibility, the ApplicationPath should be provided dynamically (e.g., through a project argument or configuration file).

NEW QUESTION # 111

What is a primary distinction between manual and automated test execution in UiPath Test Manager?

- A. Manual executions require user interaction for each test step, while automated executions are self-running without any manual intervention.
- B. Manual executions are done for test sets created in UiPath Test Manager or linked from Orchestrator with manual steps, while automated executions are invoked through Orchestrator for test cases linked from Studio.
- C. Manual and automated test executions do not have specific distinctions and can be executed interchangeably.
- D. Automated test executions can be performed only in UiPath Orchestrator, while manual executions can only be performed in UiPath Test Manager.

Answer: A

Explanation:

The primary distinction is that manual executions require user interaction for each test step, making them suitable for scenarios like exploratory testing or steps requiring human validation. In contrast, automated executions are fully self-running, executed via Orchestrator without manual involvement.
