

Free PDF 2026 Snowflake The Best Useful DEA-C01 Dumps

P.S. Free 2026 Snowflake DEA-C01 dumps are available on Google Drive shared by ITCertMagic: https://drive.google.com/open?id=1uNwO563UJp7eyvQf8N2RYAV_h_4rWmgX

There are three different versions provided by our company. Every version is very convenient and practical. The three different versions of our DEA-C01 study torrent have different function. We believe that you must find the version that is suitable for you. Now I am willing to show you the special function of the PDF version of DEA-C01 test torrent. If you prefer to read paper materials rather than learning on computers, the PDF version of our SnowPro Advanced: Data Engineer Certification Exam guide torrent must be the best choice for you. Because the study materials on the PDF version are printable, you can download our DEA-C01 study torrent by the PDF version and print it on papers. We believe that it will be very helpful for you to protect your eyes. In addition, the PDF version also has many other special functions. If you use the PDF version of our DEA-C01 test torrent, you will find more special function about the PDF version.

Snowflake DEA-C01 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Storage and Data Protection: The topic tests the implementation of data recovery features and the understanding of Snowflake's Time Travel and micro-partitions. Engineers are evaluated on their ability to create new environments through cloning and ensure data protection, highlighting essential skills for maintaining Snowflake data integrity and accessibility.
Topic 2	<ul style="list-style-type: none"> • Security: The Security topic of the DEA-C01 test covers the principles of Snowflake security, including the management of system roles and data governance. It measures the ability to secure data and ensure compliance with policies, crucial for maintaining secure data environments for Snowflake Data Engineers and Software Engineers.
Topic 3	<ul style="list-style-type: none"> • Performance Optimization: This topic assesses the ability to optimize and troubleshoot underperforming queries in Snowflake. Candidates must demonstrate knowledge in configuring optimal solutions, utilizing caching, and monitoring data pipelines. It focuses on ensuring engineers can enhance performance based on specific scenarios, crucial for Snowflake Data Engineers and Software Engineers.
Topic 4	<ul style="list-style-type: none"> • Data Transformation: The SnowPro Advanced: Data Engineer exam evaluates skills in using User-Defined Functions (UDFs), external functions, and stored procedures. It assesses the ability to handle semi-structured data and utilize Snowpark for transformations. This section ensures Snowflake engineers can effectively transform data within Snowflake environments, critical for data manipulation tasks.
Topic 5	<ul style="list-style-type: none"> • Data Movement: Snowflake Data Engineers and Software Engineers are assessed on their proficiency to load, ingest, and troubleshoot data in Snowflake. It evaluates skills in building continuous data pipelines, configuring connectors, and designing data sharing solutions.

DEA-C01 Valid Exam Braindumps | DEA-C01 Certification Exam Infor

Nowadays the requirements for jobs are higher than any time in the past. The job-hunters face huge pressure because most jobs require both working abilities and profound major knowledge. Passing DEA-C01 exam can help you find the ideal job. If you buy our DEA-C01 Test Prep you will pass the exam easily and successfully, and you will realize you dream to find an ideal job and earn a high income. Our product is of high quality and the passing rate and the hit rate are both high.

Snowflake SnowPro Advanced: Data Engineer Certification Exam Sample Questions (Q171-Q176):

NEW QUESTION # 171

A company has a data pipeline that uses an Amazon RDS instance, AWS Glue jobs, and an Amazon S3 bucket. The RDS instance and AWS Glue jobs run in a private subnet of a VPC and in the same security group.

A user made a change to the security group that prevents the AWS Glue jobs from connecting to the RDS instance. After the change, the security group contains a single rule that allows inbound SSH traffic from a specific IP address.

The company must resolve the connectivity issue.

Which solution will meet this requirement?

- A. Add an inbound rule that allows all TCP traffic on all UDP ports. Set the private IP address of the RDS instance as the source.
- **B. Add an inbound rule that allows all TCP traffic on all TCP ports. Set the security group as the source.**
- C. Replace the source of the existing SSH rule with the private IP address of the RDS instance. Create an outbound rule with the same source, destination, and protocol as the inbound SSH rule.
- D. Add an inbound rule that allows all TCP traffic on all TCP ports. Set the DNS name of the RDS instance as the source.

Answer: B

Explanation:

Since both the RDS instance and the Glue jobs share the same security group, allowing that security group as the source for inbound TCP traffic (on all ports) immediately restores connectivity from the Glue-attached ENIs to the database. This single rule change requires no additional infrastructure and incurs no extra maintenance.

