In order to let you understand our products in detail, our Certified Data Centre Professional (CDCP) test torrent has a free trail service for all customers. You can download the trail version of our CDCP study torrent before you buy our products, you will develop a better understanding of our products by the trail version. In addition, the buying process of our CDCP exam prep is very convenient and significant. You will receive the email from our company in 5 to 10 minutes after you pay successfully; you just need to click on the link and log in, then you can start to use our CDCP study torrent for studying. Immediate download after pay successfully is a main virtue of our Certified Data Centre Professional (CDCP) test torrent. At the same time, you will have the chance to enjoy the 24-hours online service if you purchase our products, so we can make sure that we will provide you with an attentive service.

The CDCP mock tests are specially built for you to evaluate what you have studied. These Certified Data Centre Professional (CDCP) (CDCP) practice exams (desktop and web-based) are customizable, which means that you can change the time and questions according to your needs. Our CDCP Practice Tests teach you time management so you can pass the Certified Data Centre Professional (CDCP) (CDCP) certification exam.

>> CDCP Exam Review <<

100% Pass CDCP - Updated Certified Data Centre Professional (CDCP) Exam Review

Our CDCP exam prep will give you a complete after-sales experience. You can consult online no matter what problems you encounter. You can get help anywhere, anytime in our CDCP test material. CDCP test questions have very high quality services in addition to their high quality and efficiency. If you use CDCP test material, you will have a very enjoyable experience while improving your ability. We have always advocated customer first. If you use our learning materials to achieve your goals, we will be honored. CDCP exam prep look forward to meeting you.

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q65-

Q70):

NEW QUESTION # 65

Does unplanned downtime of a data centre have an impact on the business results?

- A. No, unplanned data centre downtime is already financially planned for in the yearly budget planning process.
- **B. Yes, data centre downtime can result in business downtime.**
- C. Yes, but data centre downtime only impacts the airline industry.
- D. No, because data centres operate independently from the business.

Answer: B

Explanation:

Data centres are essential for supporting the IT operations and applications of various businesses across different industries. Data centre downtime can have a negative impact on the business results, such as loss of revenue, customer satisfaction, productivity, reputation, and competitive advantage. According to a web search, the average cost of data centre downtime in 2020 was \$8,851 per minute, and the average duration of a data centre outage was 95 minutes¹. This means that a typical data centre outage could cost a business over

\$840,000 in direct and indirect losses¹. Therefore, data centre downtime can have a significant impact on the business results, regardless of the industry or sector.

NEW QUESTION # 66

An optical fiber cable comes with the specifications 50/125 μm .

What do the numbers represent?

- A. The first number represents the distance for a 10 Gb/s connection; the second number represents the distance for a 1 Gb/s connection.
- **B. The first number represents the diameter of the core; the second number represents the diameter of the cladding in microns.**
- C. The first number represents the required distance to single-phase power cabling; the second number represents the required distance to three-phase cabling.
- D. The first number represents the diameter of the core; the second number represents the actual diameter cable including the buffer and jacket.

Answer: B

Explanation:

Optical fiber cables are composed of a core, a cladding, and a coating. The core is the central part of the fiber that carries the light signal. The cladding is the layer surrounding the core that reflects the light back into the core and prevents signal loss. The coating is the protective layer that covers the cladding and provides mechanical strength and environmental protection. The specifications of an optical fiber cable indicate the dimensions of the core and the cladding in microns (μm), which are one millionth of a meter. For example, a

50/125 μm cable has a core diameter of 50 μm and a cladding diameter of 125 μm . The coating diameter is usually 250 μm , but it is not part of the specifications.

NEW QUESTION # 67

The termination of the ability of a product to perform its required function can be defined as.

- A. Hindrance
- B. Termination
- **C. Failure**
- D. Obstacle

Answer: C

Explanation:

According to the EPI Data Centre Professional (CDCP) Preparation Guide, failure is defined as "the termination of the ability of a product to perform its required function" (page 9). Failure can occur due to various reasons, such as wear and tear, design flaws, human errors, environmental factors, or external events.

Failure can affect the availability, reliability, and performance of a product, system, or service.

NEW QUESTION # 68

From the list below, which sensor detects smoke the fastest?

- A. Ionization detector
- **B. VESDA/HSSD**
- C. Photoelectric detector
- D. Sprinkler bulbs

Answer: B

Explanation:

VESDA (Very Early Smoke Detection Apparatus) or HSSD (High Sensitivity Smoke Detection) systems are the fastest smoke sensors among the options listed. These systems use a network of pipes to draw air samples from the protected area and analyze them using a laser-based detection chamber. VESDA/HSSD systems can detect smoke at very low concentrations, typically in the range of 0.005 to 20 percent obscuration per meter.

This means they can provide early warning of a fire before it becomes visible or spreads. VESDA/HSSD systems are ideal for data centers and other critical facilities that require high levels of fire protection and minimal downtime.

NEW QUESTION # 69

What is the current recommended temperature for ICT equipment as described in the ASHREA TC 9.9 guideline?

- **A. 18-27 C (64.4 - 80.6°F)**
- B. 25-45 °C (77 - 113 °F)
- C. 8-18 C (46.4 -64.4 °F)
- D. 20-40 °C (68 - 104 °F)

Answer: A

Explanation:

The current recommended temperature for ICT equipment as described in the ASHRAE TC 9.9 guideline is 18-27 C (64.4 - 80.6°F). This is the recommended range for the dry-bulb temperature at the inlet of the servers, which is the most critical parameter for ensuring the optimal performance and reliability of the ICT equipment. The recommended range is based on the thermal specifications of the majority of the ICT equipment in the market, as well as the energy efficiency and environmental considerations of the data centre cooling systems. The recommended range is suitable for Classes A1 to A4 of the ASHRAE thermal guideline classes, which cover different types and generations of ICT equipment.
