

Pass Guaranteed 2026 Network Appliance Pass-Sure Latest NS0-185 Practice Materials

If candidates are going to buy NS0-185 test dumps, they may consider the problem of the fund safety. If you are thinking the same question like this, our company will eradicate your worries. We choose the international third party to ensure the safety of the fund. The NS0-185 Test Dumps are effective and conclusive, you just need to use the least time to pass it. If you choose us, it means you choose the pass.

Our NS0-185 quiz torrent can provide you with a free trial version, thus helping you have a deeper understanding about our NS0-185 test prep and estimating whether this kind of study material is suitable to you or not before purchasing. With the help of our trial version, you will have a closer understanding about our NS0-185 exam torrent from different aspects, ranging from choice of three different versions available on our test platform to our after-sales service. Otherwise you may still be skeptical and unintelligible about our NS0-185 Test Prep. So as you see, we are the corporation with ethical code and willing to build mutual trust between our customers.

Pass Guaranteed Quiz Authoritative Network Appliance - NS0-185 - Latest NetApp Storage Installation Engineer, ONTAP Professional Exam Practice Materials

Network Appliance NS0-185 is a certification exam to test IT expertise and skills. If you find a job in the IT industry, many human resource managers in the interview will reference what Network Appliance related certification you have. If you have Network Appliance NS0-185 Certification, apparently, it can improve your competitiveness.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q50-Q55):

NEW QUESTION # 50

Where is user data (file access) written to by default?

- A. mailbox disks
- B. Vol0_root
- C. Aggr0_root
- D. SVM volume

Answer: D

Explanation:

User data in ONTAP is written to volumes owned by Storage Virtual Machines (SVMs). Root aggregates and root volumes are reserved for system metadata and ONTAP operations. Mailbox disks store HA metadata only. Therefore, user data is written to an SVM volume.

NEW QUESTION # 51

Which license is required to enable storage failover?

- A. no license is required
- B. SFO
- C. LC
- D. CFO

Answer: A

Explanation:

Storage failover is a core ONTAP feature and does not require a separate license. As long as the hardware supports HA and the system is properly cabled and configured, storage failover is available by default. Therefore, no license is required.

NEW QUESTION # 52

Which set of components on a FAS9000 are highlighted in the exhibit?

- **A. NVRAM-Module, Controller, Serial-Port, FlashCache-Module**
- B. Powersupply, Controller, USB-Port, NVRAM-Module
- C. SAS-Module, Controller, USB-Port, FlashCache-Module
- D. FCVI-Module, Controller, Serial-Port, FlashCache-Module

Answer: A

Explanation:

Understanding hardware components is a core requirement within ONTAP SAN concepts. The exhibit highlights several key components on a FAS9000 system that are essential to system operation and high availability.

The large central components shown are the controllers, which house the CPUs, memory, and network interfaces responsible for data processing and cluster operations. Adjacent to the controllers are the NVRAM modules, which are critical for write caching and data integrity. NVRAM ensures that incoming write operations are safely logged and protected in the event of power loss or controller failover.

The exhibit also highlights the serial ports, which are used for low-level system access during installation, troubleshooting, or recovery scenarios. Serial ports are especially important during initial setup or when network access is unavailable.

Finally, the highlighted FlashCache modules provide read caching functionality. FlashCache accelerates read-intensive workloads by caching frequently accessed data on flash memory, improving overall system performance.

Other options are incorrect because they either include components not highlighted in the exhibit (such as power supplies or USB ports) or misidentify the flash modules. Therefore, the correct set of components shown in the exhibit is NVRAM-Module, Controller, Serial-Port, FlashCache-Module.

NEW QUESTION # 53

After the successful installation of a NetApp ONTAP cluster, the customer wants to view telemetry data and receive online information about risks and best-practice gaps.

Which tool satisfies the customer's requirements?

- A. Interoperability Matrix Tool
- B. Cloud Manager
- **C. Active IQ Digital Advisor**
- D. Spot by NetApp

Answer: C

Explanation:

Active IQ Digital Advisor provides telemetry analysis, predictive risk detection, and best-practice recommendations based on AutoSupport data. It is specifically designed for proactive monitoring and risk mitigation.

NEW QUESTION # 54

Data ONTAP 9 supports which three features? (Choose three.)

- **A. SMB 3.0**
- **B. SnapMirror**
- C. NFSv2
- **D. Infinite Volumes**

Answer: A,B,D

NEW QUESTION # 55

.....

To obtain the NS0-185 certificate is a wonderful and rapid way to advance your position in your career. In order to reach this goal of passing the NS0-185 exam, you need our help. You are lucky to click into this link for we are the most popular vendor in the market. We have engaged in this career for more than ten years and with our NS0-185 Exam Questions, you will not only get aid to gain your dreaming certification, but also you can enjoy the first-class service online.