NEW QUESTION # 172

A company uses an Amazon QuickSight dashboard to monitor usage of one of the company's applications. The company uses AWS Glue jobs to process data for the dashboard. The company stores the data in a single Amazon S3 bucket. The company adds new data every day.

A data engineer discovers that dashboard queries are becoming slower over time. The data engineer determines that the root cause of the slowing queries is long-running AWS Glue jobs.

Which actions should the data engineer take to improve the performance of the AWS Glue jobs?

(Choose two.)

- A. Increase the AWS Glue instance size by scaling up the worker type.
- B. Convert the AWS Glue schema to the DynamicFrame schema class.
- C. Partition the data that is in the S3 bucket. Organize the data by year, month, and day.
- D. Modify the IAM role that grants access to AWS glue to grant access to all S3 features.
- E. Adjust AWS Glue job scheduling frequency so the jobs run half as many times each day.

Answer: A,C

NEW QUESTION # 173

A Data Engineer is building a set of reporting tables to analyze consumer requests by region for each of the Data Exchange offerings annually, as well as click-through rates for each listing. Which views are needed MINIMALLY as data sources?

- A. SNOWFLAKE.DATA_SHARING_USAGE.LISTING_CONSOKE>TION_DAILY
- B. SNOWFLAKE.ACCOUNT_USAGE.DATA_TRANSFER_HISTORY
- C. SNOWFLAKE.DATA_SHARING_USAGE.LISTING_TELEMETRY_DAILY
- D. SNOWFLAKE- DATA_SHARING_USAGE - LISTING_EVENTS_BAILY

Answer: A

Explanation:

Explanation

The SNOWFLAKE.DATA_SHARING_USAGE.LISTING_CONSOKE>TION_DAILY view provides information about consumer requests by region for each of the Data Exchange offerings annually, as well as click-through rates for each listing. This view is the minimal data source needed for building the reporting tables. The other views are not relevant for this use case.

NEW QUESTION # 174

You as Data engineer might want to consider disabling auto-suspend for a warehouse if?

- A. You require the warehouse to be available with no delay or lag time.
- B. You have a heavy, steady workload for the warehouse.
- C. You have a low, fluctuating workload for the warehouse.
- D. You require the warehouse to be available with delay.

Answer: A,B

Explanation:

Explanation

Automating Warehouse Suspension

Data Engineer might want to consider disabling auto-suspend for a warehouse if:

He/She have a heavy, steady workload for the warehouse.

He/She require the warehouse to be available with no delay or lag time. Warehouse provisioning is generally very fast (e.g. 1 or 2 seconds); however, depending on the size of the warehouse and the availability of compute resources to provision, it can take longer.

If he/she chose to disable auto-suspend, He/she must carefully consider the costs associated with running a warehouse continually, even when the warehouse is not processing queries. The costs can be significant, especially for larger warehouses (X-Large, 2X-Large, etc.).

To disable auto-suspend, Engineer must explicitly select Never in the web interface, or specify 0 or NULL in SQL.

NEW QUESTION # 175

A data engineer must orchestrate a data pipeline that consists of one AWS Lambda function and one AWS Glue job. The solution must integrate with AWS services.

Which solution will meet these requirements with the LEAST management overhead?

- A. Use an AWS Glue workflow to run the Lambda function and then the AWS Glue job.
- B. Use an Apache Airflow workflow that is deployed on an Amazon EC2 instance. Define a directed acyclic graph (DAG) in which the first task is to call the Lambda function and the second task is to call the AWS Glue job.
- **C. Use an AWS Step Functions workflow that includes a state machine. Configure the state machine to run the Lambda function and then the AWS Glue job.**
- D. Use an Apache Airflow workflow that is deployed on Amazon Elastic Kubernetes Service (Amazon EKS). Define a directed acyclic graph (DAG) in which the first task is to call the Lambda function and the second task is to call the AWS Glue job.

Answer: C

NEW QUESTION # 176

.....

By using our DEA-C01 study engine, your abilities will improve and your mindset will change. Who does not want to be a positive person? This is all supported by strength! In any case, a lot of people have improved their strength through DEA-C01 Exam simulating. They now have the opportunity they want. Whether to join the camp of the successful ones, purchase DEA-C01 learning braindumps, you decide for yourself!
