Salesforce Certified Platform Identity and Access Management Architect Sample Questions (Q111-Q116):

NEW QUESTION # 111

A multinational industrial products manufacturer is planning to implement Salesforce CRM to manage their business. They have the following requirements:

1. They plan to implement Partner communities to provide access to their partner network .
2. They have operations in multiple countries and are planning to implement multiple Salesforce orgs.
3. Some of their partners do business in multiple countries and will need information from multiple Salesforce communities.
4. They would like to provide a single login for their partners.

How should an Identity Architect solution this requirement with limited custom development?

- A. Consolidate Partner related information in a single org and provide access through Salesforce community.
- B. Allow partners to choose the Salesforce org they need information from and use login flows to authenticate access.
- C. Create a partner login for the country of their operation and use SAML federation to provide access to other orgs.
- D. Register partners in one org and access information from other orgs using APIs.

Answer: C

NEW QUESTION # 112

Universal containers (UC) uses a legacy Employee portal for their employees to collaborate and post their ideas. UC decides to use salesforce ideas for voting and better tracking purposes. To avoid provisioning users on Salesforce, UC decides to push ideas

posted on the Employee portal to salesforce through API. UC decides to use an API user using OAuth Username - password flow for the connection. How can the connection to salesforce be restricted only to the employee portal server?

- A. Use a digital certificate signed by the employee portal Server.
- B. Use a dedicated profile for the user the Employee portal uses.
- C. Add the employee portals IP address to the login IP range on the user profile.
- **D. Add the Employee portals IP address to the Trusted IP range for the connected App**

Answer: D
